Re: Chapter 313 Application for Appraised Value Limitation on Qualified Property for *1PointFive P1, LLC*

Dear Dr. Muri:

On behalf of our client, *1PointFive P1*, *LLC* and its joint venture partners we are pleased to submit for your consideration the enclosed Form 50-296-A application for their proposed project, direct air capture facilities that would manufacture industrial-grade carbon dioxide gas and be located in Ector County Independent School District.

Pursuant to our evaluation of Texas and the target site in Ector County for the proposed project, we respectfully request your support of our completed series of applications, as well as your subsequent submittal of the applications to the Texas Comptroller's Office for its formal review and certification.

We look forward to working with you and the Comptroller toward a final investment decision for this project. If you have any questions, please don't hesitate to reach me at (512) 671-5575.

Sincerely,

Michael Lateur Managing Director Property Tax | SSIA

Tab 1

Application

Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Texas Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- · provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the completed application to the Comptroller, separating each section of the documents. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, and has determined that all assertions of confidentiality are appropriate, the Comptroller will publish all submitted non-confidential application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller's rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project and issue a certificate for a limitation on appraised value to the school board regarding the application by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete by the Comptroller), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at comptroller.texas.gov/economy/local/ch313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

replace existing buildings or existing improvements inside or outside the project area?

Yes

V No

SECTION 12: Texas Tax Code 313.021(2) Qualified Property (continued)

2. Is the land upon which the new buildings or new improvements will be built part of the qualified property described by §313.021(2)(A)?

2a. If yes, attach complete documentation including:

- a. legal description of the land (Tab 9);
 - b. each existing appraisal parcel number of the land on which the new improvements will be constructed, regardless of whether or not all of the land described in the current parcel will become qualified property (Tab 9);
 - c. owner (Tab 9);
 - d. the current taxable value of the land, attach estimate if land is part of larger parcel (Tab 9); and
 - e. a detailed map showing the location of the land with vicinity map (Tab 11).
- 3. Is the land on which you propose new construction or new improvements currently located in an area designated as a reinvestment zone under Tax Code Chapter 311 or 312 or as an enterprise zone under Government Code Chapter 2303?
 - 3a. If yes, attach the applicable supporting documentation:
 - a. evidence that the area qualifies as an enterprise zone as defined by the Governor's Office (Tab 16);
 - b. legal description of reinvestment zone (Tab 16);
 - c. order, resolution or ordinance establishing the reinvestment zone (Tab 16);
 - d. guidelines and criteria for creating the zone (Tab 16); and
 - e. a map of the reinvestment zone or enterprise zone boundaries with vicinity map (Tab 11)
 - 3b. If no, submit detailed description of proposed reinvestment zone or enterprise zone with a map indicating the boundaries of the zone on which you propose new construction or new improvements to the Comptroller's office within 30 days of the application date.

What is the anticipated date on which you will submit final proof of a reinvestment zone or enterprise zone?

erprise zone?

SECTION 13: Information on Property Not Eligible to Become Qualified Property

- In Tab 10, attach a specific and detailed description of all existing property within the project boundary. This includes buildings and improvements
 existing as of the application review start date (the date the application is determined to be complete by the Comptroller). The description must provide
 sufficient detail to locate all existing property on the land that will be subject to the agreement and distinguish existing property from future proposed
 property.
- 2. In Tab 10, attach a specific and detailed description of all proposed new property within the project boundary that will not become new improvements as defined by TAC 9.1051. This includes proposed property that: functionally replaces existing or demolished/removed property; is used to maintain, refurbish, renovate, modify or upgrade existing property; or is affixed to existing property; or is otherwise ineligible to become qualified property. The description must provide sufficient detail to distinguish existing property (statement 1) and all proposed new property that cannot become qualified property from proposed qualified property that will be subject to the agreement (as described in Section 12 of this application).
- 3. For the property not eligible to become qualified property within the project boundary in response to statements 1 and 2 of this section, provide the following supporting information in **Tab 10**:
 - a. maps and/or detailed site plan;
 - b. surveys;
 - c. appraisal district values and parcel numbers;
 - d. inventory lists;
 - e. existing and proposed property lists;
 - f. model and serial numbers of existing property; or
 - g. other information of sufficient detail and description.
- 5. In **Tab 10**, include an appraisal value by the CAD of all the buildings and improvements existing as of a date within 15 days of the date the application is received by the school district.

