

Assistant Superintendent Report: Science Curriculum Renewal/Adoption

Morrow County School District is currently in the process of completing our Science curriculum renewal/adoption for K-12 Science. We have created a committee of teachers and administrators from various grade levels and schools within the district to support us in our Science adoption.

Please review the PDF document I have attached as it gives you an overview of what has taken place; What our staff is indicating they would like and need during this adoption and what is our initial implementation plan for professional development and curriculum implementation.

Feel free to contact me or ask me questions as necessary.
