4. Enrichment/Intervention day - This day was to help struggling students catch up and for those that have been working hard to experience other educational activities that we do not typically offer. The day went very well and the engagement was exciting. The efforts of the staff was amazing as our ineligibility lists shows some signs of the extra help that students received. The site team (you can review notes below) will be working out some further strategies that will make the day even better for our staff and students. Some other ideas on educational learning will also come into play.
