

Minidoka County School District
Technology Dept Report
April 18, 2016

District WAN

- The request for proposal on the WAN is underway. I will receive results on April 28th. Most likely we will continue with PMTs current contract. I am following the rules of eRate for this request.

Labs/Testing

- We are right in the middle of ISAT testing at all the schools.

Camera at Minico Intersection

- The camera for Minico's intersection has been installed.

East Minico Phones

- East has their new phone system installed.

Cell Phone Internal Signal

- It has been a longer than expected process, but It shouldn't be long now. We have passed almost all Verizon's verification process. The equipment is in stock and will be installed as soon as Verizon approves our plan. We only plan on installing at Minico first.
