

COMMUNITY PETITION FROM THE NEWHALEN SCHOOL LSAC

*Estimated cost of \$121,500 (with USDA funding) or
\$207,000 without USDA funding lunch program*

As a resident of the Lake and Peninsula School District, we reject the options that have been presented by the Lake and Peninsula School District Office. We are staunch believers in the importance of nutritious meals for students. Our students are the future of this community and every child deserves consistent access to healthy food to fuel their minds and bodies.

Access to nutritious meals in schools has long been associated with improved health outcomes and higher academic performance. According to the CDC, students who consume a healthy diet are likely to have better grades and attendance and are less likely to develop chronic illnesses later in life. We need to prioritize this for the children in our community.

However, the current funding allocated for student school lunch in our area is insufficient, which compromises the nutritional value of the meals that our students receive. This is detrimental to their health and academic performance. We need our decision makers to take action and find better solutions for funding of student lunches.

This is a pressing concern for every parent, teacher, and community member in the Newhalen and Iliamna communities. It is our collective responsibility to ensure that our students have the nutrition they need to blossom into healthy, intelligent, and productive members of society.

I am signing this petition to provide funding for our students' school lunches.
