The purpose of this Rating Details report is to provide and explain the data that was used to determine the school rating that is shown on each school's Report Card. Included in the following pages is all of the data used to determine the rating, together with a description of ratings methodology. The school rating shown here was piloted in 2011-2012 to determine Priority, Focus, and Model schools as part of the ESEA Waiver. For more details on the school report cards, please visit: <http://www.ode.state.or.us/search/page/?id=1786>.

Overall Level: Level 4

Number of Missed Participation Targets* (page 8)	0	NA		
[^] Schools that have Level 1 for Graduation can have an Overall Level no higher than Level 2. * Schools do not receive points for participation. However, a school's overall Level is lowered by one category if one or more subgroups missed a participation target. ** Schools may not be eligible for all possible points. Schools are not rated in categories where they do not meet minimum student count requirements.			Totals**	40
			Weighted Percent	80.0%

Level Assignment	Weighted Percent
Level 5	87.0 or above
Level 4	70.0 to 86.9
Level 3	47.0 to 69.9
Level 2	26.5 to 46.9
Level 1	Less than 26.5

Levels are calculated using the percentage of points earned out of the total points eligible. For schools with data on all indicators, the total points possible are:

- 20 for Academic Achievement
- 30 for Academic Growth
- 15 for Subgroup Growth
- 25 for Graduation
- 10 for Subgroup Graduation

The total score is matched to the scoring guide above to determine the school rating.

One way that we measure how well students are doing is through the use of state tests, which include achievement standards that define levels of student performance in a content area at a particular grade. The Academic Achievement indicator reflects the percent of students that meet or exceed standards on the state reading and math tests at all grade levels offered by the school. Subgroup data are displayed for informational purposes but are not included in the Rating system.

The Academic Growth Indicator uses the Colorado Growth Model to measure student progress over time in reading and mathematics. Oregon adopted this growth model as part of the process of obtaining a waiver from some of the requirements of the No Child Left Behind Act (NCLB). This growth model provides us a more complete picture of student progress and will help provide a better evaluation of school effectiveness.

Growth Level Cutoffs		
Level	On Track Growth	
	Yes	No
Level 5	60 & above	70 & above
Level 4	45 to 59.5	55 to 69.5
Level 3	35 to 44.5	45 to 54.5
Level 2	30 to 34.5	40 to 44.5
Level 1	Less than 30	Less than 40

The growth model looks at a student’s growth, which is the change in his/her test scores from the previous year (or 8th grade to 11th grade for high school students). The student’s growth is compared to that of his/her academic peers, who are the other students in the state who have a similar history of reading or math test scores. The Growth Model then expresses this growth as a percentile. For example, a growth percentile of 50 would indicate that a student had average growth compared to all other students in the state with similar test scores in the past. A growth percentile of 80 would indicate that the student’s growth was as high, or higher, than 80 percent of his/her academic peers.

For school accountability Oregon uses the median growth percentile for students at the school. The median represents “typical” growth at the school: half of the students had growth that was at least as high as the median, half the student had growth that was less than or equal to the median. This median growth percentile is the basis for the growth ratings for reading and mathematics, as shown below.

The growth model also provides growth targets for students in grades 3 to 8. These growth targets are the growth percentile the student would need to sustain to either move up to standard within three years (for those students currently below standard) or to maintain standard for the next three years (for those students above standard). For school accountability Oregon uses the median growth target for students at the school to determine if the school has On Track Growth:

If the Combined Median Growth Percentile \geq Combined Median Growth Target then On Track Growth = ‘Yes’

If the Combined Median Growth Percentile $<$ Combined Median Growth Target then On Track Growth = ‘No’

This determination of whether the school has On Track growth helps to determine the growth levels, as shown in the table at the upper right corner of this page.

This indicator measures the growth of historically underserved student subgroups. It disaggregates the Growth indicator and reflects the growth for economically disadvantaged, English learners, students with disabilities, and historically underserved races/ethnicities.

To be rated on Subgroup Growth, a subgroup must meet the minimum size required to receive an Achievement rating (40 tests in the last two years combined) and also have at least 30 students with growth percentiles.

Level 2	60.0 to 66.9	60.0 to 71.9
Level 1	Less than 60.0	Less than 60.0

This indicator uses four- and five-year cohort graduation rates. These rates follow incoming 9th grade classes for four or five years to determine the percent of students who graduate with a regular diploma. Each school's cohort begins with the first-time 9th grade students in a particular school year. Students are added to a school's cohort when they transfer into the school, and are removed from a school's cohort if they transfer to another high school. Students that dropout or otherwise leave a school without transferring to another school remain in a high school's cohort.

To be rated on graduation, a school must have at least 40 students in the combined cohort. The ratings levels can be described as follows:

- Level 5: the school had a graduation rate that was in the top ten percent of all high schools in the state.
- Level 4: the school had a graduation rate that was above average, but not in the top ten percent.
- Level 3: the school met the state minimum target, but still had a graduation rate that was below average.
- Level 2: the school met the federal minimum target, but not the state minimum target.
- Level 1: the school did not meet the federal minimum target. Schools that are Level 1 for both their four-year and five-year rates can have an overall rating no higher than Level 2.

The graduation rating for the school (as shown on page 2) is based on the higher of the ratings earned for the four-year and five-year rates.

The graduation rating for a subgroup is the higher of the ratings for the four-year rate and the five-year rate.

Student participation rates tell us the extent to which all students were tested in a school. All students enrolled on the first school day in May are required to test, and the data below show the percentages of students that tested, by subject and subgroup.

The table below also shows whether or not each subgroup met the federal participation rate target of 94.5%. School ratings are dependent upon student test scores, and these ratings are valid only when schools uniformly test all of their students. As a result, schools with one or more subgroups that missed the participation target will have their overall school rating lowered by one Level.

Participation Target: 94.5%
