2017 Rural Areas Student Flu Shot Clinic

Where there was no Flu mist available this year, Lisa Klamm, Public Health Nurse, offered to come to our more rural schools and give flu shots to students. Students had to have their parents present and a written permission slip signed. These clinics were very successful and well attended. The intended purpose of these clinics was to hopefully provide students living in a rural area, who might not typically drive to town for a flu shot, have access to receiving one.
