## **General Enrollment Information**

### **A. Definition of Terms**

- a. Prerequisite: A prerequisite or course which must be successfully completed before a student may take another course that is related.
- b. Required Course: The State of Kansas and the Board of Education have selected certain courses, which every student must pass if he or she is to receive a high school diploma.
- c. Elective Courses: All courses, which are not identified as required courses are considered to be elective courses.

### **B. Student Load**

- a. All students must carry a full class load (7 periods) at Chanute High School. Exceptions to this would be approved Early Release in the second semester of the student's senior year or noted on the student IEP or Individual Graduation Plan. Such plans must be approved by the IEP team or SIT team.
- b. Students may enroll in approved college classes and concurrently earn both high school and college credit. Students are responsible to pay tuition and fees for the concurrent credit courses.
- c. Early Graduation – Students may petition to graduate early. An alternative graduation plan needs to be approved by a Student Improvement Team. This letter of request should be submitted to the counseling office by December of their Junior year

### **C. Valedictorian/Salutatorian**

For students to qualify for Valedictorian/ Salutatorian: the student must have the highest rank in the graduating class and have completed the Kansas Honors Scholar Curriculum Program which consists of:

- 4 units of English
- 4 units of Math (minimum courses Algebra I, II, Geometry, Trig (1/2 unit), Probability/ Analytic Geometry (1/2 unit)
- 3 units of Social Studies
- 3 units of Science Biology, Chemistry, and Physics
- 2 units of Foreign Language (same language)
  - Tiebreakers will be used to select one Valedictorian and one salutatorian. Tiebreakers in order of selection importance:
    - ACT composite Score
    - Senior Year Attendance Rating

## **UNITS REQUIRED FOR GRADUATION**

Grades 9, 10, 11, 12 – 25 units

### **ACADEMIC RIGOR**

- The “statement of academic rigor” is necessary to provide Chanute High School students with the greatest challenge and fulfillment possible. Additionally, we believe that each student attending our school will be prepared for post-secondary education. (The definition for “post-secondary education” in this rigor statement shall refer to student readiness for additional training/not specific to college enrollment)

CHS students will be required and/or encouraged to maintain a schedule that complies with the requirements of the Student Handbook and the Course Description Book, including compliance with the following:

1. Seniors will be enrolled in a minimum of 3 academic courses at all times. At least 4 of their classes must carry ½ unit of weight.
2. Students will be placed in the appropriate math class as a freshman or new student and will complete 3 full units by following the department sequence. Initial placement will be determined by administration, teachers, and counselors using past performance in classes and on achievement tests.
  - a. Math Sequence – Math 9, Math 10, Math 11 or; Business Math/Banking & Finance based on post-secondary goals.
  - b. Seniors who have completed 3 full units of math do not have to enroll in a math class unless they have not yet completed Algebra I or a comparable math course. Completion of Algebra I or progress toward that goal is the building minimum.
3. All CHS students must complete 1 unit of a Physical Science & 1 unit of Biology and are required to take a 3<sup>rd</sup> unit their Jr or Sr Year.
4. Students “flagged” for improvement in a core class may be required to take 2 classes per semester in that core area based on the following (currently only using Math and Reading):
  - a. Student did not “meet standard” on the previous Kansas Assessment.
  - b. Student scores at the 33rd percentile or lower on MAP Assessment combined with lower performance in English classes.
5. Students enrolled in “year-long” courses will only be allowed to drop courses with administrative permission. Such changes will be discouraged.

<b>Chanute High School Graduation Requirements</b>	<b>Chanute High School Graduation Requirements Starting with the class of 2028</b>

Postsecondary Assets (Starting with the class of 2028)	
Career & Real-World Examples:	Academic Examples
Youth apprenticeships 40+ Community Service Hours Client=Centered Projects Workplace learning experience Industry recognized certifications Seal of Biliteracy CTE ScholarEagle Scout or Gold Scout 4-H Kansas Key Award Two or more high school athletics/activities JROTC 90% attendance in high school	ACT composite score of 21+ Workeyes level silver or higher 9+ College hours State Assessment scores of 3 or 4 math, ELA, Science ASVAB per requirements of military branch selected Senior Project/Senior exit interviews SAT Score 1060+ Completing board of regents curriculum International Baccalaureate Exam 4+ Advanced Placement Exam 3+

Kansas Qualified Admissions	
The 6 state universities in KS admissions requirements are now based on ACT score and GPA. However the following are the recommendations for high school graduates pursuing a high school degree.	
English 4 Units	No applied or Skills Courses
Mathematics 3 units	4 units at or above the level of Algebra I, taken in High school & ACT college readiness math benchmark of 22
Science 3 units	No applied Courses Biology, Chemistry and Physics
Social Science 3 units	World History, American History, Government
Foreign Language 2 units	Units of the SAME foreign Language

Kansas Scholars Curriculum	
The following are the requirements for high school graduates wishing to apply for the State of Kansas Scholarship Program. (Completion of the Kansas Scholars Curriculum is one component of the scholarship requirements) This is also a requirement for CHS top 10% distinction, salutatorian/ valedictorian	
English 4 units	No Applied Courses
Mathematics 4 units	(Minimum of Algebra I, Geometry, and Algebra II; plus one unit advanced math beyond Algebra II)
Science 3 units*	Biology, Chemistry, Physics No Applied Courses

<b>Kansas Scholars Curriculum</b>	
Social Science 3 units	World History, American History, Government
Computer Technology 1 unit	
Foreign Language 2 units	2 units of the <i>SAME</i> foreign Language
*The ACT test must be taken by December of the student's senior year to be eligible for State Scholar. *Students Must be a Kansas Resident	
*Alternative PLTW Science Pathway available	
<p style="text-align: center;"><b>What is the benefit of completing the Kansas Scholars Curriculum?</b></p> <p>Students that complete this curriculum and meet the other requirements, may be designated as State Scholars, which makes one eligible to receive the Kansas State Scholarship as provided by the Kansas Legislature. The academic profile of recent scholars include an average ACT of 30 and an average GPA of 3.91. State Scholars may receive up to \$1,000 annually for up to four undergraduate years (five, if enrolled in a designated five-year program), based on financial need and the availability of State funds. Financial need is measured by federal methodology using data submitted on the FAFSA.</p>

Technical English	1			X	X	Completion of English 9, English 10, a score of 4 on Workkeys Workplace Documents, and completion of technical program

\*Does not meet English Core Credit

\*\*This is a Neosho County Community College course taught by Chanute High School staff during the school day.

Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.

\*\*\*Takes place on the NCCC campus and is taken as a college class.

English 9	Honors English 9
In this year-long course students will study grammar, basic writing skills, literature, and will review the Six Trait Writing Model. Students will establish a background in reading and writing about literature by studying plays, mythology, novels, short stories, and poetry as well as non-fiction forms.	As in regular English 9, students will study grammar, basic writing skills, literature, and review the Six Trait Writing Model. Students will establish a background in reading and writing about literature by studying plays, mythology, novels, short stories, and poetry as well as non-fiction forms. The quantity of the content will be accelerated in this course as compared to English 9. The quality and difficulty of the written material will also be more advanced. <b>Students must score at least 80% in Honors in order to progress on to the next semester. Students earning a 74-79% will be in a probationary period. These students will have to bring their grades up to 80% by the next semester's conclusion to continue on in Honors. Students who do not raise their grade to 80% after two consecutive semesters will not remain in Honors. Students who earn a D or an F at semester will be moved to English 9 and will not continue on the Honors pathway.</b>

English/Reading Proficiency Development	English 10
English and Reading Proficiency Development courses are designed to assist students in acquiring the skills necessary to pass proficiency examinations. <b>RPD targets ninth grade students and EPD targets tenth grade students.</b>	The focus of this year-long course will balance between the fundamentals of writing sentences, paragraphs, papers, and the fundamentals of reading, understanding, and evaluating literature. Student compositions will emphasize good structure, organization, and usage. Literature read by students will include a variety of genres, such as poetry, drama, the novel and the short story.

Honors English 10	English 11
Studies in the sophomore year would focus primarily on the individual in literature. Students would be expected to read assigned material and respond, in written and verbal analyses, as to how traditional literary figures reflect universal themes such as maturation, social/political, evolution, human behavior, naturalism, moral conflict, duty and isolationism. Grades will be determined by satisfactory completion of written and verbal assessments of the literature studied. Additional information can be obtained from the instructor.  In this introductory pre-AP rhetoric, literature, and writing course, students will read and analyze a broad	This year-long course emphasizes the study of American literature and essay, expository, report and creative writing. Students will also review grammar and usage skills as they apply to the writing process.

and challenging range of nonfiction and fiction prose selections, deepening their awareness of rhetoric and how language works. Through close reading and frequent writing, they will develop their ability to work with language and text with a greater awareness of purpose and strategy, while strengthening their own composing abilities. Course readings feature expository, analytical, personal, and argumentative texts from a variety of authors and historical contexts. Students examine and work with essays, letters, speeches, images, and imaginative literature. Students frequently conference about their writing in Comet Time as well as in class. Students also prepare for the AP English Language and Composition and AP English Literature and Composition exams and pathways. Pre-AP English 10 covers the core content of English 10 but at a more rapid pace.

~~The curriculum contains additional assignments such as reading memoirs and novels, numerous plays, other readings, and writing many timed papers.~~

~~Additionally, there are greater opportunities for creative expression and philosophical debate that go beyond the scope of the traditional English class.~~

Prerequisite: English 9 or Honors English 9. Criteria used to determine eligibility for honors will be MAP scores, grades, attendance, and teacher recommendation(s). Upon entering Honors English for the first time at CHS, there will be a required parent meeting

( at open house) describing the differences in expectations between regular English and Honors-level English. Parents who cannot attend the meeting will be allowed to sign a letter stating that the expectations of the class have been shared. Students must score at least 80% in Honors in order to progress on to the next semester. Students earning a 74-79% will be in a probationary period. These students will have to bring their grades up to 80% by the next semester's conclusion to continue on in Honors. Students who do not raise their grade to 80% after two consecutive semesters will not remain in Honors. Students who earn a D or an F at semester will be moved to English 10 and will not continue on the AP pathway.

<b>College Prep English 11</b>	<b>AP English Language and Composition</b>
--------------------------------	--

College Prep English 11 course develops students' writing skills, emphasizing clear, logical writing patterns, word choice, and usage, as students write essays and begin to learn the techniques of writing research papers. Students continue to read works of American literature, which often form the backbone of the writing assignments. Literary conventions and stylistic devices may receive greater emphasis than in previous courses. College Prep English 11 emphasizes three subject areas-reading, writing, and ACT Prep. Students will read American novels,/plays, etc. as well as a number of short stories, essays, and poems. As college-bound students, they will write often: paragraph-length answers to literature-applying questions, journal writing, and argumentative research papers (MLA). The course includes grammar and its application to writing since the structure that underlies language influences the way words convey meaning. Students will prepare for and are expected to take the ACT in February. Prerequisite: English 9 or Honors English 9 and English 10 or Honors English 10. Criteria used to determine eligibility for college prep English 11 will be grades, attendance, and previous English teacher recommendation(s). Students who earn an F at semester in college prep English 11 will be recommended to English 11 or mythology.

AP English Language and Composition is an intensive yearlong course designed to prepare students for the AP English Examination administered each May by the College Board. Students will write about a variety of subjects from a variety of disciplines and demonstrate an awareness of audience and purpose. The overarching objective in this writing course is to enable students to write effectively and confidently in their college courses across the curriculum and in their professional and personal lives. The AP Language course will teach students to read primary and secondary sources carefully, to synthesize material from these texts in their own compositions, and to cite sources using conventions recommended by universities and professional organizations. Another purpose of the AP English Language and Composition course is to enable students to read complex texts with understanding and to write prose of sufficient richness and complexity to communicate effectively with mature readers. Students enrolling in this class should have an excellent attendance record and proven academic performance in Honors English 9 and 10 or equivalent courses.

<b>Business Communications</b>	<b>Sports in Literature</b>
--------------------------------	-----------------------------

Business Communications courses help students to develop an understanding and appreciation for effective communication in business situations and environments. Emphasis is placed on all phases of communication: speaking, listening, thinking, responding, reading, writing, communicating nonverbally, and utilizing technology for communication. Business communication functions, processes, and applications in the context of business may be practiced through problem-based projects and real world application.

These courses have the same aim as general literature courses (to improve students' language arts and critical-thinking skills), but use selected literature to explore a particular theme as expressed from several points of view. Such themes might include The American Dream, Society and Self, Exploration, War and Peace, and the like.

