Re: Stormwater Management Plan Discussion

We would like to discuss the School District's Stormwater Management Plan at the next Committee of the Whole meeting on Monday, November 7, 2022.

Livonia Public Schools is a part of the Detroit metropolitan area that discharges stormwater through a separate storm sewer system. The Michigan Department of Environmental Quality (MDEQ) administers storm water regulations and maintains oversight and regulatory authority of the systems. The MDEQ requires school districts (and other governmental agencies) to obtain permits for storm water discharge. As part of the permit process, the District maintains a Storm Water Management Program Plan (SWMP). We work with Arch Environmental to maintain an up-to-date plan and to renew our permit with MDEQ every five years.

The District is dedicated to good environmental practices and we continue to work with MDEQ to improve and update our practices and continue to educate the Livonia Public Schools community.

As part of our good practices and requirements of MDEQ, we would ask the Board of Education to adopt a resolution in support of the District's stormwater management plan (draft copy attached). As always, please let me know if there are any additional questions.
