

Elizabeth Ide Elementary School

March 2025 Board Report

Goal One – Learning

Spring conferences took place the first week in March and served as a vital opportunity for teachers to share progress monitoring updates with families and address any questions or concerns regarding student progress. One of the goals of conferences is to foster meaningful conversations between educators and families, promoting a strong partnership in supporting each student's academic and personal growth. Panorama surveys were sent home to families prior to the conferences, providing insights into student engagement, well-being, and other important aspects of their child's strengths at school. Teachers were able to review these results with families, clarify any data points, and ensure that parents and guardians feel fully informed and supported. We are confident that the combination of progress updates and Panorama results review empowered families to make informed decisions and work collaboratively with our teaching staff.

Goal Two – Whole Student

We are always looking for new opportunities to engage our youngest students in meaningful before- and after-school activities that support their growth and development. Over the course of the year, our 1st and 2nd graders have had the wonderful opportunity to join Mr. K and Mr. Pitassi before school for intramural basketball and floor hockey. Whether they came every morning or as often as they could, this program has been a fun and engaging way for students to start their day. Intramurals have provided countless benefits for our Lions. Not only did they get active and improve their coordination, but they also had the chance to develop teamwork, sportsmanship, and problem-solving skills in a positive and supportive environment. A big thank you to Mr. K for leading this program and to all the students who participated.

Goal Three –Environment

Our most recent SIP (School Improvement Plan) day was a valuable opportunity to continue developing our professional understanding and alignment with the CBE framework. During the day, our teachers reviewed competencies at each grade level and collaborated on creating rubrics that support our Goal 1 work. We appreciate how our district leadership consistently creates and provides opportunities that support our efforts and help us advance both Goal 1 and Goal 2 initiatives. These ongoing professional development experiences are essential to ensuring we provide the best learning experiences for our students, and we look forward to the continued growth and progress we'll make together.

Thank you for your unwavering support.