<b>English 12</b>	<b>English 12/ Concurrent Credit (Comp I &amp; Comp II)</b>
-------------------	---

In this full year course, students will read and discuss significant English literature and apply the reading and discussions to written assignments. Students will be assigned numerous short (200-300 word) analytical papers stressing different aspects of academic writing (cause/effect, narrative, technical, contrast/compare, etc.). Students will also complete a significant research project in MLA format. Particular emphasis will be placed on reinforcing student mastery of basic rules of composition and usage while completing analytical prose designed to promote proficiency of critical thinking skills.

In the first semester, this course will focus on literature that illustrates, explains, and/or considers the plight of the individual when placed in conflict with the primary social, political, and economic systems in cultures and civilizations regardless of the time. The course will also consist of instruction and practice in the fundamentals of writing with emphasis on grammatical correctness, acceptable usage, and effective organization of ideas. Exposition is the primary basis for such emphasis. Students will proceed through basic skills tests. In the second semester, this course will focus on literature that illustrates, explains, and/or considers the plight of the individual when placed in conflict with the primary social, political, and economic systems in cultures and civilizations regardless of the time. Constructive writing is continued with the emphasis on a long investigative paper in MLA style. Readings on moral, political, and social issues are used to acquaint students with contrasting opinions and to encourage them to organize their own ideas on these issues. Practice in effective writing and development of an adequate vocabulary are emphasized. Grades will be determined by satisfactory completion of written and verbal assessments of the literature studied.

~~The AP English Literature and Composition course is intended to give students the experience of a typical introductory college literature course. It includes an intensive study of representative works from various genres, periods, and cultures, concentrating on works of recognized literary merit. Reading in the course builds on the reading done in their previous English courses. Students learn to read deliberately and thoroughly, taking time to understand a work's complexity, absorb its richness of meaning, and to analyze how that meaning is embodied in literary form. They will also learn to consider the social and historical values a work reflects and embodies. Careful attention to both textual detail and historical context provides a foundation for interpreting a text. Writing is also an integral part of the AP English Literature and Composition course and of the AP Exam. Writing assignments in the course will address the critical analysis of literature and will include expository, analytical, and argumentative essays. This course will provide students with the intellectual challenges and workload consistent with a typical undergraduate university English literature/ Humanities course. As a culmination of the course, they are expected to take the AP English Literature and Composition Exam given in May. The course includes an intensive study of representative works such as those by authors cited in the AP English Course Description. ¶~~  
~~Prerequisite: AP Language and Composition. Students must have completed AP Language and Composition with an 80% or above the previous year. Students who earn a D or an F at semester in AP Literature will be recommended moved to English 12 and will not continue on the AP pathway ¶~~

General Literature/ Concurrent Credit	AP English Literature and Composition
---------------------------------------	---------------------------------------

This course consists of a study of representative fiction, drama, and poetry. Selections are read, discussed, and analyzed, with consideration of formal literary elements, including plot, characterization, theme, setting, point of view, tone, and symbolism. This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College.

*\*Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.*

Prerequisite: AP Language and Composition. Students must have completed AP Language and Composition with an 80% or above the previous year. Students who earn a D or an F at semester in AP Literature will be recommended to English 12..

<del>Drama</del> Drama-Acting	Drama Stagecraft
-------------------------------	------------------

~~Members of this class will study acting, make-up, costume, and set design and building. Acting will be emphasized. As a final project, the class will present a play to an audience. Active participation is required to pass the class.~~

Drama - Acting Drama—Acting/Performance courses are intended to promote students' experience and skill development in one or more aspects of theatrical production, but they concentrate on acting and performance skills. Initial courses are usually introductory in nature, while the more advanced courses focus on improving technique, expanding students' exposure to different types of theatrical techniques and traditions, and increasing their chances of participating in public productions.

Drama—Stagecraft courses are intended to help students develop experience and skill in one or more aspects of theatrical production, but concentrate on stagecraft (such as lighting, costuming, set construction, makeup, stage management, and so on). Initial courses are usually introductory in nature, while more advanced courses concentrate on improving technique, expanding students' exposure to different types of theatrical techniques and traditions and increasing their chances of participating in public productions. These courses may also provide a discussion of career opportunities in the theater.

Forensics	Debate
-----------	--------

The student will prepare several selections for class performance in the events of forensics. The events range from reading, speeches, and solo acting to one-act plays. They should also be prepared to perform on occasion for local clubs and organizations in the community of Chanute. Grades will be determined by quality of class and competitive performance, attitude, effort, tests, and assignments.

This class requires the student to master the arts involved in scholastic debate, as well as the mastery of the national debate topic each year. Research, organization, and platform speaking will be stressed. Tests, assignments, and class performance will determine grades. Students are encouraged to take Forensics following Debate. This class may be repeated for credit.

This class will be classified as a Fine Arts credit and may be repeated for credit.

### Speech/ Concurrent Credit

This course is a study of actual speaking situations and how to meet them successfully. The aim of this course is to help the student gain more self-confidence in everyday speaking situations and develop and improve habitual oral skills.

This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College

### English Language Acquisition **ESOL**

English as a Second Language (ESL) courses are designed for the rapid mastery of the English language, focusing on reading, writing, speaking, and listening skills. ESL courses usually begin with extensive listening and speaking practice, building on auditory and oral skills, and then move on to reading and writing. These courses provide an explanation of basic structures of the English language, enabling students to progress from an elementary understanding of English words and verb tenses to a more comprehensive grasp of various formal and informal styles and then to advance to “regular” English courses. ESL classes may also include an orientation to the customs and culture of the diverse population in the United States.

### Technical English

Applied English and Communications courses teach students communication skills—reading, writing, listening, speaking—concentrating on “real-world” applications. These courses usually emphasize the practical application of communication as a business tool—using technical reports and manuals, business letters, resumes, and applications as examples—rather than emphasize language arts skills as applied to scholarly and literary materials.

# MATHEMATICS

\*\*applies for students graduating 2026-2028

Course Title	Credit	9	10	11	12	Prerequisite
Math 9	1	X				None
Honors Math 9	1	X				Middle School Recommendation Upon entering Honors Math for the first time at GHS, there will be a required parent meeting immediately following Open House. Freshman Orientation describing the differences in expectations between regular Math and Honors-level Math. Parents who cannot attend the meeting will be allowed to sign a letter stating that the expectations of the class have been shared.
Math 10	1		X			Math 9 or Honors math 9
Honors Math 10	1		X			Honors math 9 Upon entering Honors Math for the first time at GHS, there will be a required parent meeting at an open house describing the differences in expectations between regular Math and Honors-level Math. Parents who cannot attend the meeting will be allowed to sign a letter stating that the expectations of the class have been shared.
Math 11	1			X		Math 10 or Honors Math
Honors Math 11	1			X		Honors math 10 Upon entering Honors Math for the first time at GHS, there will be a required parent meeting at an open house, describing the differences in expectations between regular Math and Honors-level Math. Parents who cannot attend the meeting will be allowed to sign a letter stating that the expectations of the class have been shared.
College Prep Math 11	1			X		Math 9 and Math 10

**Concurrent Credit Calculus/AP Calculus	1				X	Precalculus with Trigonometry
Technical Math	1			X	X	Algebra, Geometry, and completion of technical program

\*Does not count as Math core credit

\*\* This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and book costs for the course.

<b>Math 9</b>	<b>Honors Math 9</b>
Math 9 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability. This course is offered as the first course in a 4-year sequence of college-preparatory mathematics courses. The sequence may include: Math 9, Math 10, Math 11, College Prep Math 11 or College Algebra/College Statistics.	Honors Math 9 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability at an accelerated pace. This course is offered as the first course in a 4-year sequence of college-preparatory mathematics courses. The Honors Curriculum sequence may include: Honors Math 9, Honors Math 10, Honors Math 11, and Calculus.
<b>Math 10</b>	<b>Honors Math 10</b>
Math 10 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability. This course is offered as the second course in a 4-year sequence of college-preparatory mathematics courses. The sequence may include: Math 9, Math 10, Math 11, College Prep Math 11 or College Algebra/College Statistics.	Honors Math 10 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability at an accelerated pace. This course is offered as the second course in a 4-year sequence of college-preparatory mathematics courses. The Honors Curriculum sequence may include: Honors Math 9, Honors Math 10, Honors Math 11, and Calculus.
<b>Math 11</b>	<b>Honors Math 11</b>
Math 11 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability. This course is offered as the third course in a 4-year sequence of college-preparatory mathematics courses. The sequence may include: Math 9, Math 10, Math 11, College Prep Math 11 or and College Algebra/College Statistics.	Honors Math 11 emphasizes proficiency in skills involving numbers and operations, algebra, geometry, statistics, and probability at an accelerated pace. This course is offered as the third course in a 4-year sequence of college-preparatory mathematics courses. The Honors Curriculum sequence may include: Honors Math 9, Honors Math 10, Honors Math 11, and Calculus.

<b>College Prep Math 11</b>	<b>Math Proficiency Development</b>
-----------------------------	-------------------------------------

College Mathematics Preparations courses solidify quantitative literacy through the use and extension of algebraic, geometric, and statistical concepts. These courses prepare students for postsecondary liberal studies mathematics coursework; they are not intended to serve as remedial mathematics courses. Course content typically includes algebraic operations, solutions of equations and inequalities, number sets, coordinate geometry, functions and graphs, probability and statistics, and data representation.

This course is a preparation course for students who have been targeted for extra help according to their MAP scores, which would allow them to become proficient in Kansas Math Standards at the secondary level. Enrollment in this course is by assignment only. Students cannot opt into this course. This course is considered an elective course

<b>Business Math I <del>Money-Management 101- Investing I</del></b>	<b>Business Math II <del>Money-Management II/Investing II</del></b>
---	---

Business Mathematics courses reinforce general mathematics skills, emphasize speed and accuracy in computations, and use these skills in a variety of business applications. Business Mathematics courses reinforce general mathematics topics (e.g., arithmetic, measurement, statistics, ratio and proportion, exponents, formulas, and simple equations) by applying these skills to business problems and situations. Applications might include wages, hourly rates, payroll deductions, sales, receipts, accounts payable and receivable, financial reports, discounts, and interest.

Business Mathematics courses reinforce general mathematics skills, emphasize speed and accuracy in computations, and use these skills in a variety of business applications. Business Mathematics courses reinforce general mathematics topics (e.g., arithmetic, measurement, statistics, ratio and proportion, exponents, formulas, and simple equations) by applying these skills to business problems and situations. Applications might include wages, hourly rates, payroll deductions, sales, receipts, accounts payable and receivable, financial reports, discounts, and interest.

~~Business Math I is a successor to two years of mathematics at the high school level. In Business Math I students will study two units – Unit 1: Financial responsibility and decision making. Focusing on the creation of a financial plan, goal setting, and budgeting. Unit 2: Income and Careers. In addition, discussing taxes, benefit packages, and how certain trends in the economy can impact society.~~

~~Money Management I/Investing I is a successor to two years of mathematics at the high school level. In Money Management I students will study two units – Unit 1: Financial responsibility and decision making. Focusing on the creation of a financial plan, goal setting, and budgeting. Unit 2: Income and Careers. In addition, discussing taxes, benefit packages, and how certain trends in the economy can impact society.~~

~~Business Math II is a successor to Business Math I. In Business Math II students will continue with concepts from Business Math I. Business Math II will have a Unit 3: Focus on spending and credit and Unit 4: Focuses on saving and investing, including investment vehicles and time value of money, and retirement and estate planning.~~

~~Money Management II/Investing II is a successor to Money Management I/Investing I. In Money Management II/Investing II students will continue with concepts from Money Management I/Investing I. It will have a Unit 3: Focuses on spending and credit and Unit 4: Focuses on saving and investing, including investment vehicles and time value of money, and retirement and estate planning.~~

<b>Transition to College Algebra</b>	<b>Advanced Algebra Concurrent Credit</b>
--------------------------------------	---

This course addresses a variety of mathematical topics needed to prepare students for success in college-level mathematics. Mathematics topics include: numeracy; manipulating and evaluating expressions and formulas; rates, ratios, and proportions; percentages; solving tables; verbal, algebraic, and graphical interpretations of functions; rational expressions; solving systems of linear and quadratic equations; properties of higher degree equations; and operations with rational exponents. The course was developed to align with both the Kansas College and Career Readiness Standards and the

This is a standard College Algebra course designed for students who have successfully completed 3 years of Math or a minimum of Honors Algebra II and Honors Geometry in high school. Topics covered will be listed in the most current course syllabus on file at NCCC.

This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and books for the course.

developmental math outcomes of the Kansas Board of Regents.

