File created on: 3/17/2021 2:54:24 PM

What has been the overall enrollment trend?

What are the demographic trends?

How are certain subgroup enrollments changing?

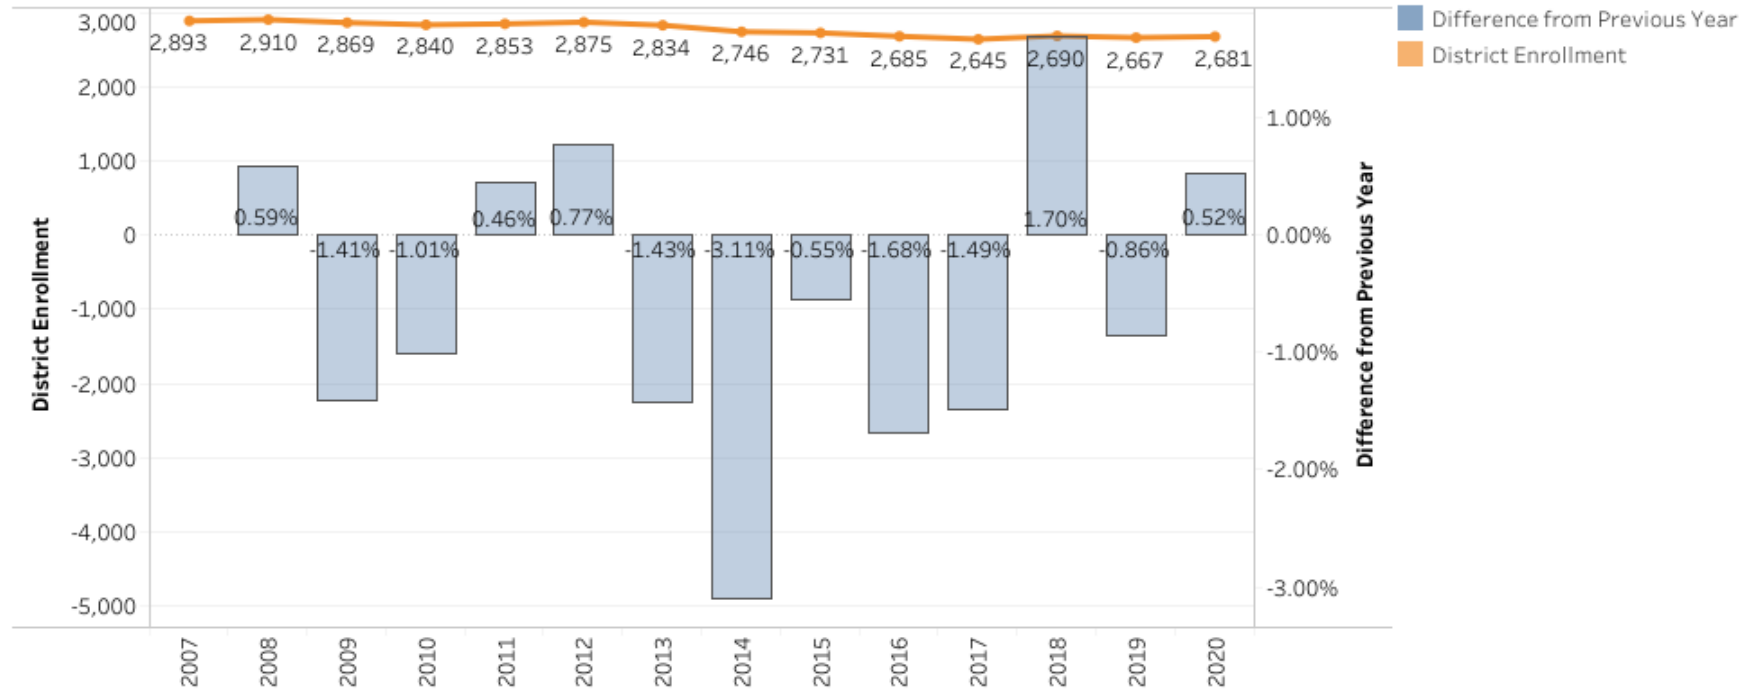

Are there enrollment bubbles in certain grades?

