

ANN GIDNER metal sculpture idea: "Eagle has Landed".

October 10, 2025

"Eagle has Landed" is a metal sculpture created in steel, stainless steel, and brass. I suggest a rock to be added for a more natural effect.

Material: Steel, Stainless Steel, Brass and Rock.

Size: About 9-foot Ht. x 7-foot W. The sculptor has the right to vary size due to securing the Eagle.

Finish: Steel would be patina in natural tones. Stainless steel and brass will be polished.