**\*\*Elementary Statistics**

This is a standard introductory course in elementary statistics. The content includes descriptive and inferential statistics and the study of probability. Calculation techniques for descriptive statistics, normal distributions, confidence intervals, sample size, hypothesis testing, and correlation will be presented. The application problems make this course appropriate for students who may need to describe a population or research a problem in a class such as psychology, sociology, business, computer science, biology, education, technology, liberal arts, social science, nursing, allied health care, economics, ecology, and agriculture. This is a senior level dual credit college class.

**\*\*Trigonometry Concurrent Credit**

Covering topics of both Trigonometry and Analytic Geometry, these courses prepare students for eventual work in calculus. Topics typically include the study of right trigonometric and circular functions, inverses, and graphs; trigonometric identities and equations; solutions of right and oblique triangles; complex numbers; numerical tables; vectors; the polar coordinate system; equations and graphs of conic sections; rotations and transformations; and parametric equations.

\*\*These courses are Neosho County Community College courses taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and books for the course. First semester will be an introduction to Calculus; the second semester will be for NCCC credit.

Calculus/ Analytical Geometry & Calculus I CC	AP Calculus
---	-------------

<p>A study is made of some topics in Analytical Geometry, functions, and limits. The theory of applications of the derivative and integral are then developed.</p>	<p>Advanced Placement (AP) Calculus is an intensive yearlong course designed to prepare students for the AP Calculus AB Examination administered each May by the College Board. This course will be comparable to a college calculus course therefore college credit and/or advanced placement at nearly 3000 colleges and universities, may be awarded for a satisfactory score on the exam. Students will be expected to take the AP Examination at their own expense. In addition to the prerequisite listed below the students enrolling in this class should have an excellent attendance record and proven academic performance.</p> <p>Each student must have a solid foundation in algebra, geometry, trigonometry, analytic geometry, and function theory measured by course academic outcomes.</p>
--	--

Math Proficiency Development	Algebra I
------------------------------	-----------

<p>MPD is a comprehensive course designed for high school freshmen and sophomores to strengthen and extend their understanding of key mathematical concepts. Using the board approved curriculum, students will explore topics such as linear equations, functions, transformations, geometry, statistics, and the foundations of algebraic reasoning. The course emphasizes problem-solving, critical thinking, and the application of math to real-world contexts. Through engaging lessons, collaborative activities, and integrated technology tools, students will develop the skills and confidence needed to complete Algebra I and Geometry simultaneously. MAP and other formative testing will be used throughout the year to monitor each student's accomplishments.</p>	<p>Algebra I is a foundational mathematics course designed for high school freshmen to develop a deep understanding of algebraic concepts and their applications. Using the board approved curriculum, students will explore topics such as linear equations and inequalities, quadratic functions, systems of equations, polynomials, and exponential relationships. The course emphasizes problem-solving, critical thinking, and mathematical reasoning while incorporating real-world scenarios and interactive technology tools to solidify learning. Through collaborative activities and individual practice, students will build the skills necessary for success in advanced math courses and everyday problem-solving. This course serves as the cornerstone for a strong mathematical foundation.</p>
---	--

Geometry	Honors Accelerated Geometry
----------	-----------------------------

<p>Geometry is a dynamic course designed for high school sophomores to develop a strong understanding of geometric principles and their applications. Using the board approved curriculum, students will study topics such as congruence, similarity, transformations, trigonometry, and the properties of two- and three-dimensional figures. The course emphasizes logical reasoning, spatial visualization, and problem-solving skills through proofs, constructions, and real-world scenarios. With the integration of technology and collaborative activities, students will engage in hands-on learning experiences that build a solid foundation for future mathematics courses. This course encourages critical thinking and practical application of geometric concepts.</p>	<p>Honors Geometry is an advanced mathematics course designed for high school freshmen seeking a rigorous and challenging exploration of geometric concepts. Using the board approved curriculum, students will engage in an in-depth study of topics such as congruence, similarity, trigonometry, geometric transformations, and the properties of shapes. Emphasis is placed on critical thinking, problem-solving, and logical reasoning through proofs and real-world applications. The course integrates dynamic technology tools and collaborative activities to enhance understanding and prepare students for higher-level mathematics courses. Ideal for motivated learners, this course fosters a strong foundation in geometric principles while encouraging analytical and creative thinking. Qualified students may not be enrolled in or have taken Geometry (2031/2032). To remain in this class at semester a B average must be obtained. Moreover, to advance to Honors Algebra II</p>
---	--

the succeeding year an overall average of B must be obtained.

### Honors Accelerated Algebra II

Honors Algebra II is an advanced mathematics course designed for high school sophomores seeking to deepen their understanding of algebraic concepts and prepare for higher-level math courses. Using the board approved curriculum, students will explore complex topics such as polynomial, rational, and exponential functions, logarithms, sequences and series, and advanced systems of equations. The course emphasizes critical thinking, problem-solving, and mathematical reasoning, with a focus on real-world applications and modeling. Students will also engage with technology tools and collaborative activities to enhance their learning experience. This rigorous course challenges motivated learners to build a strong foundation for precalculus and beyond. To advance to Precalculus with Trigonometry the succeeding year an overall average of B must be obtained.

### Precalculus with Trigonometry

Precalculus with Trigonometry is an advanced course designed for high school juniors to prepare for calculus and other higher-level mathematics. Using the board approved curriculum, students will explore topics including advanced functions, trigonometry, polar coordinates, vectors, and analytic geometry. The course emphasizes problem-solving, critical thinking, and mathematical modeling, providing students with the tools to tackle complex mathematical concepts and applications. This course is available for dual credit through Neosho County Community College, offering students the opportunity to earn college credit while completing high school requirements. With rigorous content and integrated technology tools, this course builds a strong foundation for academic and career success in STEM fields. To advance to Calculus the succeeding year an overall average of B must be obtained.

### Algebra II

Algebra II is a comprehensive mathematics course designed for high school juniors to expand their understanding of algebraic concepts. Using the board approved curriculum, students will study topics such as quadratic, polynomial, and exponential functions, logarithms, complex numbers, sequences and series, and systems of equations and inequalities. The course emphasizes critical thinking, problem-solving, and real-world applications, helping students develop mathematical reasoning and analytical skills. With the integration of technology and collaborative activities, students gain a deeper understanding of algebraic principles and their connections to everyday situations.

### Business Math I/II Money Management 101/Investing

Business Mathematics courses reinforce general mathematics skills, emphasize speed and accuracy in computations, and use these skills in a variety of business applications. Business Mathematics courses reinforce general mathematics topics (e.g., arithmetic, measurement, statistics, ratio and proportion, exponents, formulas, and simple equations) by applying these skills to business problems and situations. Applications might include wages, hourly rates, payroll deductions, sales, receipts, accounts payable and receivable, financial reports, discounts, and interest.

~~Money Management/Investing is a practical course designed for high school juniors to develop essential financial literacy skills and a foundational understanding of personal finance. Using the board approved curriculum, students will explore topics such as budgeting, saving, credit management, financial planning, and investment strategies. The course emphasizes real world applications, equipping students with the knowledge and tools to make informed financial decisions. Through interactive lessons, projects, and simulations, students will learn to manage money effectively, set financial goals, and understand the principles of investing to build wealth over time. This course provides valuable life skills that prepare students for financial independence and success.~~

### College Prep Algebra II

### Concurrent Advanced College Algebra

College Prep Algebra II is a course designed for high school juniors to solidify and expand their algebraic knowledge while preparing for college-level mathematics. Using the board approved curriculum, students will explore key topics such as quadratic, exponential, and logarithmic functions, systems of equations, polynomials, and an introduction to statistics and probability. The course emphasizes problem-solving, mathematical reasoning, and real-world applications to build confidence and competence in advanced algebra. With a focus on college readiness, this course provides the skills and understanding necessary for success in college math courses and standardized tests.

Concurrent Advanced College Algebra is a college-level mathematics course designed for high school juniors/seniors seeking to strengthen their algebraic skills while earning college credit. Using the NCCC board approved curriculum, students will explore topics such as functions and their graphs, polynomial and rational functions, exponential and logarithmic functions, systems of equations and inequalities, and introductory concepts of matrices and sequences. This course is available for dual credit through Neosho County Community College, offering students the opportunity to simultaneously meet high school graduation requirements and gain college credit. Emphasizing problem-solving, critical thinking, and application of advanced algebra concepts, this course provides a strong foundation for future success in mathematics and related fields.

### Elementary Statistics

Elementary Statistics is a college-level mathematics course designed for high school juniors and seniors to develop a foundational understanding of statistical methods and their real-world applications. Using the board-approved curriculum, students will explore topics such as data analysis, probability, measures of central tendency, variability, hypothesis testing, correlation, and regression. This course emphasizes practical application, critical thinking, and interpretation of statistical results. Available for dual credit through Neosho County Community College, students have the opportunity to earn both high school and college credit. Elementary Statistics provides essential skills for academic success in various disciplines and informed decision-making in everyday life.

### Concurrent Credit Calculus/AP Calculus

AP Calculus is a rigorous, college-level mathematics course designed for high school seniors who are ready to deepen their understanding of calculus concepts. Using the board approved curriculum, students will explore topics such as limits, derivatives, integrals, and the Fundamental Theorem of Calculus, with applications in real-world problem-solving and mathematical modeling. This course prepares students for the AP Calculus AB exam and offers the opportunity to earn dual credit through Neosho County Community College, allowing students to gain both high school and college credit. With a focus on analytical thinking, precision, and critical problem-solving, AP Calculus equips students with the skills needed for success in STEM-related fields and beyond.

### Technical Math

Technical Mathematics courses extend students' proficiency in mathematics, and often apply these skills to technical and/or industrial situations and problems. Technical Mathematics topics may include but are not limited to rational numbers; systems of measurements; tolerances; numerical languages; geometry; algebra; statistics; and using tables, graphs, charts, and other data displays. Technology is integrated as appropriate..

## SOCIAL SCIENCE

***Introduction to Philosophy* Concurrent Credit	.5			X	X	None

\*Does not meet CHS core Social Science credit

\*\* This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and book costs for the course.

\*\*\*Takes place on the NCCC campus and is taken as a college class.

**World History/ Cultures**

This course will present a survey of humankind's political, economic, social and cultural achievements from the earliest civilizations to the beginning of the twentieth century. Some units will explore the cultures of non-western peoples.

**World Geography**

In the study of world geography, students utilize physical and cultural perspectives to examine people, places, and environments at local, regional, national, and international levels. Students describe the influence of geography on the events of the past and present with emphasis on contemporary

**Economics**

This course integrates economic principles such as free market economy, consumerism and the role of the American government within the economic system, with business concepts such as marketing principles, business law and risk. Emphasis will be placed on demonstration of skills and understanding of academic, technical, ethical and legal issues while developing skills in problem solving, critical thinking and employability skills.

**AP Economics**

AP Economics courses prepare students for the College Board's examinations in both Microeconomics and Macroeconomics; these courses include the content of the two separate courses as described above.

**Government**

In this class, the student will study the basic elements of political science, the American election process, other types of government in the world, and the process of government at the local level. In addition, objectives covering current events, the Constitution, the office of the President, development and passing of law, and economics will be studied.

**American History**

This course is a basic survey course in American history. A chronological approach will be used, beginning with the period of reconstruction. One full year of study is required to complete this junior requirement. Grades will be determined by written examinations plus map work, worksheets and various research assignments.

**American History Sports**

This course examines U.S. History through sports themes, their societal, historical and political impact on the United States.

**American History War**

U.S. Wars and Military Conflicts courses focus on the study of one or more wars and major military conflicts in which the United States had a significant role. These courses concentrate on one of many topics related to war, including the causes; U.S. involvement; and social, political, and economic effects. Specific wars may include the Revolutionary War, American Civil War, World War I, World War II, Korean War, Vietnam War, Gulf War, or other contemporary military conflicts

**American History Concurrent Credit**

Concurrent Credit American History is offered for high school credit and NCCC credit. The content follows the outcomes for NCCC course HIST 2002 United States History II (1850-1914). Students should be prepared for essay tests and completing one research project and one book report.

This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and books for the course.

**American Government Concurrent Credit**

Concurrent Credit American Government will cover American Government objectives involving the structure of the American Government, the roles of the three branches of government, domestic policy, foreign policy, and major constitutional issues. An historical case study approach will be used integrating 20<sup>th</sup> Century United States history with American Government. Students will be required to take essay examinations, write persuasive and expository essays over current political issues, and do a research project.

This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and books for the course.

**\*\*Psychology  
Concurrent Credit**

This course is an introduction to the science of psychology including an emphasis on its historical and philosophical basis, the underlying principles of scientific methodology, as well as the principles of neuroscience, learning, intelligence, consciousness, personality, life-span development, and psychopathology and treatment, among others. This course meets or exceeds requirements in content and rigor for General Psychology PSY 155 in the NCCC curriculum.