What could future Kindergarten classes look like?

What schools have seen the largest changes in enrollments?

## Red Wing Public School District Enrollment Story

**Changes in enrollment can place demands on the District.** The orange line below shows total PK-12 enrollment over the last Null years, while the blue bars represent the year-over-year change on the secondary axis.

What has been the overall enrollment trend?

What are the demographic trends?

How are certain subgroup enrollments changing?

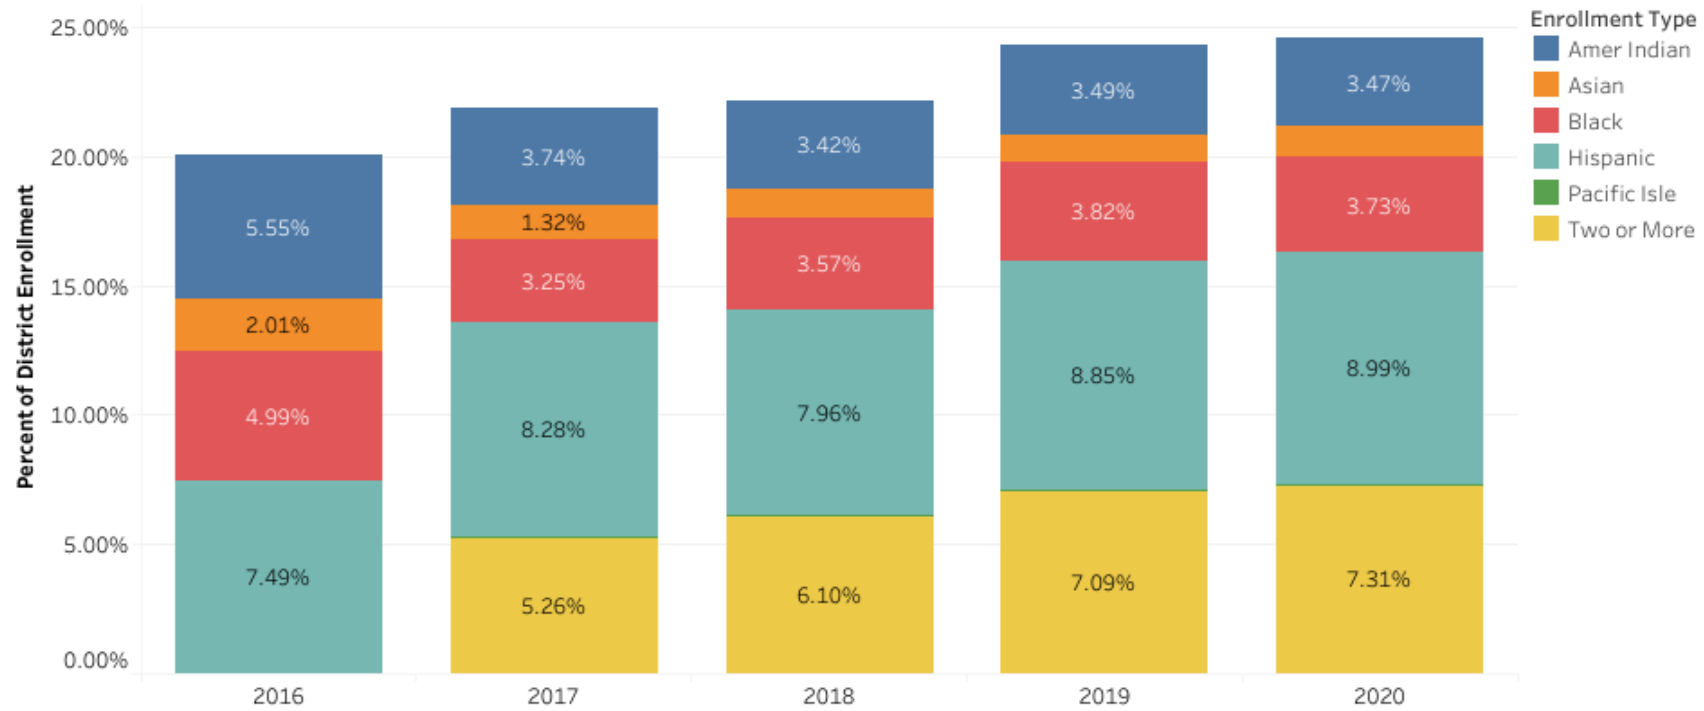

Are there enrollment bubbles in certain grades?

