

Dina,

We are applying for a “responsive grant” from the Valley Community Foundation. We are requesting support for a project (yet to be named) with the goal of improving outcomes for students with chronic health conditions.

As it turns out, I don’t think I’ll need a formal letter of support for this application, as there is no way to attach letters to it. I will just need to know, for my own records, that the school district will participate if the project is funded.

Let me know if you need anything else!