Note: Investment for the property listed in statement 2 may count towards qualified investment in Column C of Schedules A-1 and A-2, if it meets the requirements of 313.021(1). Such property <u>cannot</u> become qualified property on Schedule B.

S	SECTION 14: Wage and Employment Information	
1.	What is the number of new qualifying jobs you are committing to create?	25
2.	What is the number of new non-qualifying jobs you are estimating you will create? (See TAC 9.1051(14))	0
3.	Do you intend to request that the governing body waive the minimum new qualifying job creation requirement, as provided under Tax Code §313.025(f-1)?	Yes 🖌 No
	3a. If yes, attach evidence of industry standard in Tab 12 documenting that the new qualifying job creation requirement abo of employees necessary for the operation, according to industry standards.	ve exceeds the number
4.	Attach in Tab 13 the four most recent quarters of data for each wage calculation below, including documentation from the Texa Commission website. The final actual statutory minimum annual wage requirement for the applicant for each qualifying job — w from this estimate — will be based on information available at the time of the application review start date (date of a completed §9.1051(21) and (22). Note : If a more recent quarter of information becomes available before the application is deemed comp information will be required.	which may differ slightly application). See TAC
	 a. Non-qualified job wages - average weekly wage for all jobs (all industries) in the county is 	\$ 1,153.75
	 b. Qualifying job wage minimum option §313.021(5)(A) -110% of the average weekly wage for manufacturing jobs in the county is 	\$ 1,617.00
	 c. Qualifying job wage minimum option §313.021(5)(B) -110% of the average weekly wage for manufacturing jobs in the region is 	\$ 993.08
5.	Which Tax Code section are you using to estimate the qualifying job wage standard required for this project? §313.021(5)(A)	or 🖌 §313.021(5)(B)
6.	What is the minimum required annual wage for each qualifying job based on the qualified property?	\$ 51,640.16
7.	What is the annual wage you are committing to pay for each of the new qualifying jobs you create on the qualified property?	\$ 51,640.16
8.	Will the qualifying jobs meet all minimum requirements set out in Tax Code §313.021(3)?	Yes No
9.	Do you intend to satisfy the minimum qualifying job requirement through a determination of cumulative economic benefits to the state as provided by §313.021(3)(F)?	Yes 🖌 No
	9a. If yes, attach in Tab 13 supporting documentation from the TWC, pursuant to §313.021(3)(F).	
10	D. Do you intend to rely on the project being part of a single unified project, as allowed in §313.024(d-2), in meeting the qualifying job requirements?	Yes 🖌 No
	10a. If yes, attach in Tab 6 supporting documentation including a list of qualifying jobs in the other school district(s).	

SECTION 15: Economic Impact

- 1. Complete and attach Schedules A1, A2, B, and C in **Tab 14**. Note: Excel spreadsheet versions of schedules are available for download and printing at URL listed below.
- 2. Attach an Economic Impact Analysis, if supplied by an entity other than the Comptroller's office, in Tab 15. (not required)
- 3. If there are any other payments made in the state or economic information that you believe should be included in the economic analysis, attach a separate schedule showing the amount for each year affected, including an explanation, in **Tab 15**.

Detailed Description of the Project

Occidental Petroleum (Oxy), a leading producer of traditional energy resources, and its subsidiary Oxy Low Carbon Ventures (OLCV) have formed a joint venture with private equity firm Rusheen Capital Management to finance and deploy large-scale Direct Air Capture (DAC) technology licensed from Carbon Engineering, a clean energy company focused on the commercialization of DAC technology, which captures carbon dioxide directly from the atmosphere.

