Item: Approval of District Assessment Contract

Submitted by: Mark Maynard

Date: 07.07.2025

Recommended by: Glen Finkel

Board Meeting Date: 07.21.2025

RECOMMENDATION:

It is recommended that the Kent ISD school board approve the assessment enhancement contract from Bulb Digital in the amount of \$25,000 for the implementation of the collection of district and school assessment data in the Our School Data application.

BACKGROUND:

Kent ISD has had a long-standing relationship with Bulb Digital to provide both major revisions to the system architecture that powers Our School Data, as well as maintenance/support to keep the application healthy.

This contract will allocate resources to implement the enhancement of Our School Data's assessment collection capabilities. For many years Our School Data has had the ability for districts to enter assessment data at the classroom/student level and this functionality is heavily used by districts. We would like to expand our data collection for districts to be able to capture data at district and school building level to better evaluate and track their systems and processes. This functionality will not only benefit local districts, but also Kent ISD's MTSS and Continuous Improvement teams who facilitate this type of work in the local districts.
