Dear Angie,

I'm reaching out for your feedback regarding the Michigan Electric Transmission Company, LLC (METC) intent to construct new electric transmission lines. The potential transmission lines are part of the Midcontinent Independent System Operator (MISO) Long Range Transmission Planning (LRTP) Tranche 2.1 Project 32, Ludington – Denver (Copperton) – Tittabawassee & Nelson Road Project (Copperton Projects).

Following the initial introduction and information request for the Copperton – Nelson Road Project, METC has revised the Copperton – Nelson Road preliminary project area. In addition to previously identified portions of Midland, Gratiot, Isabella, and Montcalm counties, the updated area now includes the northern sections of Bethany and Wheeler Townships in Gratiot County, and the western portion of Homer Township in Midland County. We are evaluating these newly added areas alongside other routing opportunities within the overall preliminary project area.

A print copy of the updated introduction letter containing project details, feedback related topics, a map of the updated preliminary project area, and a request for feedback in connection with the Copperton to Nelson Road Project is being sent to you by mail. I have also attached copies to this email for your convenience.

We would appreciate any feedback by July 31, 2026.

Sincerely,

Celia Metiva
