Background

On October 14, 2025, we presented the proposed school boundary changes to the Board of Education, designed to manage significant enrollment growth proactively. The district's current enrollment is 20,091 students. This growth is primarily driven by 27 new housing developments, which are projected to add approximately 4,166 new students over the next decade. The proposed adjustments aim to align with the district's strategic goals of engaging stakeholders and utilizing resources in an equitable and efficient manner.

The primary proposal was presented to address the most immediate needs. The proposal adjusts the boundary between Hampshire High School (HHS) and Jacobs High School (JHS). Projections indicate that HHS will exceed its capacity within four years, whereas JHS has available space to accommodate more students.

The Board of Education is scheduled to vote on the proposal at the November 18, 2025, meeting. If approved, the district will notify all affected families, hold community meetings, and implement the changes for the 2026-2027 school year.

Administrative Recommendation

We recommend approval of the adjusted boundary changes for Jacobs High School and Hampshire High School as presented on October 14, 2025.
