DATE: February 22, 2021

SUBJECT: Board Presentation - School Counseling Programs

The Weber School District Student Services Department supports children in academic, social, emotional and physical growth. Team members promote school counseling, offer programs for at-risk students, coordinate foreign student enrollment, direct comprehensive guidance activities, assist with substance abuse and violence prevention programs, provide school nursing services and coordinate home and hospital instruction. Further, they are responsible for crisis management support and related student support groups.

Karla Porter, Director of Student Services, and the Student Services Team will present an overview of the school counseling programs in Weber School District. They will share information about who our school counselors are, what they do and how data is used to provide a comprehensive, systemic framework which promotes the whole child and supports improved student outcomes.

Karla will introduce the presentation.
