807 HEALTH AND SAFETY POLICY

I. PURPOSE

The purpose of this policy is to assist the school district in promoting health and safety, reducing injuries, and complying with federal, state, and local health and safety laws and regulations.

II. GENERAL STATEMENT OF POLICY

- A. The policy of the school district is to implement a health and safety program that includes plans and procedures to protect employees, students, volunteers, and members of the general public who enter school district buildings and grounds. The objective of the health and safety program will be to provide a safe and healthy learning environment; to increase safety awareness; to help prevent accidents, illnesses, and injuries; to reduce liability; to assign duties and responsibilities to school district staff to implement and maintain the health and safety program; to establish written procedures for the identification and management of hazards or potential hazards; to train school district staff on safe work practices; and to comply with all health and safety, environmental, and occupational health laws, rules, and regulations.
- B. All school district employees have a responsibility for maintaining a safe and healthy environment within the school district and are expected to be involved in the health and safety program to the extent practicable. For the purpose of implementing this policy, the school district may form a health and safety advisory committee to be appointed by the superintendent. The health and safety advisory committee will be composed of employees and other individuals with specific knowledge of related issues. The advisory committee will provide recommendations to the administration regarding plans and procedures to implement this policy and to establish procedures for identifying, analyzing, and controlling hazards, minimizing risks, and training school district staff on safe work practices. The committee will also recommend procedures for investigating accidents and enforcement of workplace safety rules. Each recommendation shall include estimates of annual costs of implementing and maintaining that proposed recommendation. The superintendent may request that the safety committee established under Minn. Stat. § 182.676 carry out all or part of the duties of the advisory committee or the advisory committee may consider recommendations from a separate safety committee established under Minn. Stat § 182.676.

III. PROGRAM AND PLANS

- A. For the purpose of implementing this policy, the administration will, within the budgetary limitations adopted by the school board, implement a health and safety program that includes specific plan requirements in various areas as identified by the health and safety advisory committee.
- B. The administration shall establish procedures to ensure, to the extent practicable, that all employees are properly trained and instructed in job procedures, crisis response duties, and emergency response actions where exposure or possible exposure to hazards and potential hazards may occur.
- C. The administration shall conduct or arrange safety inspections and drills. Any identified hazards, unsafe conditions, or unsafe practices will be documented and corrective action taken to the extent practicable to control that hazard, unsafe condition, or unsafe practice.
- D. Communication from employees regarding hazards, unsafe or potentially unsafe working conditions, and unsafe or potentially unsafe practices is encouraged in either written or oral form. No employee will be retaliated against for reporting hazards or unsafe or potentially unsafe working conditions or practices.
- E. The administration shall conduct periodic workplace inspections to identify potential hazards and safety concerns.
- F. In the event of an accident or a near miss, the school district shall promptly cause an accident investigation to be conducted in order to determine the cause of the incident and to take action to prevent a similar incident. All accidents and near misses must be reported to an immediate supervisor as soon as possible.

IV. BUDGET

The superintendent, or designee, shall be responsible to provide for periodic school board review and approval of the various plan requirements of the health and safety program, including current plan requirements and related written plans and procedures and recommendations for additional plan requirements proposed to be adopted. The superintendent, or such other school official as designated by the superintendent, each year shall prepare preliminary revenue and expenditure budgets for the school district's health and safety program. The preliminary budgets shall be accompanied by such written commentary as may be necessary for them to be clearly understood by the members of the school board and the public. The school board shall review the projected revenues and expenditures for this program and make such adjustments within the expenditure budget to carry out the current program and to implement new recommendations within the revenues projected and appropriated for this purpose. No funds may be expended for the health and safety program in any school year prior to the adoption of the budget document authorizing that expenditure for that year, or prior to the adoption of an amendment to that budget document by the school board to authorize that

expenditure for that year. The health and safety program shall be implemented, conducted, and administered within the fiscal restraints of the budget so adopted.

V. ENFORCEMENT

Enforcement of this policy is necessary for the goals of the school district's health and safety program to be achieved. Within applicable budget limitations, school district employees will be trained and receive periodic reviews of safety practices and procedures, focusing on areas that directly affect the employees' job duties. Employees shall participate in practice drills. Willful violations of safe work practices may result in disciplinary action in accordance with applicable school district policies.
