TECHNOLOGY REPORT

For the September 2018 School Board Meeting

We had a good start to school with respect to technology. For the first time, the student chromebooks at the high school were passed out the Thursday and Friday prior to start of school. We will be doing this in future school years as it was quite successful and let to better start on Monday. We had a Google trainer from ESC 9 come and provide Google staff development training on Aug. 14th. With the changes to Google Classroom, it was beneficial to our teachers to have it and I look forward to future trainings from ESC9 to our staff. Our district wifi software was upgraded over the Labor Day weekend to the current version of that software and Windows updates installed on our servers. iOS 11.4.1 and OSX 10.13.6 have been released for Apple devices. Google Chromebook OS version 68 has been released and pushed out to the student chromebooks as well.
