Table 2. This table shows the percentage of the student body that participates in each activity. This is a more accurate depiction of the status of our participation levels in our spring activities. Various trends can be seen with rises and dips in participation between the various activities. There is a steady decline developing in our spring activities participation over the last 5 years. Various factors could be contributing to this decline, however, determining which factor plays the biggest role would be an assumption and only speculation.

Thank You,
Eric Inglis