**\*\*Developmental Psychology  
Concurrent Credit**

Developmental Psychology provides a broad, comprehensive background in the study of human development from conception to death. The course is a chronological survey of the interaction of the biological, cognitive, emotional and social factors that shape the development of the individual.

**\*\*Sociology  
Concurrent Credit**

Through this course, students will begin to unravel the social factors underlying social phenomena. This course will introduce the student to sociological theories and concepts for evaluating human interactions and institutions. The use of multimedia techniques for gathering information, (e.g. the internet, films, and interactive software) will allow the student to apply the sociological theories and concepts to contemporary social issues.

This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College.

**\*\*Social Problems  
Concurrent Credit**

This course is a sociological analysis of selected social problems and their impact on the quality of life. The methodology used for studying and understanding social problems will include models of analysis, patterns of human behavior, social research, fallacies of thinking, social structural factors, and public policy making.

This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College.

Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.

**AP European History**

Europe since 1450. This course is a survey of European history with an emphasis on political, economic, and cultural developments as well as European interaction with the non-European world. Students will be expected to read college-level material, write essays involving document analysis, and complete significant research projects. Students who take this course will prepare to take the AP exam in European History. Sophomore students may take this as a replacement class for the required World History.

**World Civilization I Concurrent Credit**

This course studies the origin and historical development of peoples and cultures from antiquity through the Renaissance into the early modern work (500 B.C. – 1500 A.D.) Societies in Europe, Asia, and Africa are surveyed. Written materials from each period are used whenever possible.

**World Geography Concurrent Credit**

This course examines the major geographical regions of the world by surveying the political units, environments, and cultures.

\*Does not meet CHS core science credit unless taken Junior year or Later

\*\*Takes place on the NCCC campus and is taken as a college class.

<p><b>Intro to Health Care</b></p> <p>This course provides students with the basic knowledge of health/wellness professionals in private business and industry, community organizations, and health care settings. Includes instruction in personal health, community health and welfare, nutrition epidemiology, disease prevention, fitness and exercise, and health behaviors.</p>	<p><b>Physical Science</b></p> <p>The physical science program consists of providing a learning atmosphere that enhances the student's curiosity and discovery on understanding the world around them. This course helps students understand the value of science in their lives. For students planning to take physics and/or chemistry later on, physical science provides a good base of understanding in those subject areas and for students who do not plan to take physics or chemistry, this course provides a hands-on learning environment to help them better understand the world around them. Specific topics of study include: Chemistry - the structure and properties of matter, atoms and the periodic table, and chemical reactions; and Physics - motion and forces, machines, electricity and magnetism, heat, light and sound</p>
<p><b>Principles of Biomedical Science</b></p> <p>. In this introductory course of the Project Lead the Way Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems. This course may replace a student's Physical Science credit.</p>	<p><b>Human Body Systems</b></p> <p>Students examine the interactions of human body systems as they explore identity, power, movement, protection, and homeostasis. Exploring science in action, students build organs and tissues on a skeletal Manikin®; use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration; and take on the roles of biomedical professionals to solve real-world medical cases.</p>
<p><b>Medical Interventions</b></p> <p>Students follow the life of a fictitious family as they investigate how to prevent, diagnose, and treat disease. Students explore how to detect and fight infection; screen and evaluate the code in human DNA; evaluate cancer treatment options; and prevail when the organs of the body begin to fail. Through real-world cases, students are exposed to a range of interventions related to immunology, surgery, genetics, pharmacology, medical devices, and diagnostics.</p>	<p><b>Biomedical Innovations</b></p> <p>In the final course of the PLTW Biomedical Science sequence, students build on the knowledge and skills gained from previous courses to design innovative solutions for the most pressing health challenges of the 21st century. Students address topics ranging from public health and biomedical engineering to clinical medicine and physiology. They have the opportunity to work on an independent design project with a mentor or advisor from a university, medical facility, or research institution</p>
<p><b>Biology</b></p> <p><del>This course will cover the basic areas of life science, with emphasis on general scientific concepts such as the cell and its environment, photosynthesis, protein synthesis, DNA, and genetics. Approximately one nine weeks will be spent on plant life cycle and one nine weeks on animal life cycles.</del></p> <p>In taking this course the student will utilize traditional classroom methods and scientific investigations in order to develop their scientific knowledge of the study of Life and Living Organisms. The students will learn science concepts related to the Scientific Method, Critical Thinking, General Science, and Biology.</p>	<p><b>General Biology Lecture Concurrent Credit</b></p> <p>This is an introductory biology class designed for non-majors or majors to fulfill an introductory biology requirement. Coursework includes the study of basic biological principles, plants, animals, microorganisms and the environment in which these organisms live. By studying these areas, the student is exposed to the major fields of biological study. This course must be taken in conjunction with General Biology Lab/CC.</p> <p>This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College.</p> <p>Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.</p>

~~Students taking this particular course will focus their studies mostly on topics related to General Biology such as ecology, biochemistry, cells, photosynthesis/respiration, genetics and evolution. Instructional format will consist of lecture/discussion, cooperation in student-centered labs groups, development of projects, use of technology, and self inquiry.~~

### Honors Biology

The purpose of this course is to provide advanced sophomore students the ability to develop Biology process skills through exploratory experiences, laboratory and real-life applications in the biological sciences. Students will be expected to move at a faster pace than the regular level sophomore biology class in order to help prepare students for the rigors and challenges that they will experience in an upper level or college advanced science course.

The content includes the nature of science (matter, energy and chemical processes of life), cells (biology, reproduction and communication), Mendelian and molecular genetics (principles, diversity and biotechnologies), levels of organization (classification and taxonomy), structure, function and reproduction of microorganisms, plants and animals, Darwinian theories of evolution, biological selection, adaptations and changes in populations through time. Throughout the course, agricultural, food, medical technologies and careers in biological fields will also be addressed.

Laboratory investigations are an integral part of this course and include the use of scientific research, measurement, laboratory technologies and safety procedures.

### Human Anatomy & Physiology Concurrent Credit

This introductory course is a study of the function, structure and interrelationships of the various organs and systems of the human body. Coursework is designed to meet the needs of those students interested in allied health sciences.

Prerequisites: It is strongly recommended that all learners complete either BIOL 111/BIOL 112 or BIOL 251/BIOL 252 prior to enrolling in this course.

### Chemistry

This course is directed toward the college bound students to give them an understanding in chemical theory, which will be beneficial in advanced science classes. The non-science oriented student will obtain basic scientific knowledge to help them better cope with science in their daily lives. The student will learn to work with a periodic table and to write and balance chemical equations. The topics studied will include the mole concept, the gas laws, ionization, acid-base theory, periodicity, atomic theory, solutions, and types of reactions. There will be problems related to all areas of studies.

### Honors Chemistry

A challenging course designed to give students the opportunity to go into greater detail on topics covered, as well as give students increased responsibility. This course is dedicated toward college bound students to give them an understanding in chemical theory, which will be beneficial in advanced science classes. The non-science career-oriented students will obtain basic scientific knowledge to help them better cope with science in their daily lives. The students will learn to work with a periodic table and to write and balance chemical equations. The topics studied will include the mole concept, gas laws, ionization, acid-base theory, periodicity, atomic theory, solutions, and types of reactions. There will be problems related to all areas of studies. Laboratory investigations will also be an integral part of this course, and will include the use of scientific research, measurement, laboratory technologies, and safety procedures

### Physics

After a brief introduction to units and vectors, several areas will be examined. Mechanics is the study of

### Intro to Chemistry Lecture Concurrent Credit

This course is designed for those students needing a beginning course in general chemistry or for science majors

force and motion, acceleration and velocity, work, and energy. The properties of light are studied and three classical models are explored. Electricity and magnetism and a survey of nuclear physics, conclude the course.

who have no high school chemistry. It is a study of the basic principles, laws, and theories of chemistry, and will aid the student in developing an understanding of the role of chemistry in the world today. In addition, it will provide a strong foundation for those continuing in chemistry. This course must be taken in conjunction with Intro to Chemistry Lab/CC. Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.

### Sports Medicine

Sports Medicine I will provide students an overview of the specialized health care needed in the wide world of sports and physical activity. Students will learn what sports medicine is and the multidisciplinary approach to athletic health care. The course will also introduce students to basic body systems in addition to the physical and mental demands of physical activity at all levels. The students will be introduced to such things as kinesiology, bleeding and shock, the bones and soft tissue, the foot, ankle, and lower leg, the knee, the hip and pelvis, the elbow, wrist, and hand, the shoulder, the chest and abdomen, the head and face, the spine, and lastly special considerations in athletes

### Sports Medicine II

Sports Medicine II will provide students a hands-on approach to Athletic Training. Topics to be covered are the central training room, the athletic training student-aid program, emergency preparedness, injury game plan, the pre-participation physical examination, rehabilitation and preseason conditioning, nutrition and the athlete, dietary supplements and performance enhancers, sports psychology, assessment and evaluation of sports injuries, therapeutic physical modalities, and proper taping and wrapping. This course allows students to do a series of clinical internships with medical professionals in the community pertaining to sports medicine. These internships are designed for students who have a serious interest in pursuing a career in the sports medicine field.

### Physical Therapy

Physical Therapy courses provide students with the knowledge and skills necessary to work with patients who need to achieve and maintain functional rehabilitation and to prevent malfunction or deformity. Topics covered typically include therapeutic exercises and activities (such as stretching and strengthening), how to train patients to perform the activities of daily living, the use of special equipment, and evaluation of patient progress.

### Care of Athletes

Care of Athletes courses provide students with the knowledge and skills to understand and perform therapeutic tasks that would be designated by an athletic or fitness trainer. Topics covered may include taping and bandaging, proper use of protective padding, treatment modalities, anatomy and physiology, and medical terminology. Students may learn to measure cardiorespiratory endurance, muscular strength and endurance, flexibility, body composition, and blood pressure. More advanced topics may include injury assessment, the phases of healing, and the use of exercise and equipment to help in the reconditioning of injured athletes.

### Environmental Science

Environmental Science is a curriculum that is designed to introduce students to major ecological concepts and environmental problems that affect the world in which we live. The course will analyze man's relationship, interactions and impact on Earth. Major topics integrated into the curriculum include the study of ecology and natural resources. Energy, recycling, pollution, population dynamics and cultural perspectives will be studied and incorporated to promote awareness and understanding

### Intro to Energy

~~Students will be exposed to the many facets of the wind industry this course will cover basic principles of wind energy conversion. The wind industry worldwide is growing faster than any other energy source. Class topics will not only cover the mechanical, technical, and electrical aspects of wind energy but also environmental, social, political and economic aspects of wind energy.~~

An Introductory course designed to teach students about the occupations in the Energy field and the skills required for those occupations.

The following topics will be introduced: Types of energy, how humans utilize energy, electricity generation and usage, energy audits, global warming and the use of alternative, more environmentally friendly sources of energy.

Emphasis will be placed on renewable sources such as solar and wind energy. This course is a prerequisite for those students interested in pursuing furthering their studies in the wind energy program.

### **Earth and Space Science**

This course is designed to study the geology of planet Earth, and its place in the solar system and the galaxy. Plate tectonics is the driving force of the geology of our planet and will be studied in depth. Astronomy topics will include the earth-moon-sun system, small and large bodies in the solar system, stellar evolution, and galaxies. Field trips to local geological sites and astronomical observatories are possible depending upon resources and time.

### **Human Physiology**

This course is designed to give the student a basic understanding of the structure and functions of the human body. A review of the cell structure and its function are covered, followed by an exploration of the gross skeletal and muscular systems. The remainder of the course will deal with the nervous, digestive, circulatory, respiratory, endocrine, reproductive, excretory, and integumentary systems.

<b>Health Science IV Shadow/Work</b>	<b>Health Science V Shadow/Work</b>
--------------------------------------	-------------------------------------

<p>This course connects classroom learning to experience in a workplace setting. Students will design a field study that meets their personal and professional goals. The workplace experience may include critical analysis and reflection on an occupation, understanding workplace culture, setting and achieving goals, and making connections between learning and the field study.</p>	<p>This course connects classroom learning to experience in a workplace setting. ### 21st Century Skills

The general focus of the class is founded in business, marketing, and finance, but there will be many objectives embedded in the curriculum which will lead to preparing freshmen students for life in the 21<sup>st</sup> Century. Students will be exposed to units on personal finance, job interviewing and applying skills, study and work habits that will enable them to be successful in high school, college and at work.

