

SitelogIQ is a project management company that only works with public schools. We are uniquely positioned to assist in every aspect of facility improvements. We are committed to providing school districts with only and exactly what they ask for, presenting key data, and guiding a transparent process that allows leaders and the board to make informed decisions. We are passionate about making schools better for the community, staff, and students.

**Our team consists of:**

**Educational Experts-** Former school administrators experienced in board dynamics, school finance, strategic planning, community engagement, long term facility maintenance and current best practices in public education.

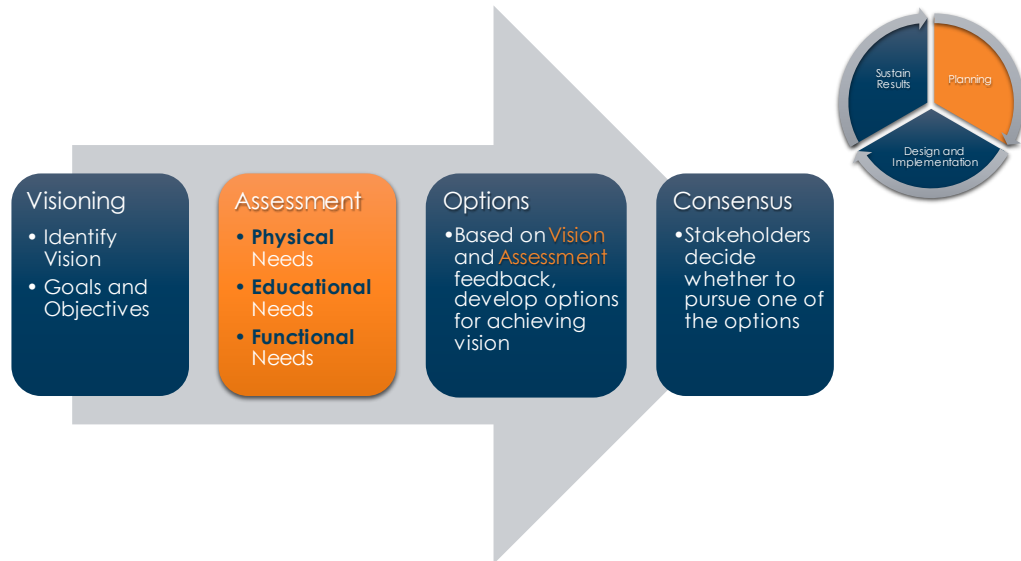

**Engineers-** We employ both development and design engineers. Our development engineers are highly trained individuals who specialize in the functionality of building systems including mechanical, electrical, plumbing, and other building elements. They are essential in developing opportunities and potential solutions. Our design engineers are industry experts who create system designs that maximize cost benefits and efficiencies, while meeting required standards, codes, and plan submission guidelines.

**Facility Analysts-** Our facility analysts gather critical information directly related to the assets and systems of buildings. They provide invaluable data regarding the age and overall condition of building systems and specific equipment.

**Architects** – Our development architects help identify potential programming solutions and opportunities. They are experts in knowing current building requirements (ADA, Capacity, Life Safety Systems, etc). Our architects listen and engage with district stakeholder to create designs that encompass a shared vision.

**Projects Managers-** We have site superintendents and project managers assigned to projects to manage the implementation process. They support the procurement process and serve as the district's advocate throughout the construction phase, helping keep the project on time, on cost, and completed in accordance with construction documents.
