TECHNOLOGY REPORT

For the December 2018 School Board Meeting

I would like to say a heartfelt thank you for the generous gift given by our board before the Thanksgiving break. The QISD Technology director responded to 32 calls for assistance since the November 2018 board meeting. Several students utilized their chromebooks for the December End of Course STAAR re-testing which took place December 3rd through 5th. The 3rd-8th grade UIL spelling tests were given using our computers on December 3rd. District social media continues to have positive growth with over 17,824 page views to the district Facebook page for the month. Our number of video views reached almost 7,000, a 49% increase over the previous month. Thanks to our coaches, teachers and administrators who make regular posts to our social media. Over the Thanksgiving break, I installed firmware updates to our VOIP telephone system as well as installed monthly software patches for our district wireless access points, firewall, network switches and to our iMac computer labs have been installed. iOS 12.1.1 and OSX 10.14.2 have been released for Apple devices. Google Chromebook OS version 70 has been released and pushed out to the student chromebooks.
