# **Growth of students receiving intervention support.**

Massive growth has been seen in both reading and math for students who are receiving additional support from our intervention staff! The majority of these students are experiencing growth well above the national average.

Great job intervention team!

# Takeaways

- Math is going great - We expect it to get even better as staff and students continue to learn the new math program
- Staff has done a great job piecing together curriculum for some time to meet the needs of our students
- Staff need updated tools (curriculum) to meet the adoption/implementation of the latest state ELA standards and the needs of all students.
- Continue to train staff in best reading instruction practices
- Next year focus on implementing and reflecting on what we have learned through thoughtful planning and collaboration
