SUPPORT SYSTEMS AT BABB

I wanted to take some time this report to discuss the support systems in place at Babb that helps us provide an equitable education to the students. Our library services are provided by BES & Napi librarians. Our counseling services are provided by BHS counselor Jack Parrent. The maintenance department provides the needed services to help keep the building operational. These departments in addition to the previously mentioned SpEd, BNAS, and athletic departments provide the Babb school with everything needed to operate successfully. I want to point this out to say thank you as well to these outside departments for working with us to make this possible. Thank you very much.
