

ELA Curriculum Proposal July 2024

Options	Reasoning	Cost	
<p>1 Implementation of CKLA for grades K-8</p>	<p>This full-scale implementation would allow all staff who have completed LETRS training or who are currently involved in LETRS training to implement the training for science of reading in literacy instruction. It provides both a standards-aligned and science-of-reading-aligned curriculum. This allows students to also access materials, tools, strategies, concepts, and a scope and sequence that are also aligned to both.</p>	<p>\$245,000</p>	<p>Professional Development for implementation would need to be carefully designed within our allotted PD days (full group and small group by grade spans). We would also schedule grade level professional development during the school year intermittently and use our building subs and other subs to allow this. I (Alicia) would also propose that we have one day of PD for year one reflection and stepping toward full implementation in June before teachers leave for the summer and request one additional day of training in August, 2025 before back to school workshop.</p>