The purpose of the joint venture, named 1PointFive, will be to further OLCV's commitment to reducing the amount of carbon dioxide in the atmosphere by advancing and accelerating carbon capture, utilization, and storage (CCUS) technologies and projects around the world. The significance of the name 1PointFive is the joint venture's mission to achieve climate stabilization and limit global warming to 1.5°C (of which DAC technology is a critical component). Oxy and OLCV will be providing significant financial, operational, and engineering resources to 1PointFive.

As the combined corporate entity for OLCV and its partners' proposed investment, 1PointFive is planning the development of a series of DAC facilities that would produce industrial-grade carbon dioxide gas (CO₂) for its own use, as well as the use of other potential off-takers with similar commercial applications. The DAC facilities will be built in or near one of several United States energy basins in which Oxy operates, within reasonable proximity to its existing enhanced oil recovery (EOR) operations, accessible pipeline infrastructure, and sufficient electric, natural gas, and water utilities.

It is contemplated that the proposed DAC facilities (the Project) would comprise up to six (6) separate builds, each of which will be the subject of its own application, submitted as a part of a series of applications related to the same project. Should all six builds be constructed, they would be capable of capturing and permanently sequestering approximately 26 million tons per annum (Mtpa) of atmospheric CO2. This application pertains to the sixth of these six proposed builds ("Build 6"). The proposed Build 6 project would capture and permanently sequester approximately 5 million tons per annum (Mtpa) of atmospheric CO2.

The Project combines the operational expertise of Oxy and OLCV, and the innovative technology of Carbon Engineering to capture and permanently remove carbon dioxide directly from the atmosphere. The highquality CO_2 product manufactured by the DAC facilities would be used as industrial gas feedstock by Oxy in their traditional energy production process, specifically through downhole injection at their existing EOR sites, to permanently sequester high volumes of carbon dioxide in underground geological storage. Carbon Engineering's proprietary DAC technology is specifically designed to be deployed at a much larger scale than other DAC designs currently operating and demonstrates a significant advantage over less costcompetitive DAC technology developers and facilities.

The proven DAC technology used by the Project would manufacture a continuous stream of high-quality carbon dioxide gas through the process of heating, treating, and compressing atmospheric air using only carbon-free renewable electricity, natural gas, and water as system inputs. Using large fans to draw in ambient air, the system would use two principal chemical loops and industrial processing units to extract and purify the carbon dioxide components of the air input. The DAC system's two chemical loops are a

caustic carbon dioxide capture loop and a solids carbon dioxide purification loop, operated by the carbon dioxide capture and caustic recovery equipment. The closed loop design effectively diminishes the need for material removal and make-up, as the products of each reaction become a reagent for another reaction within the DAC process. The major output streams of the DAC system are compressed CO_2 (for utilization) and CO_2 -depleted air (discharged into the surrounding atmosphere).

There are four major process components associated with the proposed DAC facilities:

- Air Contactors
- Pellet Reactors
- Pellet Calciners
- Slakers/Hydrators

Eligible ancillary and necessary equipment would include the following:

- Pellet Separators and Washing
- Pellet Dryers
- CO₂ Purifiers and Compressors
- Cooling Systems
- Compressors
- Evaporators

- Pumps
- Electrical and Instrumentation Controls
- New Piping
- Water Treatment Facilities
- Operations, maintenance, measurement, and monitoring buildings

The construction of the plant would include site preparation and earthworks, installation of foundations and supports, fabrication of major equipment and transportation to site, integration of modules and interconnecting works (i.e. piping, electrical, controls), erection of buildings and support infrastructure, utility interconnections, commissioning and start-up, production ramp-up, and handover to operations.

