Re: Third Quarter Financial Report

Revenues and Expenses should be at 75\% of budgeted amounts.

## Revenues

Revenue received is at $50.6 \%$. The percentage is lower than projected because of lagging State payments. Because of tax dollars received in the first half of the year, the percentage received is usually over $50 \%$, this begins to lag behind in the $3^{\text {rd }}$ quarter with early tax dollars received in May and June. Local funds are trending at $50 \%$. State revenue is at $43.4 \%$, trending low because the second and third quarter payments have not been received. Federal revenue is at $64.8 \%$; Special Education funding is lagging at $44.4 \%$. Property taxes collected is at $99.8 \%$ with the last tax payment released in November. The remaining $.2 \%$ is refunding and abatements issued.

As of March $30^{\text {th }}$, the State had made one payment for cross categoricals. General State Aid has been received on time. This is a shortfall in revenue of $\$ 723,736$.

## Expenses

Expenses are at $66.5 \%$, slightly lower than the $75 \%$.

Salaries and benefits are trending lower because summer payrolls for July and August are accrued back to June. Purchased services and other (debt service payments) are on target. Supplies are trending down but should pick up with the $4^{\text {th }}$ quarter as supplies are ordered for next school year in May. Capital outlay is at $90.4 \%$ because most projects have been completed for this school year.