What could future Kindergarten classes look like?

What schools have seen the largest changes in enrollments?

## Red Wing Public School District Enrollment Story

The stacked bars below show the percentage of PK-12 students each year by race/ethnicity.

What has been the overall enrollment trend?

## Red Wing Public School District Enrollment Story

Disproportionately larger or smaller classes can cause staffing challenges as they move through the grades and more so as they move from the elementary buildings to middle school and then high school. Utilize the bar chart below of 2020 enrollment by grade to identify potentially impactful bubbles.

What are the demographic trends?

How are certain subgroup enrollments changing?

Are there enrollment bubbles in certain grades?

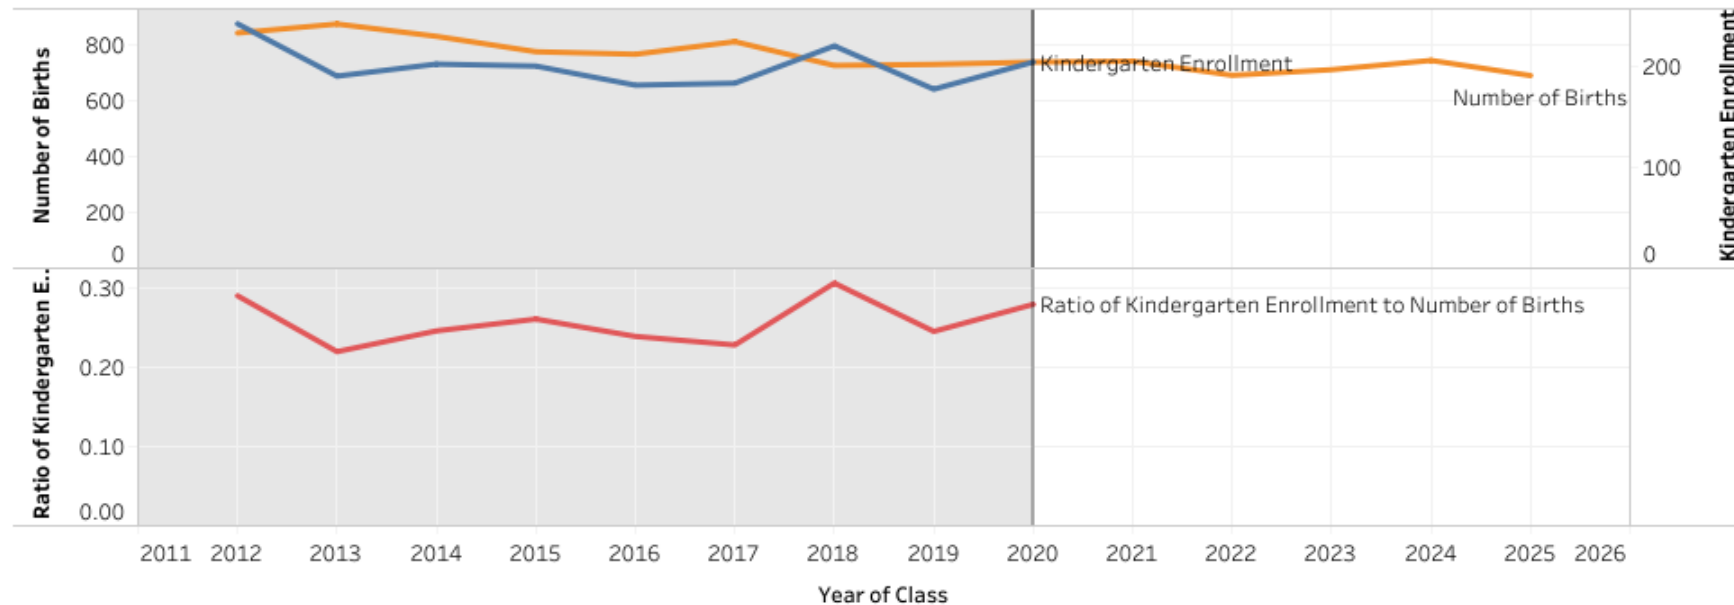

What could future Kindergarten classes look like?

What schools have seen the largest changes in enrollments?

Data Notes

## Red Wing Public School District Enrollment Story

**Prior years' birth data can help predict future kindergarten enrollments.** The chart below compares live birth data (offset by six years) to kindergarten enrollments. If the ratio of the two has historically been consistent, use the trend of more recent live births (to the right of the shaded area on the orange line) to anticipate upcoming kindergarten classes. The Year of Class label refers to the kindergarten school year, i.e. kindergarten count for 2018 is kindergarteners enrolled in the 2017-18 school year and is compared to births from calendar year 2012.

What are the demographic trends?

