RE: New Tech High @ Coppell Recruitment Process

New Tech High @ Coppell has reviewed the current recruitment process, and is requesting an updated process for the 2015-2016 freshman class. The current recruitment process requires perspective parents to attend two informational meetings, submit a learner application, and participate in one of the three enrollment processes. The three current enrollment processes are the legacy learner enrollment process, the first come campout, and the lottery system.

In reviewing the effectiveness of the recruitment process, two modifications are being reviewed. The updated process would include the removal of the campout, and replacing the manually operated lottery system with an electronic random generator. Any decision made on modifications to the recruitment process will be communicated with perspective parents prior to the first NTH@C information meeting on January 27, 2015.

Recommendations: Approve removing the first come campout process for NTH@C 2015-2016 recruitment.

Approve replacing the manual lottery system with an automated randomized generator for the lottery portion of the NTH@C enrollment process.
