Mr. Turner,
Region 9, Food Service advisor, Travis Neville suggests we increase our adult meal prices so that we don't get a finding for undercharging for the upcoming school year.
[17-18 School year](#)
Adult meals: \$3.70 lunch (25 cent increase), \$2.20 breakfast (25 cent increase)
Currently: \$3.45 lunch and \$1.95 breakfast
Lynn will need to know what we will charge so it can be listed on next year's application.
Here's the email below from Travis if you need information to present to the board.
Thanks,
Jana

Subject: Adult Meal Prices

All,

To calculate your adult meal prices, you need to pull numbers from a couple of different places to determine compliance. In fact, attached you will find 3 pages from Chapter 15 of the ARM that detail the requirements for adult meal pricing. Also, attached you will find the Adult Meal Worksheet. However, for the 17-18 school year, some of those figures are not yet available.

What I do know is that for this year 16-17, you should be charging at least \$2.04 or more for adult breakfasts, and \$3.56 or more for adult lunches.

My advice to you is that you should at least plan to get above those thresholds from 16-17 for the 17-18 school year.

When all figures are available in the future to determine adult meal prices, could they be above \$3.56 for lunch and \$2.04 for breakfast for 17-18? They could be.

What should I raise my adult prices to for 17-18? It is a guess, but maybe a safe area would be at least \$2.20 or more for adult breakfasts, and \$3.70 or more for adult lunches for the 17-18 school year.

Please let me know if you have questions or concerns.

Take care,
Travis

Adult Meal Calculator Worksheet

This worksheet provides the information needed to calculate adult meal prices using both approved methods. Choose the method of calculation (see the *Administrator's Reference Manual, Section 15, Meal Pricing* for additional information on which method to use). If the rate applies, record the rate in the *Amount CE Receives* cell. If using Method 1, record the local student paid charge in the designated *Local Student Paid Charge* cell. If using Excel, this worksheet will automatically calculate the amounts in the *Minimum Adult Charge* and *Total Federal Funds* cells. All amounts are carried to 4 digits and must be rounded up when determining the adult meal price. Non-pricing programs must always use Method 2.
