

Curriculum Director Report

July 18, 2022

Science Assessment Results

We did get the Science Assessment Results from 2021. All we got was an overall score, and a performance descriptor (Exemplary, Proficient, Developing, and Emerging). We didn't get any breakdown on what areas they did well or not so well. While it was nice to finally get the scores, it was disappointing to get a lack of data back. Hopefully we will get more information on the Science Tests we took this past spring. We are not expecting to get those until January.

Other Test Scores

We did receive all other initial scores on time. Growth scores for IAR were supposed to be released on July 8th. They have been delayed. Growth Scores count for 50% of our ESSA Designation on the School Report card for K-8 schools. We are also expected to get the more detailed reports for IAR by July 27th. ISBE SAT/PSAT cut scores have also been delayed. Keep in mind ISBE uses different Cut Scores than College Board.

Curriculum Trak

I have been busy getting Curriculum Trak set up. This program will help us analyze what standards we are teaching, as well as when and how we are teaching these standards. This will also be a useful tool in curriculum discussions across grade levels.