### Introduction to Business

An introductory course that examines the skills needed to be a successful entrepreneur. This course will also explain the role and purpose of business in our economic system. The course emphasizes what everyone should know to perform effectively as a consumer, worker, and citizen in the free enterprise system.

<b>Business Management</b>	<b>Money Management 101</b>
<p>Business Management courses to acquaint students with management opportunities and effective human relations. These courses provide students with the skills to perform planning, staffing, financing, and controlling functions within a business. In addition, they usually provide a macro-level study of the business world, including business structure and finance, and the interconnections among industry, government, and the global economy. The course may also emphasize problem-based, real-world applications of business concepts and use accounting concepts to formulate, analyze, and evaluate business decisions.</p>	<p>This Course teaches students how to identify and manage their resources for achieving consumer goals. The student is taught to manage resources to achieve personal and family goals; to make informed consumer decisions; to create financial stability; and to maintain a healthy living environment. Students will learn how to make wise decisions about food, clothing, transportation, housing, credit, savings, investments, citizenship, the environment, and more. Process Skills, Career Development Skills, and FCCLA are integrated throughout this course.</p>
<b>Computer Concepts &amp; Applications</b>	<b>Digital Marketing</b>
<p>This course consists of a survey of applications, information needs in business, microcomputers, and information systems designed to meet these needs. Standard software packages available to support a microcomputer-based executive workstation will be reviewed. Included are descriptions of and hands-on work disk operating systems, word processing, electronic spreadsheets, file management systems, and local area networks.</p>	<p>This course covers the principles and functions of marketing from the standpoint of conducting business on the internet. Typically, students develop these useful skills; using the internet as a marketing tool, conducting a marketing analysis via the internet, planning marketing support activities, managing an electronic marketing campaign, managing/owning a business via the internet, and analyzing the impact of the internet on global marketing.</p>
<b>Graphic Design</b>	<b>Intro to Marketing</b>
<p>Students enrolled in Graphic Design will develop an understanding of the graphic design process. Topics include analyzing the design elements and principles, exploring industry tools, software and equipment, and learning composition techniques to develop a quality product. This course is a Fine Arts credit.</p>	<p>Principles of Marketing courses offer students insight into the processes affecting the flow of goods and services from the producer to the consumer. Course content ranges considerably as general marketing principles such as purchasing, distribution, and sales are covered; however, a major emphasis is often placed on kinds of markets; market identification; product planning, packaging, and pricing; and business management.</p>
<b>Applied Business Development</b>	<b>Sports/Entertainment Marketing</b>
<p>Applied Business Development students will practice skills of planning, organizing, directing and controlling functions of operating a business while assuming the responsibilities and risk involved. Students will develop skills in enterprise development, market analysis and financial preparation.</p>	<p>Sports and Entertainment Marketing courses introduce students to and help them refine marketing and management functions and tasks that can be applied in amateur or professional sports or sporting events, entertainment or entertainment events, and the sales or rental of supplies and equipment.</p>
<b>Audio Video Production Fundamentals</b>	<b>Digital Media Technology</b>
<p>Audio Video Production Fundamentals provides a basic understanding of producing video for a variety of uses. Topics include analyzing the pre-production, production and post-production process, as well as explore the equipment and techniques used to develop a quality video production. This course is a Fine Arts credit.</p>	<p>Digital Media Technology teaches the technical skills needed to work with electronic media. Topics include exploring the use of digital imaging and video today and in the future, a study of the relationship of workflow to project planning and completion and the software, equipment and tools used in the industry.</p>

### Photo Imaging

Students enrolled in Photo Imaging will learn the technical skills needed to produce quality images for use in a variety of applications. Topics include use of equipment, software and techniques to take, edit and manipulate digital images. Students will compose photographs and create designs and graphics, because of this aspect of photography, students may count this course as a fine arts credit.

### Marketing Applications

This course furthers student understanding and skills in the various marketing functions. Students coordinate channel management with other marketing activities, discuss the nature of marketing plans, generate product ideas, coordinate activities in the promotional mix, and demonstrate specialized sales processes and techniques. Current technology will be used to acquire information and complete projects.

### Television Broadcasting

Video Production provides students with: 1) an introduction to the process of planning for a television production; 2) the opportunity to use equipment needed to produce a television program; and 3) the experience of collecting materials to edit and produce a finished program ready to be televised. The content will be presented through lecture and class laboratory activities that allow for students to use their creative thinking skills. The goal is to provide a large spectrum of the television industry in and out of class. Students will have the opportunity to produce live in-house productions, as well as live activities and sporting events out of class. This course is a Fine Arts credit.

### Computer Science Principles

The course introduces students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity, and how computing impacts our world. Students will develop the computational thinking skills needed to fully exploit the power of digital technology and help build a strong foundation in core programming and problem-solving.

### ~~Picture Perfect~~

~~This course will expose students to the publication industry and give them an opportunity to produce the school yearbook. Students will use creative thinking and problem solving skills, develop professional working relationships and explore the field of journalism as they work to produce the yearbook.~~

### Accounting I

Accounting courses introduce and expand upon the fundamental accounting principles and procedures used in businesses. Course content typically includes the full accounting cycle, payroll, taxes, debts, depreciation, ledger and journal techniques, and periodic adjustments. Students may learn how to apply standard auditing principles and to prepare budgets and final reports. Calculators, electronic spreadsheets, or other automated tools are usually used. Advanced topics may include elementary principles of partnership and corporate accounting and the managerial uses of control systems and the accounting process. This course may count as a 3rd or 4th year Math credit.

### Advanced Accounting

Advanced Accounting expands upon the foundational accounting principles and procedures used in business. Course content typically includes the full accounting cycle, payroll, taxes, debts, depreciation, ledger, and journal techniques, and periodic adjustments. Students learn how to apply standard auditing principles and to prepare budgets and final reports. Calculators, electronic spreadsheets, and other automated tools are usually used. Topics may include elementary principles of partnership and corporate accounting and the managerial uses of control systems and the accounting process and further enhancement of accounting skills. This course may count as a 3rd or 4th year Math credit

### Designing for Pay

This course is a project-based class designed to give students workplace experience by completing projects for local businesses and community members. Students will work with the teacher and potential clients from concept development to delivery of the final product. During this time students will demonstrate their graphic design skills, time management skills and communication skills. Students will utilize a multitude of software packages and equipment that is used in the workplace in creating identity packages (logos and branding), publications (magazines, newspapers, newsletters, etc.), advertisements and product packaging. This course is a Fine Arts credit

<b>Investing</b>	<b>Digital Marketing</b>
<p>Investing courses emphasize the formulation of business and individual investment decisions by comparing and contrasting the investment qualities of cash, stock, bonds, and mutual funds. Students typically review annual reports, predict growth rates, and analyze trends. Stock market simulations are often incorporated into Investing courses.</p>	<p>Digital Marketing covers the principles and functions of marketing from the standpoint of conducting business on the Internet. Students will work with local area businesses on providing marketable videos, beginning in the planning stages, transitioning to the filming and editing stages and ending with the presentation of the finished video.</p>
<b>21st Century Journalism</b>	<b>The Comet</b>
<p>21st Century Journalism promotes the development of the skill set needed today and in the future. Students will explore the role media and the communications industry has in society, develop the technical skills related to journalistic writing and interviewing, as well as understand the ethical and legal issues related to the field.</p>	<p>The Comet Online will provide students with the opportunity to apply the fundamental technique learned in Digital Media Technology course as well as the topics covered in 21st Century Journalism through the production of a multimedia project for public presentation. Topics include developing a production schedule, working as a team, utilizing composition principles and embedding audio, video or other content in digital formats.</p>
<b>Leadership Service in Action</b>	<b>Engineering Design</b>
<p>Provide student leaders with frameworks, tools, techniques, situations and concepts that will help them develop as leaders, create opportunities for them to apply these things “on the job” as leaders at the school, and provide coaching, feedback and mentoring to facilitate their growth and development, today and in the future.</p>	<p>Engineering Design courses offer students experience in solving problems by applying a design development process. Often using solid modeling computer design software, students develop, analyze, and test product solutions models as well as communicate the features of those models.</p>
<b>Principles of Engineering</b>	<b>Engineering Design &amp; Development</b>
<p>A Technical level course designed to expand student knowledge in the area of applied engineering and allow students to apply learning related to multiple topics in the field of Engineering.</p>	<p>Engineering Design and Development courses provide students with the opportunity to apply engineering research principles as they design and construct a solution to an engineering problem. Students typically develop and test solutions using computer simulations or models but eventually create a working prototype as part of the design solution.</p>
<b>Finance Workplace Experience</b>	<b>Business Management &amp; Entrepreneurship Workplace Experience</b>
<p>Workplace Experience courses provide students with work experience in fields related to finance. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace</p>	<p>Application Level: Business Management Workplace Experience courses provide students with work experience in fields related to business management. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace. Students are able to take Business Management Workplace Experience as a .5 credit course or year-long 1 credit course for a more in-depth study of the business management industry</p>
<b>Engineering Workplace Experience</b>	<b>Marketing Workplace Experience</b>
<p>Application level workplace experience/internship completed by students at a business location or within the school that is an engineering occupational experience.</p>	<p>Workplace Experience provides students with work experience in fields related to finance. Goals are typically set cooperatively by the student, teacher, and employer (although students are necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace.</p>

### Marketing Applications

Marketing Applications furthers student understanding and skills in the various marketing functions. Students coordinate channel management with other marketing activities, discuss the nature of marketing plans, generate product ideas, coordinate activities in the promotional mix, and demonstrate specialized sales processes and techniques. Economic and financial concepts are also stressed throughout the course. Current technology will be used to acquire information and to complete the projects. Throughout the course, students are presented problem solving situations for which they must apply academic and critical-thinking skills.

### Yearbook

The goal of this course is to provide the student with work-based learning opportunities in graphic design. It will be focused on applying technical skills to solve real-world graphic design problems. This course will also provide graphic design instruction in the organization and presentation of his or her work in a portfolio format of professional quality. A portfolio, digital portfolio archive, self-promo, resume and business ensemble will be produced. Instruction in interviewing techniques and employment searches will also be provided.

### Introduction to Engineering

An Introductory level course designed to introduce students to concepts in Engineering with a focus on Science, Technology, Engineering, & Math; including units on safety and tools, computer use, design, automation, robotics, space, flight, and electricity.

### Computer Applications - Esports

In Computer Applications courses, students acquire knowledge of and experience in the proper and efficient use of previously written software packages. These courses explore a wide range of applications, including (but not limited to) word-processing, spreadsheet, graphics, and database programs, and they may also cover the use of electronic mail and desktop publishing.

## FOREIGN LANGUAGE

Course Title	Credit	9	10	11	12	Prerequisite
Spanish I	1	X	X	X	X	None
Spanish II	1	X	X	X	X	Spanish I
Spanish III	1		X	X	X	Spanish II
Spanish IV	1			X	X	Spanish III
Spanish V	1			X	X	Spanish III

### Spanish I

This course is designed to give the student an opportunity to explore his ability and interest in the language. This part of the course stresses almost exclusively the listening-speaking aspect of language learning, using textbooks very little. Reading and writing are introduced phonetically. The object of the course is to give the students the skills necessary to begin expressing themselves in the language. Textbooks are used primarily for the purpose of learning to read and write those things that they have already

### Spanish II

This course is basically a continuation of Spanish I. Listening-speaking skills are still stressed with a gradual increase in reading and writing skills. The student eventually studies all the basic structural patterns used to communicate in Spanish. Upon successful completion of this course, the student will be ready to pursue the more advanced and more specialized Spanish courses.

learned to understand and say. Stress is placed on listening-speaking skills with further emphasis on reading and writing. Students should begin to be able to express themselves in both speech and writing and be able to understand more complex phrases. The student should be able to carry on short sustained conversations and to write short compositions.

### Spanish III

This is an advanced level course designed to develop the student's vocabulary, reading and speaking skills, and to teach students the basic principles of translation. One of the major goals of the course is to help students prepare for advanced level college classes

### Spanish IV & V

These courses are designed to reinforce and build on previously acquired knowledge through the study of culture and literature. Selected grammar points and vocabulary will be presented through selected readings, cultural units, and conversation units. Emphasis will be placed on reading, speaking, and composition in Spanish.

