Estimate details

Estimate no.: 1007
Estimate date: 05/22/2024

#	Product or service	Description	Qty	Rate	Amount
1.	Services	Browning High School Gymnasium Metal Roof Repair - Labor and materials for patching leaks on metal roof using the same or similar material currently on the seams.	1	\$10,000.00	\$10,000.00

Total **\$10,000.00**

Note to customer

(To repair this roof correctly at least 16 metal roof panels will need to be replaced. I am unable to give an accurate estimate due to the unforeseen underlayment or system in which the roof was originally installed and I would have to charge as time and material where material alone would cost upwards of \$50,000)

The above estimate is for a temporary patch which could keep the roof leak free for an unspecified amount of time.

30+ years commercial and residential roof experience
