

Clean Bus SOLUTIONS

A Blue Bird and Generate Capital Company

Fleet Electrification Made Easy

Your school bus electrification partner

Clean Bus Solutions offers school districts complete fleet electrification solutions that eliminate the need for upfront capital, reduce the complexity associated with charging infrastructure and grid connection, and lower the cost of student transportation. We provide all the equipment and the key services you need at an affordable monthly fee, simplifying and accelerating your electrification process. It has never been easier to deliver best-in-class student transportation to your community.

Zero emission transportation solutions for a brighter future

Electric school buses deliver economic and health benefits to your students, your drivers and your community.

Cleaner air

Electric buses reduce exposure to harmful diesel emissions

Reduced asthma rates

Reducing air pollution helps prevent asthma flare-ups

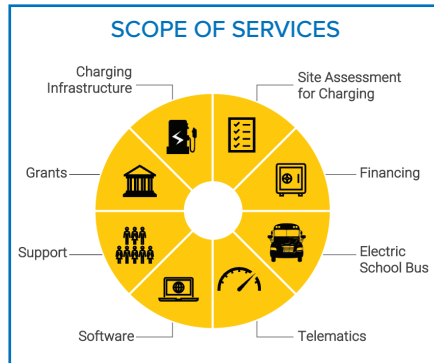

Quieter operation

Electric buses are significantly quieter than diesel buses, reducing noise pollution and creating a more peaceful environment for students and drivers

Reduced operating costs

Lower fuel and O&M costs make electric buses cheaper to operate over time

One contract. One monthly fee. All the solutions you need.

Pay one monthly fee to deliver safe and healthy transportation to your community without upfront capital. Clean Bus Solutions delivers financial and technology solutions, you pay a cost-effective fleet-as-a-service bill.