The pairing of DAC technology and CO₂ sequestration through EOR operations would be a significant environmental commitment for the energy industry, providing a pathway for reduced carbon emissions from traditional energy production and the realization of an economically viable model for significant anthropogenic CO₂ sequestration through EOR operations. The Project and its DAC technology deployment are expected to fundamentally alter the energy landscape by providing a pathway to decarbonize major carbon-emitting industries like fuel production, transportation, and construction. CO₂ credits generated by the plant would be sold into regulated markets like California's Low Carbon Fuel Standards (LCFS) market, as a low-carbon liquid fuel or as emissions offsets directly to corporations committed to decarbonization. Currently, low carbon fuel initiatives are being enacted all over the world, including major markets such as the United States' west coast, Canada, and South America. With countries, industries, and companies continuously looking to offset their CO₂ emissions, it is anticipated that by 2050 the carbon removal industry will be as large as the oil & gas industry is today.

Documentation to Assist in Determining if Limitation is a Determining Factor

The proposed Project would be one of the largest industrial-scale direct atmospheric air capture and carbon sequestration operations anywhere in the world. Given the wide applicability of Carbon Engineering's process, their DAC technology can be utilized by a variety of industrial and commercial users and could be located anywhere an adequate supply of utility inputs exist. The majority of the manufactured CO₂ from the Project would be permanently sequestered by Oxy's EOR operations but could also be utilized as a feedstock for many other products. The Project becomes more economically viable when there is access to competitively priced renewable electricity, natural gas, and water.

Additional factors that would impact the location and success of the Project include:

- Proximity to a qualified customer for CO₂
- Suitable topography, geotechnical, and logistical conditions
- Labor availability
- Supporting infrastructure
- Initial development costs and recurring tax liabilities
- Permitting and regulatory environment
- Ability to develop or obtain carbon-free electricity to power the facility

The profitability of the Project is dependent on four main factors:

- The ability to negotiate and sell processed CO₂ for permanent sequestration in enhanced oil recovery operations and other potential commercial off-takers
- The ability to utilize Federal Section 45Q tax credits
- The ability to generate and sell negative emissions credits (e.g. California's Low Carbon Fuel Standard)
- The ability to negotiate and secure economic development incentives

At this time, Oxy would be the primary recipient of CO_2 offtake for sequestration. Because the Section 45Q and negative emissions credits are not specific to geographic location, the Project could be located anywhere in the United States and secure the necessary savings resulting from these programs.

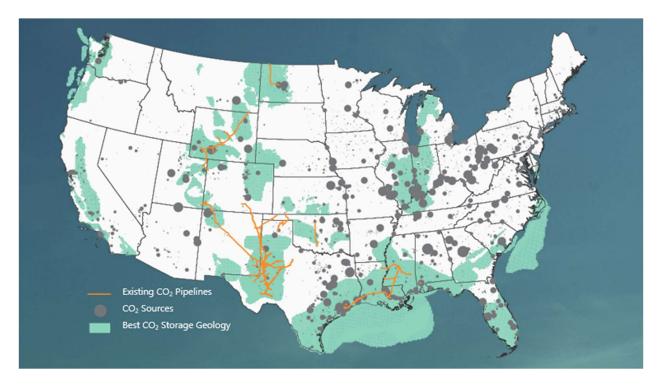

Oxy and Oxy Low Carbon Ventures have a traditional energy production and carbon solutions footprint throughout the United States and the majority of their domestic assets are concentrated in the energy basins of Texas, New Mexico, Colorado, Wyoming, and Utah. 1PointFive is actively evaluating target sites in each of these jurisdictions and plans to site the proposed facilities in the location that offers the best support for profitability and sustainability over the lifetime of the Project.

Reducing the Project's ad valorem property tax liability and other significant financial impacts to the maximum extent possible is critical to the final investment decision. Property tax is one of the highest annual operating expenses and would be a significant ongoing liability throughout the life of the Project. A Chapter 313 value limitation from Ector County ISD would be critical to reducing up-front operating

costs, increasing return on investment, and maintaining the long-term economic viability of the Project. The Project is not economically viable at the proposed site in Texas without a Chapter 313 value limitation.

