

Action Sheet

MEETING DATE: May 20, 2026

AGENDA ITEM: Discuss and consider approval to Purchase the Structured Cabling Installation

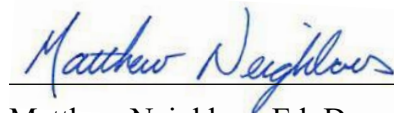

To support the final phase of the Austin Elementary School renovation, the district has contracted a specialized low-voltage vendor LMT, leveraging a technology cooperative to secure the best possible pricing for the project. LMT is tasked with building out the essential Power over Ethernet (PoE) infrastructure required to run the new Audio Enhancement Solutions (AES) system. Their primary scope includes cabling all necessary areas to provide data and power to AES devices, professionally running and concealing these cables down and through the walls to maintain a safe, visually clean, and tamper-proof learning environment.

Beyond the network infrastructure, the vendor will also execute the necessary structural and electrical work to integrate advanced visual technology into the classrooms. This involves structurally reinforcing the walls to safely support the weight of the new Interactive Displays (IADs) prior to mounting the panels securely. To ensure a seamless finish, the LMT will handle miscellaneous electrical and facility modifications, including installing new electrical outlets or relocating existing ones to perfectly align with the new IADs and AES hardware.

This final purchase will complete the campus-wide technology refresh, retrofitting the last 47 classrooms, hallways and offices not captured in the original phase of construction, and ensuring that the entire school benefits from these advanced solutions. This purchase will be paid out of Proposition C of the 2022-2023 Bond Funds. Purchasing Cooperative TIPS/TAPS will be used for this project. Contract # 220105. Technology Solutions Products and Services

Total Amount \$ 81,550.00

RECOMMENDATION: I move that the Board of Trustees approve the Structured Cabling Installation in the amount of \$81,550 as presented for Austin Elementary School