*Spanish IV and Spanish V are taught in alternate years, one being taught one year, the other the next. Students in the class who have had three years of Spanish receive credit for Spanish IV. Those with four years of Spanish receive credit for Spanish V. The only difference between the two classes is the specific content. They are both the same level of difficulty.*

## FAMILY & CONSUMER SCIENCES

Course Title	Credit	9	10	11	12	Prerequisite
Culinary Essentials	.5	X	X	X	X	None
Career & Life Planning	.5	X	X	X	X	None
Culinary Arts I	1		X	X	X	Culinary Essentials
Culinary Arts II	.5			X	X	Culinary Arts I
Baking and Pastry I	.5		X	X	X	Culinary Arts I
Baking and Pastry II	.5			X	X	Baking and Pastry I Culinary Arts I
Human Growth & Development	.5	X	X	X	X	None
Family Studies	.5	X	X	X	X	None
Culinary Workplace Experience	1				X	2 previous hospitality courses
Career & Community Connections	1			X	X	Completion of the introduction and technical courses in the Human Services and Restaurant & Event Planning Pathway
Teaching as a Career	1	X	X	X	X	None
Teaching Internship	1				X	Teaching as a Career
Education – Workplace Experience	1				X	Two courses in the approved pathway.

### Culinary Essentials

This course was designed to give a thorough overview to the foodservice portion of the overall industry. Investigate dry heat food production methods. Investigate moist heat food production methods. Investigate combination food production methods. Investigate cold food production

### Culinary Arts I

This course integrates the knowledge, skills and practices required for careers in the restaurant industry. Topics include the sources, symptoms and prevention measures for common food illnesses, meal management, correct use of food production equipment and production and facility management principles. Students will also begin to develop culinary skills for a variety of food products.

<b>Culinary Arts II</b>	<b>Baking and Pastry I</b>
<p>This course builds upon the Culinary Arts I course by expanding student knowledge, skills and practices. Whereas Culinary Arts I focused on beginning culinary skill development, Culinary Arts II expands those skills as well as adds topics such as event management, internal and external customer service and working with special dietary needs.</p>	<p>This course looks at the baking and pastry industry, and the equipment and procedures required. Topics include baking science, ingredient function and methods used for a quality product based upon industry standards.</p>
<b>Baking and Pastry II</b>	<b>Human Growth &amp; Development</b>
<p>This course builds upon the Baking and Pastry I course by refining and expanding skills of production management. Topics also include analyzing the scientific reactions during production and expanding the skill development to address the finer aspects of the field.</p>	<p>This course is an introduction to human development including child development and all other life stages. Students are provided with knowledge about physical, mental, emotional, and social growth and development. Interpersonal relationship skills for all stages of life are explored with an emphasis on building interpersonal skills with children. Management Skills, Process Skills, Career Development Skills, and FCCLA are integrated throughout this course.</p>
<b>Family Studies</b>	<b>Teaching as a Career</b>
<p>This course emphasizes building and maintaining healthy interpersonal relationships among family members and other members of society. Topics explored include family structures, functions of the family unit, roles and responsibilities of parents, balancing work and childcare needs, and growth and development of children. Management Skills, Process Skills, Career Development Skills, and FCCLA are integrated throughout this course.</p>	<p>This course is to introduce students to the principles of teaching and the responsibilities and duties of teachers.</p>
<b>Event Planning &amp; Management</b>	<b>Career &amp; Community Connections</b>
<p>This course provides students with the knowledge and skills related to the event planning and implementation process. It will include establishing client relationships, the importance of communication, planning process, resource management, quality service and staffing issues.</p>	<p>Career and Community Connections is an application level course that applies the technical skills in careers related to the needs of providing the needs of humans. This professional learning experience provides the opportunity for learners to focus on 21<sup>st</sup> century skills, and acquire job-seeking and retention skills needed to advance within the workplace. Leadership is a main focus of this course.</p>
<b>Teaching Internship &amp; Education Workplace Experience</b>	<b>Culinary Workplace Experience</b>
<p>Internship &amp; Workplace Experience courses provide students with work experience in fields related to education. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace.</p>	<p>Restaurant, Food, and Beverage Services—Workplace Experience courses provide work experience in fields related to restaurant, food, and beverage services. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace. Formerly Restaurant, Food and Beverage Services—Workplace Experience</p>
<b>Career &amp; Life Planning</b>	

This course guides students to link their options and skills for success in careers, families, and communities. The student is taught to develop a life management plan for life beyond high school; to care for self and others; and to plan to assure career success and to coordinate personal and career responsibilities. Personal life choices made now and throughout life determine quality of life. Through the integration of Process Skills, Career Development Skills, and FCCLA, students discover their strengths, target goals, and initiate a plan for achieving the lifestyle they desire.

# AGRICULTURE, FOOD, & NATURAL RESOURCES

\*\* This is a Neosho County Community College course taught by Chanute High School staff during the school day. Students will be required to complete all NCCC course objectives. The student must pay tuition, fees, and book costs for the course

<b>Introduction to Agriculture</b>	<b>Agriscience</b>
<p><del>The Introduction to Agriculture course provides students with the opportunity to explore various aspects of the agricultural industry such as plant science, animal science, agriscience, and agribusiness</del></p> <p>Introduction to Agriculture courses survey a wide array of topics within the agricultural industry, exposing students to the many and varied types of agriculture and livestock career opportunities and to those in related fields (such as natural resources). These courses serve to introduce students to the agricultural field, providing them an opportunity to identify an area for continued study or to determine that their interest lies elsewhere. They often focus on developing communication skills, business principles, and leadership skills.</p>	<p>Agriscience introduces the scientific agricultural approach to animal science and selection, plant and land science, and agricultural mechanics. Agricultural career opportunities will be emphasized in each class.</p>
<b>Introduction to Welding</b> <del>Ag Welding II</del>	<b>Ag Fabrications</b>
<p>Agricultural Metal Fabrication Technology courses provide students with the skills and knowledge that are specifically applicable to the tools and equipment used in the agricultural industry. In learning to apply basic industrial knowledge and skills (engines, power, welding, and carpentry, among others), students may explore a broad range of topics, including the operation, mechanics, and care of farm tools and machines; the construction and repair of structures integral to farm operations; an introduction or review of electricity and power; and safety procedures. <del>This course provides students with the skills &amp; knowledge that are specifically applicable to the welding industry with advanced blueprint reading and welding in the OH, V, and H position along with pipe welding and TIG welding that could result in welding certification.</del></p>	<p>This course provides students with the skills &amp; knowledge that are specifically applicable to the construction, maintenance, and repair of structures integral to the agricultural industry, including but not limited to animal enclosures, irrigation systems, &amp; storage facilities. In these courses, students typically study design, planning, and construction knowledge and skills, in addition to the safe operation of tools and machines. This class will teach proper use of a CNC machine.</p>
<b>Small Gas Engines</b>	<b>Ag Power</b>
<p>Courses provide students with the opportunity to learn how to service &amp; recondition small engines, typically emphasizing two and four-cycle engines. Courses provide students with opportunities to troubleshoot and repair speed controls, lubrication, ignition, fuel, power transfer, cooling, exhaust, and starting systems; use hand, power, and overhaul tools; and read and interpret service manuals and parts' catalogs. Applications may include lawn mowers, tractors, tillers, power tools</p>	<p>Courses enable students to understand the principles underlying various kinds of mechanics (aircraft, auto, diesel, &amp; marine) and how energy is converted, transmitted, &amp; controlled. Topics typically include maintaining &amp; servicing machines, engines &amp; devices while emphasizing energy sources, electricity, and power transmission. The courses may also provide information on career opportunities within the field of mechanics and/or transportation</p>
<b>Ag Mechanics &amp; Equipment</b>	<b>Ag Structures</b>

Agriculture Mechanics/Equipment/Structures courses provide students with the skills and knowledge that are specifically applicable to the tools and equipment used in the agricultural industry. While learning to apply basic industrial knowledge and skills (engine mechanics, power systems, welding, and carpentry, among others), students may explore a broad range of topics, including the operation, mechanics, and care of farm tools and machines; the construction and repair of structures integral to farm operations; a study of electricity and power principles; and safety procedures.

Agriculture Structures courses provide students with the skills and knowledge that are specifically applicable to the construction, maintenance, and repair of structures integral to the agricultural industry, including but not limited to animal enclosures, irrigation systems, and storage facilities. In these courses, students typically study design, planning, and construction knowledge and skills (such as survey, carpentry, plumbing, concrete, and electrical systems), in addition to the safe operation of tools and machines

**Advanced Ag Mechanics**

Agriculture Mechanics and Equipment courses provide students with the engineering and power technology principles, skills, and knowledge that are specifically applicable to the agricultural industry. Typical topics include the operation, maintenance, and repair of power, electrical, hydraulic, and mechanical systems.

**Ag Welding I**

This course provides students with the skills and knowledge that are specifically applicable to the tools and equipment used in the agricultural industry. In learning to apply basic industrial knowledge and skills (engines, power, welding, and carpentry, among others), students may explore a broad range of topics, including the operation, mechanics, and care of farm tools and machines; the construction and repair of structures integral to farm operations; an introduction or review of electricity and power; and safety procedures.

<b>Agriculture Food Science</b>	<b>Plant and Animal Science</b>
<p>Food Science is an applied science of food production, processing, transporting, storage, toxicology and quality control. Students apply the scientific method of discovery as they study the biological and chemical basis of food preparation, processing and preservation</p>	<p>This course provides content related to both animal production and plant production, providing comprehensive coverage of the production functions of the agricultural industry. Topics such as care and management of farm animals, crop production and harvesting, plant and animal insect and disease control, efficient resource management and farm management and food processing.</p>
<b>Advanced Plant and Animal Science</b>	<b>Animal Science</b>
<p>This course provides content related to both animal production and plant production, providing comprehensive coverage of the production functions of the agricultural industry. Topics such as care and management of farm animals, crop production and harvesting, plant and animal insect and disease control, efficient resource management and farm management and food processing.</p>	<p>Animal Science includes the production of animals for food, fiber, and companionship. During this course we will study animal production systems and their relevance to the world population. Topics covered will include careers in animal science, animal nutrition, digestion, reproduction, anatomy and physiology, health, as well as consumer animal products. Students will be encouraged to further their leadership and career development skills through the FFA. Every student will be required to have and complete records on a Supervised Agricultural Experience Program.</p>
<b>Advanced Animal Science (Large Animal Care)</b>	<b>Horticulture</b>
<p>Large Animal Care courses focus on the care and management of large animals. Animal nutrition, health, behavior, reproduction and breeding, anatomy and physiology, facilities, use of qualitative and quantitative analyses for decision making, facilities, handling and training, and grooming are typical areas of study. Course topics may include product processing and marketing</p>	<p>An introduction to the principles and practices in the development, production and use of horticultural crops (fruits, vegetables, greenhouse, turf, nursery, floral and landscape). Includes the classification, structure, growth and development, and environmental influences on horticultural plants: horticultural technology: and an introduction to the horticultural industries.</p>
<b>Horticulture II</b>	<b>Floriculture &amp; Greenhouse Management</b>
<p>Applications in Horticulture provide instruction that incorporates plant science, soil and media mixtures, plant identification and optimal environments, and landscape design. This course will expose students to the art and science of growing plants, shrubs, trees, flowers, fruits, agriculture crops and vegetables. The course emphasizes applying such knowledge &amp; skill to the design, establishment, and maintenance of lawns, parks, open space &amp; similar environments. This course would include opportunities to design public and private spaces. Students will have the opportunity to produce, market different types of greenhouse plants grown in the school's greenhouse. Skills in management, plant identification, pests control, starting plants, watering, fertilizing, and salesmanship will be developed.</p>	<p>Plant Identification and floral design are necessary knowledge skills along with the selection of greenhouse plants and management of greenhouses for production of plants and flowers in the industry.</p>

