RE: Stormwater Board Resolution
April 2026 Permit Application

Dear Mr. Curran:

In 2023, the Michigan Department of Environment, Great Lakes, and Energy (EGLE) issued individual permit number MI0060055 for the authorization to discharge water through the district's municipal separate storm sewer system (MS4) to waters of the state. To retain the authorization to discharge, Southfield Public Schools must submit a new application by April 1, 2026.

To fulfill the application requirements, the permittee must submit the following:

1. An ordinance or regulatory mechanism that prohibits non-stormwater discharges into the applicant's MS4.
2. An ordinance or other regulatory mechanism to address post-construction stormwater runoff from new development and redevelopment projects, including preventing or minimizing water quality impacts.

To meet the ordinance requirements of the permit, the Michigan Department of Environment, Great Lakes, and Energy (EGLE) will accept a Stormwater Board Resolution in its place. An approved Stormwater Board Resolution is required for permit renewal/application.

Please have the school board review the Stormwater Board Resolution and return the passed resolution to Arch Environmental Group for submission to EGLE.

Sincerely,

Arch Environmental Group, Inc.
