

Parent & Community Outreach Program

January 2018

Child Care -

This month the children will learn about the color white and an oval shape. The number they will learn this month is 5. The letters for the month are L, M, N. The children will learn about big & small objects and the theme topic is Exploring Animals. The staff will begin several early childhood trainings in the evenings and during lunch periods to complete required trainings. The child care license with the State of Montana expired on November 30th and was pending a background clearance and staff needing more training hours completed. This issue will be cleared up by the end of January.

We have lost three of the four part time child care aides and will need to re-advertise and hire them.