<b>Ag Welding I</b>	<b>Agriculture Leadership &amp; Communications</b>
<p>This course provides students with the skills and knowledge that are specifically applicable to the tools and equipment used in the agricultural industry. In learning to apply basic industrial knowledge and skills (engines, power, welding, and carpentry, among others), students may explore a broad range of topics, including the operation, mechanics, and care of farm tools and machines; the construction and repair of structures integral to farm operations; an introduction or review of electricity and power; and safety procedures.</p>	<p>Students will analyze current agricultural issues, determine how they affect people on all sides of the issue and enhance their written and oral communication skills by presenting their views and opinions to the class through debates, speeches, and interviews in order to be effective leaders in today's society. Students will gain the knowledge and leadership experiences to help them to become successful in life and in the workplace; thus, enhancing their potential for leadership development, personal growth, and career success. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.</p>
<b>Ag Welding II</b>	<b>Ag Fabrications</b>
<p>This course provides students with the skills &amp; knowledge that are specifically applicable to the welding industry with advanced blueprint reading and welding in the OH, V and H position along with pipe welding and TIG welding that could result in welding certification.</p>	<p>This course provides students with the skills &amp; knowledge that are specifically applicable to the construction, maintenance, and repair of structures integral to the agricultural industry, including but not limited to animal enclosures, irrigation systems, &amp; storage facilities. In these courses, students typically study design, planning, and construction knowledge and skills, in addition to the safe operation of tools and machines. This class will teach proper use of a CNC machine.</p>
<b>Small Gas Engines</b>	<b>Ag Power</b>
<p>Courses provide students with the opportunity to learn how to service &amp; recondition small engines, typically emphasizing two and four-cycle engines. Courses provide students with opportunities to troubleshoot and repair speed controls, lubrication, ignition, fuel, power transfer, cooling, exhaust, and starting systems; use hand, power, and overhaul tools; and read and interpret service manuals and parts' catalogs. Applications may include lawn mowers, tractors, tillers, power tools</p>	<p>Courses enable students to understand the principles underlying various kinds of mechanics (aircraft, auto, diesel, &amp; marine) and how energy is converted, transmitted, &amp; controlled. Topics typically include maintaining &amp; servicing machines, engines &amp; devices while emphasizing energy sources, electricity, and power transmission. The courses may also provide information on career opportunities within the field of mechanics and/or transportation</p>
<b>Ag Structures</b>	<b>Advanced Ag Mechanics</b>
<p>Agriculture Structures courses provide students with the skills and knowledge that are specifically applicable to the construction, maintenance, and repair of structures integral to the agricultural industry, including but not limited to animal enclosures, irrigation systems, and storage facilities. In these courses, students typically study design, planning, and construction knowledge and skills (such as survey, carpentry, plumbing, concrete, and electrical systems), in addition to the safe operation of tools and machines</p>	<p>Agriculture Mechanics and Equipment courses provide students with the engineering and power technology principles, skills, and knowledge that are specifically applicable to the agricultural industry. Typical topics include the operation, maintenance, and repair of power, electrical, hydraulic, and mechanical systems.</p>
<b>Internship in Agriculture</b>	<b>Advanced Internship in Agriculture</b>
<p>Students will intern and gather work experience with industries from the community in the use of equipment and materials of production in the intern's interest for their major field.</p>	<p>. Advanced Internship in Agriculture -- Full year course (1 unit) Course No. C1519 This course allows additional time for students to be exposed to careers in an internship area as related to the AFNR cluster in a specific career.</p>

## Animal Health

Course imparts information about the causes, diagnosis, and treatment of diseases and injuries of animals, typically emphasizing domestic and farm animals. Course topics focus on anatomy and physiology, nutrition, behavior, and reproduction, but may also include other areas of study as appropriate.

## ART

Course Title	Credit	9	10	11	12	Prerequisite
Intro to Art	.5	X	X	X	X	None
2D I	.5	X	X	X	X	Intro to Art
2D II	.5		X	X	X	2D I
3D I	.5		X	X	X	Intro to Art
3D II	.5		X	X	X	Intro to Art, 2D I or 3D I
Advanced Art	.5		X	X	X	2D II or 3D II
*Art Appreciation Concurrent Credit	.5			X	X	None

\*Takes place on the NCCC campus and is taken as a college class.

### Intro to Art

This course offers general exposure to the Chanute High School art department: Projects will be completed in drawing, painting, and printmaking. This course will give a broad overview of the advanced individual classes available to students upon completion of Introduction to Art. Grading will be based on projects relating to each area. All work will be done in class, so daily attendance, attitude, and work habits are important.

### 2D I

This is a course to explore the many aspects of drawing. Work will include drawings done in pencil, charcoal, pastel, pen and ink, colored pencil, and collage. Subject matter will range from still life and abstract, to landscape and portraiture. Grading will be determined by the student's attitude and work habits in respect to assignments during the semester.

### 2D II

This course is a further examination into techniques of drawing for the serious art student. Work habits and quality of work done during the semester will determine grading

### 3D I

This is a class dealing in the media of watercolors and acrylics, with subject matter ranging from still life and non-objective to landscape and portraiture. Basic work on mixing hues, composition, painting techniques, and styles will be included. Grading will be determined by the student's attitude and work habits in respect to paintings, which will be completed in the classroom

### 3D II

### Advanced Art

This course is a further examination into techniques of painting for the serious art student. Particular attention will be paid to the student's specific interests in painting and some work on collage. Work habits and quality of work done during the semester will determine grading.

This course is designed for the serious art student. Students will have the opportunity to explore areas of art interest. Problem solving and critical thinking strategies will be implemented in course projects. Grading will be determined by the student's attitude, work ethic, and projects completed in respect to this course.

### Art Appreciation Concurrent Credit

This course is an investigation of works of art via description, analysis, interpretation and expressed value judgments in order to gain an appreciation of said works.

This course is offered as part of the Southern High School Initiative and is held on the campus of Neosho County Community College.

Students will be required to complete all NCCC course objectives. The student must pay tuition and books for the course.

## MUSIC

Course Title	Credit	9	10	11	12	Prerequisite
Marching/ Concert Band	1	X	X	X	X	None
Advanced Instrumental Music/ Jazz Band	1		X	X	X	Marching/Concert Band
Select Ensemble	1		X	X	X	Audition
Women's Ensemble	1	X	X	X	X	None
Men's Ensemble	1	X	X	X	X	None
General Music	.5	X	X	X	X	None
Concert Choir	1	X	X	X	X	None
Musical Production Introduction	.5	X	X	X	X	None
*Music Appreciation Concurrent Credit	.5			X	X	None

\*Takes place on the NCCC campus and is taken as a college class.

### Marching/ Concert Band

This course consists of marching band during the football season and changes to concert band for the remainder of the year. The band will participate in marching and concert festivals as well as parades, half-time shows, and concerts. Students may enter band at the beginning of second semester for 1/2 unit credit but may not drop band at the end of first semester without special permission from the instructor and principal.

### Advanced Instrumental Music

Individual Technique—Instrumental Music courses provide individuals with instruction in instrumental techniques. These courses may be conducted on either an individual or small group basis.

**Select Ensemble**

This is a select choral ensemble that requires an audition, before enrollment is approved. Members need to possess sound music fundamentals in sight-reading and ear training, primary consideration for selection will be voice quality, while secondary consideration will be choreographic skills. Literature performed will have a wide range that will include classical, popular, and Broadway selections. Group members will represent the school and community on several occasions throughout the year, and must be willing to devote time outside of regular in school rehearsal to prepare.

**Women's Ensemble**

This is a soprano and alto ensemble for all grades ensemble composed of students in grades 9 and 10. Fundamentals of ear training and sight-reading skills will be reviewed. Literature performed will range from classical, sacred, secular to popular, and Broadway selections. The main thrust in performances will be a Christmas and Spring concert and KSHSAA Festival.

**Men's Ensemble**

This is a tenor and bass ensemble for all grades. Fundamentals of ear training and sight-reading skills will be reviewed. Literature performed will range from classical, sacred, secular to popular, and Broadway selections. The main thrust in performances will be a Christmas and Spring concert and KSHSAA Festival.

**General Music**

This is a non-performance class. This course is designed to explore the rich tapestry of musical history through the lens of influential composers and their masterpieces. This course will take students on a journey from the origins of music to contemporary styles, highlighting key figures and movements that have shaped the musical landscape

**Concert Choir**

This is a soprano, alto, tenor, bass ensemble for all grades. Fundamentals of ear training and sight-reading skills will be taught. The main thrust in performances will be a Christmas and Spring concert and KSHSAA Festival.

**Musical Production Introduction**

Integrated Fine Arts courses explore self-expression across the fine arts: any subset or all of the visual arts, music, drama, theater, and literature may be included in the curriculum for these courses. Students both study and critique the works of others and participate in or produce art themselves. These courses often include comparative study of various art forms over time (i.e., the interrelationship of literature, music, and the performing arts of a particular time period and culture).

**Music Appreciation Concurrent Credit**

This course emphasizes the development of listening skills with which the student may perceive and understand fundamental music elements as they are heard in various musical styles. This course acquaints the student with major composers and stylistic characteristics of music of the Middle ages, Renaissance, Baroque, Classical, Romantic, and Contemporary Periods.

## PHYSICAL EDUCATION

Course Title	Credit	9	10	11	12	Prerequisite
Physical Dimensions	1	X				None
CoEd General Physical Education	.5		X	X	X	Physical Dimensions
Strength and Conditioning	.5	X	X	X	X	Physical Dimensions
Walking	.5		X	X	X	None

### Physical Dimensions

All 9th grade students are required to take this freshman PE/Health year-long course. This course is designed to provide young adults with the knowledge and skills to enjoy a physically healthy lifestyle. The three areas of focus are: health-related fitness, lifetime physical activity, and health/wellness concepts and skills. To educate students to be well rounded physically, mentally, and socially, we provide a variety of team and individual activities with an emphasis on lifetime and fitness activities. Activities will depend upon facilities available and weather conditions. Appropriate attire is required. One-fourth of this course will be held in a classroom setting.

### CoEd General Physical Education

Students enrolling in this class should expect to be exposed to basic rules and beginning skill techniques of the various activities taught. The following is a partial listing of activities that may be included in this course: aerobic conditioning, archery, badminton, basketball, bowling, dance, floor tennis, football, Frisbee, golf, inline skating, jogging, jump rope, orienteering, pickleball, personal fitness/wellness, racquetball, self-defense, soccer, softball, team handball, tennis, various team games, volleyball, water activities, and weightlifting. Team play, sportsmanship, knowledge of rules, knowledge of skill techniques, and safety will be stressed. Appropriate attire is required.

### Strength and Conditioning

This course stresses the safety rules and terminology of weightlifting, as well as plyometric. Workouts in power, Olympic, and plyometric conditioning will be taught. Aerobic exercises in the form of games will be used on non-lifting days. Daily participation and improvement in the lifts will be criteria for grading. Appropriate attire is required.

### Walking

Students enrolling in this class should expect to participate in the oldest form of exercise, walking, and to gain a fitness walking knowledge base. An individualized walking program will be created by students and the instructor, which will incorporate decision-making, goal-setting, critical health skills, and the use of technology. Activities will vary with weather conditions and facilities available. Daily participation and improvement in fitness goals will be used as criteria for grading. Appropriate attire is required.

## MISCELLANEOUS

Course Title	Credit	9	10	11	12	Prerequisite
Financial Literacy	.5	X				None
Comet Focus	.5	X				None
ACT Prep	.5		X	X	X	None
Seminar	.25	X	X	X	X	None
Teachers Aid	.25	X	X	X	X	None
Drivers Education	.25	X	X	X	X	Minimum age of 14 when the application is submitted
Credit Recovery	.5		X	X	X	Enrollment subject to Teacher/Counselor/ Administration Review
Senior Project	.25				X	Application, enrollment subject to Counselor/ Administration Review
Work Based Learning	.5			X	X	Application enrollment is subject to Career & Technical Education Coord./Administration Approval
Early Release	0				X	Enrollment subject to Counselor/Administration review
Success	.5	X	X	X	X	Enrollment subject to Counselor/Administration review
Jobs for America's Graduates (JAG)	.5	X	X	X	X	Enrollment subject to Counselor/Administration review

### Financial Literacy

Financial literacy course provides students with an understanding of the concepts, principles and skills involved in making and applying sound financial decisions. This course emphasizes earning income, spending, saving, investing, managing credit and managing risk

### Comet Focus

School Orientation courses provide students with an introduction to the culture of their school so that they understand staff expectations and the school's structure and conventions. These courses may vary widely according to the philosophy, aims, and methods of each school."

### ACT Prep

The class will provide practice in test taking techniques in math, written usage, and reading comprehension of the ACT. The class will not

### Seminar

A block of time for student improvement in an area specific to each student for personal development or academics. This is a mandatory course.

guarantee success on the ACT assessment. However, reviewing, practicing, and attaining essential skills along with taking Board of Regents Curriculum prior to testing gives a student their best chance of scoring at their highest level on the ACT. Fall semester students will be required to register and take the December ACT test, and spring semester students will be required to register and take the June ACT test.

<b>Teachers Aid</b>	<b>Drivers Education</b>
---------------------	--------------------------

Students may earn one-fourth unit of credit for each semester of service to a staff member. This includes service to a teacher, the librarian, the main office, or the guidance office. No credit will be awarded for length of service less than one semester. The grade earned will be Pass or Fail. The principal reserves the right to review, limit and or deny the privilege of being a student aide.

This Pass/Fail class is divided into classroom and driving phases. Students will spend 30 hours in the classroom and four hours behind the wheel. Passing the course requires 80% test scores on all classroom and driving tests. Students are asked to take the written test to receive their Kansas Instructional Permit prior to the beginning of the class. Upon successful completion of the class the students will be given a Completion Certificate which can be exchanged for a Restricted or Regular License. The fee for the class is \$110.00.

