

**Board Report**  
Debbie Pfeifer  
Federal Programs Director  
February 5, 2014

**Federal Programs Monitoring**

While we are not scheduled for an onsite monitoring visit this year, we are required to submit an assessment of our program. This 34 page document contains a series of “yes” and “no” questions and suggestions of documentation we should have in place. This document will help us in preparation of next year’s onsite visit by allowing us to pinpoint and work on any areas where we are out of compliance. We hope to have this assessment completed and submitted within the next couple weeks.

**Reallocated Funds Application**

Our application to the SDE for reallocated funds to provide Homedale Middle School students with the AVID College Readiness System has been approved. We requested \$18,116 and were awarded the full amount. The Middle School can now arrange training and purchase materials.

**January 17 Professional Development Day**

For last month’s professional development day we asked for teachers to volunteer to present sessions. We had great feedback from those attending the sessions and look forward to using the same format again next year. A big thank you to those Homedale staff members who presented:
