1) State testing: WKCE Data
   -Next years tests: WKCE, Smarter Balanced, Aspire, ACT
   -October to October
   -What it is useful for? Comparing our schools trends to other schools trends: over time
   -What it is not useful for? Comparing a grade levels performance over time, tracking a group of students over time, looking at an individual students performance, doesn't track summer learning loss, does not break scores down into sub categories (why are our students scoring the way they are?), tracking performance in grades 4K-2, 9, 11-12.
   -WISEdash
   -The data

2) Universal Instruction Progress Monitoring: MAP Data
   -Elementary Spring 2013
   -Fall 2013, Winter 2014, Spring 2014
   -What is it useful for? Looking at the performance of a grade level over time, tracking a group of students performance over time, looking at individual students performance over time. Setting goals for individual growth. Setting goals as a classroom teacher and as a parent. Comparing Tomahawk's performance to national norms. Breaks test into subcategories, pretty intensively identifies issues of strength and weakness for a grade level, a class, even a student
   -What is it not useful for? Comparing to local schools, intensive progress monitoring, HS testing
   -The data

3) More intensive progress monitoring tools: Aimsweb District wide in certain subject areas, F+P-reading assessment, Elementary and Middle School

4) Other assessments we will track next year, and will have available for the board: SRI-Lexile (9-11), PALS (K-2)
