Ever Use THC Vaping Devices	*	13.7% (119)

# Summary

- Results are lower than the latest national average in most areas.
- Data showed that we are higher in vaping than that of the nation (when considering 2015-2017 national data).
  - 13.7% THC, and 14.9 % are indicators that we need to do some work in this area.
- Internal task force has been created to investigate possible responses and deterrents.
  - Increased supervision
  - Products like vape detectors for restrooms
  - BHS Drug and alcohol awareness fair
