### **Coffee & Connection**

The next Coffee and Connection is February 6, 2026 at 9:00 am.

### **Class of 2030 Open House**

The Class of 2030 Open House was January 14, 2026. It was great to welcome the Class of 2030.

### **Community Development**

The two big industrial developments are moving forward. The Canadian National intermodal facility has broken ground. The Equinix data center has put up the construction fence around the entire site. Phase II of Town Center and the Lennar development on Siel Road in Shorewood is progressing. We were notified this month that D.R. Horton is going to start Phase II of Neustoneshire. That development will be 127 single-family detached homes.

### **Construction Update**

The South Campus fieldhouse is progressing nicely. The Mondo flooring is currently being warehoused in Itasca. The mild weather of late has helped the progress of the CTE addition. The asbestos abatement over Winter Break in the existing CTE area went very well.

### **Badminton Survey**

The Athletic Department sent out a survey to our female students to gauge interest in adding this sport to our spring sports offerings. As of January 13th, there have been 106 responses. 57 students said they would be interested in playing badminton, 44 students said maybe they would play, and 5 students said they wouldn't play.
