

## **Board Report for February 9, 2015**

### **Maintenance:**

Janet has been working on lights at the Middle School. I've been trying to keep the heat going and work on work orders as I can. Janet is also working on work orders when she isn't fixing lights. We are struggling a little, but trying our best.

### **Transportation:**

Buses have about wore me out, but I think we are about to climb out of the slump. BB-2 went down and now is back with us. I have visited with Warren Cat about it and I will let you know what happened. The handicap bus is fixed. I am trying to fix the heater on the VanHool and the door so we can use it. Almost have everything running again. Tammy Whiteley started driving route bus last Wednesday so Janet can be on site to work or to fill in on a route when needed. This is going to help a lot. Janet has helped me by keeping vehicles clean so I can focus on repairs.

### **Other:**

Please be patient with us. We are working as fast as we can to accomplish as much as we can. We still need one more person, but we are trying to hold our own.