The potential to develop industrial scale, cost effective CCUS operations exists anywhere there is a relatively short distance between carbon dioxide emission sources and saline formations or other types of aquifers that could be utilized for permanent CO₂ sequestration. If the proposed plan to capture, process and sequester CO₂ from atmospheric air proves prohibitively expensive to fully scale in Texas or other states with significant EOR operations, Oxy and its partners could explore other attractive alternatives to investing in DAC/EOR-coupled technologies.

The following map illustrates CO₂ sequestration hub development potential in the United States:

The potential to capture and sequester emissions from these sources is virtually unlimited, as approximately 2,700 Mtpa of CO_2 was emitted from U.S. industrial sources in 2018 and approximately 40 Mtpa was captured and sequestered as of January 2021.

Other CO₂ emissions sources such as ethanol plants make a strong case for the construction of carbon sequestration hubs in areas where plants are concentrated, as the cost of sequestration could be spread over a larger production volume. With the right combination of average pipeline distance, estimated capital investment, adequate geology, and minimum ethanol production volumes, OLCV and its partners could choose to dedicate their limited capital resources to the pursuit of other carbon neutralization opportunities with strong estimated returns on investment, including DAC facilities located at sequestration sites near ethanol production.

Description of how project is located in more than one district, including list of percentage in each district and, if determined to be a single unified project, documentation from the Office of the Governor (*if applicable*)

Not applicable

Tab 7

Description of Qualified Investment

The Project would be constructed on approximately 1,600 acres at a site known as the Shoe Bar Ranch in Ector County and would be located entirely within the boundaries of Ector County Independent School District.

There are four major process components associated with the Project:

- Air Contactors
- Pellet Reactors
- Pellet Calciners
- Slakers/Hydrators

Eligible ancillary and necessary equipment would include the following:

- Pellet Separators and Washing
- Pellet Dryers
- CO₂ Purifiers and Compressors
- Cooling Systems
- Compressors
- Evaporators

- Pumps
- Electrical and Instrumentation Controls
- New Piping
- Water Treatment Facilities
- Operations, maintenance, measurement, and monitoring buildings

Additional equipment and components would be defined during detail design and procured by the EPCM contractor.

The construction of the plant would include site preparation and earthworks, installation of foundations and supports, fabrication of major equipment and transportation to site, integration of modules and interconnecting works (i.e. piping, electrical, controls), erection of buildings and support infrastructure, utility interconnections, commissioning and start-up, production ramp-up, and handover to operations.

This application covers all qualified investment and qualified property necessary for the commercial operations of the Project, all of which would be located within the project boundary, Enterprise Zone, Ector ISD and Ector County, Texas.

Tab 8

Description of Qualified Property

The Project would be constructed on approximately 1,600 acres at a site known as the Shoe Bar Ranch in Ector County and would be located entirely within the boundaries of Ector County Independent School District.

There are four major process components associated with the Project:

- Air Contactors
- Pellet Reactors
- Pellet Calciners
- Slakers/Hydrators

2020 Manufacturing Average Wages by Council of Government Region Wages for All Occupations

Calculated by the Texas Workforce Commission Labor Market and Career Information Department.

Data published: August 2021.

Data published annually, next update will likely be July 31, 2022

Annual Wage Figure assumes a 40-hour work week.

Note: Data is not supported by the Bureau of Labor Statistics (BLS).

Wage data is produced from Texas Occupational Employment and Wage Statistics (OEWS) data, and is not to be compared to BLS estimates. Data intended only for use implementing Chapter 313, Texas Tax Code.

