

Investment Report FY26 Quarter 2

January 2026 Regular School Board Meeting

Shannon Baird, Finance Director

AMLIP Series I

- Realized \$16,472.54 in revenue during quarter two of FY26.

AMLIP Series II

- Realized \$2.73 in revenue during quarter one of FY26.
- Additionally had an unrealized gain on investment of \$5,321.70 in quarter two of FY26.
- Total value increase of \$5,324.43

Please see attached

FY26 Q1 & Q2 - Overview

- Our interest rates are decreasing compared to a year ago. See the AMLIP quarterly newsletter attached for details, investment fund recaps, and a 5-Year Money Market Comparison.
- The District invested another \$1,000,000.00 into its AMLIP Series 1 investment account on July 30, 2025. Even though our rates are down, our total investment revenue for quarter one is up from a year ago. This is because we invested more capital in quarter one.
- We will be investing more from other funds in Q3 to maximize our capital.

Yearly interest revenue comparison

	FY2024	FY2025	FY2026
Q1	\$260.30	\$15,005.34	\$16,191.69
Q2	\$260.36	\$13,432.53	\$21,796.97
Q3	\$219.92	\$11,993.84	
Q4	\$12,125.64	\$12,303.11	
TOTAL	\$12,866.22	\$52,734.82	\$37,988.66

Looking Ahead...

We anticipate the district will increase earnings from FY25 to FY26, even if our rates continue to decline a moderate amount. This is because we will be investing more of our cash on hand. This requires us to move capital in and out of our investments as needed to meet the fluctuating cash activity in our checking account throughout each month and the year.

Quarterly Letter to Members

Steady at the Helm: A Fourth-Quarter Perspective on Cash and Confidence

Publication produced by KeyBank Institutional Advisors

Key Takeaways

- The Federal Open Market Committee delivered three rate cuts totaling 75 basis points during the quarter, bringing the target range to 3.50%–3.75%.
- Money-market yields remained attractive, with short-term investments continuing to generate income while preserving liquidity.
- Market conditions remained orderly, supported by stable Treasury issuance and ample liquidity.
- The outlook favors patience, as yields remain well above pre-pandemic norms despite modest easing.

The fourth quarter of 2025 underscored an essential truth: stability is not achieved by reacting quickly, but by remaining disciplined when conditions change.

From October through December, financial markets focused squarely on the direction of monetary policy. Over the course of the quarter, the Federal Reserve implemented three rate cuts totaling 75 basis points, lowering the federal funds target range to 3.50%–3.75% by year-end. While the cumulative move was meaningful, the message accompanying it was deliberately cautious.

Chair Jerome Powell emphasized that these adjustments should not be interpreted as a return to highly accommodative policy. Inflation had moderated meaningfully, but economic growth remained resilient and labor markets tight. As a result, the Federal Reserve characterized the quarter's actions as a recalibration toward neutral rather than the start of an open-ended easing cycle.

Despite the cumulative rate cuts, money-market yields remained attractive throughout the quarter, particularly relative to long-term historical norms. Overnight and short-duration instruments continued to generate meaningful income while maintaining a high degree of liquidity. Funding markets remained orderly, supported by the Fed's administered rates, standing liquidity facilities, and a steady pace of Treasury issuance consistent with regular financing needs.

This environment rewarded conservative portfolio structures. Diversification, disciplined maturity ladders, and a continued emphasis on liquidity helped portfolios remain resilient during a period of policy transition. Rather than reacting to headlines or attempting to anticipate the precise timing of future rate moves, effective cash strategies remained focused on preserving principal, ensuring liquidity, and capturing income at the front end of the yield curve.

Looking ahead to 2026, the outlook suggests cautious optimism rather than urgency. While additional rate cuts remain possible, the Federal Reserve has been clear that future moves will be gradual and data dependent. Even so, yields remain well above pre-pandemic levels, continuing to offer a compelling combination of income and stability.

In an environment defined by uncertainty and shifting expectations, the fourth quarter of 2025 reinforced a familiar lesson: effective cash management is not about timing the market. It is about structure, discipline, and consistency.