How are certain subgroup enrollments changing?

Are there enrollment bubbles in certain grades?

What could future Kindergarten classes look like?

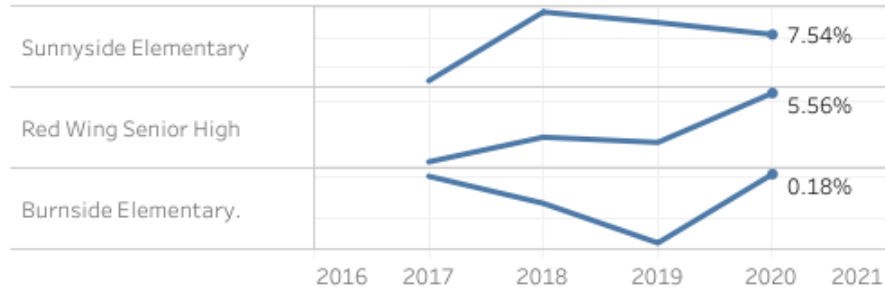

What schools have seen the largest changes in enrollments?

Data Notes

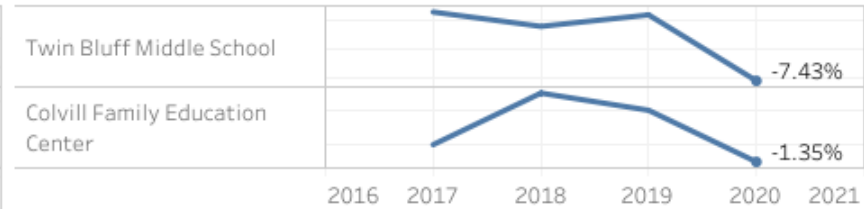

## Red Wing Public School District Enrollment Story

Even if overall district enrollment is stable, fluctuations between buildings can still present staffing **challenges**. Use the table below to identify which buildings have seen the largest increases and decreases over the last three years (2017 to 2020).

### Largest increase in 3 years

### Steepest decline in 3 years

What are the demographic trends?

How are certain subgroup enrollments changing?

Are there enrollment bubbles in certain grades?

What could future Kindergarten classes look like?

What schools have seen the largest changes in enrollments?

Data Notes

## Data Notes

**Enrollment data** consists of fall counts and demographic breakdowns obtained from the Minnesota Department of Education (MDE) -

<http://w20.education.state.mn.us/MDEAnalytics/DataTopic.jsp?TOPICID=2>

**Annual live birth** counts by the mother's home ZIP code are obtained from the Minnesota Department of Health Office of Vital Records. ZIP codes used for the district's birth counts represent all ZIP codes that are represented within the district boundaries, but portions of those codes may also be outside the district.

**Live births** are offset six years to compare to kindergarten enrollments for comparative purposes