Total Investment through Qualifying Time Period [ENTER this row in Schedule A2]			row in Schedule A2]	\$57,848,000	\$12,152,000	\$0	\$0	\$70,000,000
			ľ		En	ter amounts from TOTAL row above in Schedule	A2	
			F					

Total Qualified Investment (sum of green cells)

\$70,000,000

For All Columns: List amount invested each year, not cumulative totals.

Column A: This represents the total dollar amount of planned investment in tangible personal property. Only include estimates of investment for "replacement" property is specifically described in the application.

Only tangible personal property that is specifically described in the application can become qualified property.

Column B: The total dollar amount of planned investment each year in buildings or nonremovable component of buildings.

Column C: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that will not become qualified property include investment meeting the definition of 313.021(1) but not creating a new improvement as defined by TAC 9.1051. This is proposed property that functionally replaces existing property; is used to maintain, refurbish, renovate, modify or upgrade existing property, or is affixed to existing property—described in SECTION 13, question #5 of the application.

Column D: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that may result in qualified property are land or professional services.

Total Investment: Add together each cell in a column and enter the sum in the blue total investment row. Enter the data from this row into the first row in Schedule A2.

Qualified Investment: For the green qualified investment cell, enter the sum of all the green-shaded cells.

* All investments made through the qualifying time period are captured and totaled on Schedule A1 [blue box] and incorporated into this schedule in the first row.

** Only investment made during deferrals of the start of the limitation (after the end of qualifying time period but before the start of the Value Limitation Period) should be included in the "year prior to start of value limitation period" row(s). If the limitation starts at the end of the qualifying time period or the qualifying time period overlaps the limitation, no investment should be included on this line.

*** If your qualifying time period will overlap your value limitation period, do not also include investment made during the qualifying time period in years 1 and/or 2 of the value limitation period, depending on the overlap. Only include investments/years that were not captured on Schedule A1.

For All Columns: List amount invested each year, not cumulative totals. Only include investments in the remaining rows of Schedule A2 that were not captured on Schedule A1.

Column A: This represents the total dollar amount of planned investment in tangible personal property. Only include estimates of investment for "replacement" property if the property is specifically described in the application.

Only tangible personal property that is specifically described in the application can become qualified property.

Column B: The total dollar amount of planned investment each year in buildings or nonremovable component of buildings.

Column C: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that will not become qualified property include investment meeting the definition of 313.021(1) but not creating a new improvement as defined by TAC 9.1051. This is proposed property that functionally replaces existing property; is used to maintain, refurbish, renovate, modify or upgrade existing property, or is affixed to existing property—described in SECTION 13, question #5 of the application.

Column D: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that may result in qualified property are land or professional services.

Schedule B: Estimated Market And Taxable Value (of Qualified Property Only)

Notes: See TAC 9.1051 for definition of non-qualifying jobs. Only include jobs on the project site in this school district.

Economic Impact Analysis, other payments made in the state or other economic information *(if applicable)*

Not applicable

Tab 16

Description of Reinvestment or Enterprise Zone, including:

a) evidence that the area qualifies as an enterprise zone as defined by the Governor's Office

The area qualifies as an enterprise zone as defined by the Governor's Office because it is in a block group within the State of Texas that has a poverty rate of 20 percent or more.

b) legal description of reinvestment zone

Not applicable

c) order, resolution or ordinance establishing the reinvestment zone

Not applicable

d) guidelines and criteria for creating the zone

Not applicable

Signature and Certification page, signed and dated by Authorized School District Representative and Authorized Company Representative (applicant)

SECTION 16: Authorized Signatures and Applicant Certification

After the application and schedules are complete, an authorized representative from the school district and the business should review the application documents and complete this authorization page. Attach the completed authorization page in **Tab 17**.

NOTE: If you amend your application, you will need to obtain new signatures and resubmit this page, Section 16, with the amendment request.

1. Authorized School District Representative Signature

I am the authorized representative for the school district to which this application is being submitted. I understand that this application is a government record as defined in Chapter 37 of the Texas Penal Code.
