

**Homedale School District
Transportation and Maintenance**

Design West has not given us quotes for the high school HVAC project or removal of the boiler. To my knowledge the quotes are to be back from the contractors by July 16th.

The hot water storage tank that will need to be replaced is planned to be worked on after the boiler is taken care of.

Routine summer maintenance projects are underway. The gym floors are planned to be worked on the last week of July. Painting, cleaning carpets, and building repairs are all currently being done in all of the buildings.

Annual inspections and repairs are currently being planned and worked on for the school buses to be ready for the new school year.
