

March Maintenance Board Report

With the help of our baseball players and coaches, the grounds crew has successfully completed preparation of the baseball field for the upcoming season. In addition, the track and softball areas have been prepared and are ready for use also.

Maintenance staff have continued work on our leased land to ensure everything is prepared for the upcoming inspection, as mentioned in the previous report. We are on schedule and will be ready for the inspection date of March 31st.

Water service has been restored at all locations to support irrigation systems and the high school greenhouse. Preparations are also underway for warmer weather, including the start of our deep cleaning process for the high school cooling tower to ensure it operates without issues.

Maintenance and grounds crews have completed approximately 150 work orders this month, not including in person requests.

Most importantly, this month we celebrated Classified Appreciation Week. We are truly thankful for all of our classified staff!