<b>Credit Recovery</b>	<b>Senior Project</b>
------------------------	-----------------------

Students do not receive credit for students attending class, but for classes that are completed.

Students in good standing may apply to participate in Senior Project per admin and or councilor approval. The grade given for this course will be Pass or Fail and the credit earned will be ¼ unit per semester. 1 class period will require 5 working hours throughout the week and 2 class periods will require 10 working hours throughout the week. This class will only be used in unique cases when WBL is not a good fit.

<b>Work Based Learning</b>	<b>Early Release</b>
----------------------------	----------------------

Work Based Learning courses provide students with work experience in a field related to their interests. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace. Note: if the particular subject area is known, use the code associated with the Workplace Experience course within that subject area

Students may be released from 1-2 hours during the school day during the second semester. During the semester prior to enrollment, the student must have a 95% attendance record and may not have any D's or F's. Current semester progress will be monitored and this class may be revoked according to their good standing

<b>Success</b>	<b>JAG</b>
----------------	------------

This course is an intervention course for students who have been targeted as at-risk. Students may be enrolled in this course by assignment only. Students cannot opt into this course. Instruction in this course will include working with students to develop and enhance skills and strategies that will help them be more successful in the school setting, as well as life in general. Some areas of focus will include time management skills, learning how to self-assess needs, create plans, and execute goals. The instructor will help students apply such

Dropout Prevention Program courses vary widely, but typically are targeted at students who have been identified as being at risk of dropping out of or failing in school. Course content may include study skills and individual tutorials; job preparation, readiness, application, or interview skills; communication skills; personal assessment and awareness activities; speaker presentations; and small group seminars.

strategies to other classroom assignments and activities.

### Special Education

The following levels/courses are offered in special education via ANW Coop. Placement in these classes is made through lawful screening and staffing procedures and mandated by ANW Coop policy.

***\*English – One semester course (1/2 credit) Course No. C7143***

***\*Math – One semester course (1/2 credit) Course No. C7141***

***\*Social Studies – One semester course (1/2 credit) Course No. C7145***

***\*Science – One semester course (1/2 credit) Course No. C7144***

***\*General Studies – One semester course (1/2 credit) Course No. C7146***

***\*VOC Building Trades I – Full year course (1 unit) Course No. C8361 / C8362***

***\*VOC Building Trades II – Full year course (1 unit) Course No. C8421 / C8422***

Instruction includes classroom as well as job-site activities and experiences. Students work with measurements, mathematical calculations, and listings of materials from blueprints as they work with building materials and equipment. Students develop an understanding of career options available to carpenters including rough-in work, finish work, roofing, general contracting, and many specialty areas. Carpenters may be self-employed or work for contractors, homebuilders, manufacturing firms, or utility companies in new construction or repair work. Students learn to work with sub-contractors and construction inspectors. Students study building plans, building permits, insurance coverage, and building codes. Students are required to provide specific tools and safety equipment.

Level offered: 9, 10, 11, 12

Prerequisite: None

### Special Education Elective Courses

**C8281 - \*General Studies**

**C8341 - \*Work Placement**

**C8351 / C8352 - \*Work Experience**

**C8362 - \*Vocational Building Trades**

**C8391 / C8392 - \*Adapted Physical Education**

**C8401 / C8402 - \*Vocational Studies**

## Ways to Earn College Credit While Still in High School

### Concurrent Credit CTE Programs and General Education Concurrent Credit Classes

CHS offers dual enrollment classes for high school juniors and seniors. High school students must complete the application, assessments as required, and provide payment for tuition. Dual credit classes are aligned with the curriculum.

Class Name	Grade(s)	Type	Semester
Certified Nurse Aide	11 or 12	CTE	First Semester
Certified Medical Aide*	12	CTE	Second Semester Only
Medical Terminology	11 or 12	CTE	Second Semester Only
Construction Year 1 Construction Year 2	11 &/or 12	CTE	All Year
Welding Year 1 Welding Year 2	11 &/or 12	CTE	All Year
Wind Energy Year 1 Wind Energy Year 2	11 &/or 12	CTE	All year
Aerostructures Year 1	11 or 12	CTE	All year
Ind MainTech Yr 1 Ind Main Tech Yr 2	11 &/or 12	CTE	All Year
Paralegal Year 1 Paralegal Year 2	11 &/or 12	CTE	1st Sem 2nd Sem
Plumbing Year 1	11 or 12	CTE	All Year
Electrical Year 1	11 or 12	CTE	All Year
HVAC Year 1	11 or 12	CTE	All Year
Automotive Yr 1 Automotive Yr 2	11 &/or 12	CTE	All Year
Analytical Geometry and Calculus I	12	College Now	Taken all year but only enrolled CC 2nd Semester
College Algebra	12	College Now	First Semester
Elementary Statistics	12	College Now	Second Semester
American Government	12	College Now	Second Semester
English Comp I English Comp II	12	College Now	First Semester Second Semester
American History I American History II	11	College Now	First Semester Second Semester

Type of Class	Location of Class	Cost of Class per Credit Hour	Book Info
CTE Classes	Usually Off Campus	Free	Free
College Now	Chanute High School	\$25 a credit hour to CHS	Usually \$50 to NCCC
Southern Initiative	NCCC	\$75 a credit hour to NCCC	Usually \$50 to NCCC

**NCCC Placement Scoring Chart**  
***Current as of 5/2018***

For **English Composition I** students must have placement scores equal to or higher than the following **or** have met the minimum GPA standard:

ACT:                    18 on Writing  
                              17 on Reading  
Accuplacer:        255 on Writing  
(Next Generation)

**OR**

Have a GPA of at least 3.25 in previous English courses.

For **Math Courses** (College Algebra and higher) students must have placement scores equal to or higher than the following **or** have met the minimum GPA standard:

ACT:                    22 on Math  
Accuplacer:        263 on Math  
(Next Generation)

**OR**

Have a GPA of at least 3.25 in previous Math courses. For Calculus, a GPA of at least 3.75 or a C+ in Math 11 or comparable course.

**Whether you are planning on going to**  
**College or Workforce, CTE is the right**

# path for you!

## Notice to Parents

The Chanute High School Career and Technology Education (CTE) program offers coursework that is designed to prepare students to be successful whether they choose to pursue higher education, technical or trade school, or to enter the workforce after completing their high school education. At Chanute, we utilize our community members as a part of our Advisory Team when determining pathway courses and content that is taught. Our goal is to be relevant to today's employer's desire and current with the technology, tools, equipment, supplies, and instruction that the students will see in the workplace.

## Definition and Purpose of the CTE Handbook

- The handbook includes a description of all of our CTE pathways and the courses in each pathway taught at CHS. The instructors strongly encourage students to follow the recommended course sequence in each pathway.
- A **CTE pathway** is a sequence of two or more CTE courses within a student's area of interest. The goal of pathways is to connect the courses that students take in high school to college, industry certifications, and/or a career.
- This handbook is to assist parents and students in choosing courses for the Individual Plan of Study (IPS). The IPS is a plan to help students choose a path to graduation that is individualized by the student. This is a four-year plan for high school that is driven by the data from Xello.
- **Prerequisites** are courses that must be taken and a passing grade of C or better before the advanced class can be taken. Prerequisites are noted with a \*\*.

## Kansas CTE Terminology

- **CAREER AND TECHNICAL EDUCATION (CTE)**: Organized educational activities that offer a sequence of courses that provide individuals with coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in current or emerging professions. It provides technical skill training leading to, an industry-recognized credential, a certificate, or an associate degree, may include prerequisite courses (other than remedial courses) that meet other requirements; and include competency-based applied learning that contributes to the

academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, occupation-specific skills, and knowledge of all aspects of an industry, including entrepreneurship of an individual.

- **CAREER AND TECHNICAL EDUCATION (CTE) COURSE:**

A CTE course (for an approved cluster/pathway) is one in a progression leading from introductory to technical to application levels that support state and national standards and competencies. The foundation for CTE courses is the inclusion of knowledge and skills that all students should achieve for a given career. Each course is required to provide enhanced and improved instruction through the integration of rigorous academics, career success skills, career development skills and student leadership. Courses may include experience-based learning opportunities. Courses, if applicable, can be articulated with a postsecondary institution for advanced placement credit. A course can be a part of a sequence of courses that creates an overall program of study assisting the student in preparing an individual plan of study.

- **Xello** is a software program designed to assist students in discovering their career interests based on interest, personality, and learning surveys. Students are able to determine and investigate each career and/or major in the following areas.

- Career description
- Educational Major description
- College location options
- Educational Cost
- Certification options
- High School class options that relate to choose career
- Pros and Cons of the career choices
- Resume building and much more

- **CTSO – Career Technical Student Organization** – Student-led organizations which are aligned and integrated into CTE programs at the middle, secondary and/or post-secondary institutions. Members develop and demonstrate leadership, personal growth, civic engagement, technical skills and 21st century skills in authentic, real world applications.

- **FFA** – Comp. Ag Science, Power, Structural, & Technical Systems, Plant Science, and Animal Science

- **FCCLA** – Restaurant & Event Management and Family, Community, & Consumer Services

- **FBLA** – Business Finance and Marketing

- **HOSA** – Health Science and BioMedical

- **Kansas Career Pathway(s):** Organized groupings of rigorous academic and career related courses leading from education to employment, that identify each step, skill, educational requirement and aptitude needed to be successful within any

specific career. Currently there are 35 state approved pathways identified within 16 clusters.

- **Pathway Participant:** A student who has earned a minimum of 1 credit, but less than two (2) secondary level credits in a single career and technical education (CTE) pathway.
- **Pathway Concentrator:** A student who has earned two (2) or more secondary level credits in a single CTE pathway, which are a combination of at least two of the three levels: Introductory, Technical and Application and meets a 70% proficiency on a technical skills assessment measured by the average of the letter grades, an average percentage on end-of-course assessments, or on the competency profile
- **Pathway Completer:** A student who has completed a minimum of three (3) secondary level credits in a single CTE pathway, with at least two (2) of those credits being a combination of technical and application level courses. A Completer must also earn an industry-recognized certification or a passing score on a third-party, end-of-pathway assessment.
- **Kansas CTE Scholar:** A Kansas initiative to recognize well-rounded, outstanding career and technical education (CTE) students finishing their senior year of high school. TO be a CTE scholar a student must complete courses in the same pathway all four years of high school. If a student becomes a pathway completer, they will receive a cord to wear at high school graduation.
- **Individual Plan of Study:** An individual plan developed by a student (with guidance) to help guide them through the education process. It includes interest assessments to help students identify career preferences, assists with course selections based on career interests, looks at their postsecondary options, and has a portable electronic portfolio.
- **Internship:** A supervised work-based experience that links a learner with an employer for a planned set of activities designed to give the learner a broad overview of a business or occupational field (can be for a short or long term period/paid or unpaid)
- **Career Success Skills:** Foundational skills that are essential for success in all careers; including applied knowledge (academic and critical thinking skills), effective relationships (interpersonal skills and personal qualities), and workplace skills (resource management, information and communication, systems thinking and technology). Kansas CTE has identified the US Department of Education's Employability Skills Framework as a model of career success skills.
- **High-Demand Occupation:** An occupation that: 1. Has a critical shortage of workers to fill the employment demands of industry, and 2. Requires formal training exceeding that which can be provided on the job.

- **High-Skill Occupations:** An occupation that requires all of the following: 1. Specialized technical training, 2. An advanced level of skill sets as defined by each industry and/or education (examples: independent decision making, critical thinking, problem solving), 3. A recognized validation of skill attainment or credential (examples: certification, registration, licensure), and 4. Included mandatory continuing education and/or training.
- **High-Wage Occupation:** An occupation that: 1. Has a median wage for the occupation that is at least 200% above federal poverty level for a specific area/region or an entry wage of \$11.43 or higher, and 2. Offers a wage progression strategy.

# USD 413

## CTE EMBEDDED CREDIT POLICY

Chanute High School offers **English**, **Math**, and **Science** embedded credits for those students who complete an approved **CTE pathway program**. Credits are awarded on a pass/fail basis.

### **.Definitions**

A. *Embedded Credit Course*. Incorporates content standards and objectives for an embedded credit from one credit bearing high school course into another (host) course(s) and allows students to earn credit for both.

A. *Embedded Credit*. The approved content standards and objectives for a credit bearing high school course that are embedded within a second course or courses to receive credit for both courses.

### **II. Process for Providing and Awarding Embedded Credit**

A. Embedded Credit Courses will be offered for the following:

1. Fourth English
2. Third Math
3. Third Science

A. Students will have the opportunity to earn an embedded credit in a CTE pathway and if their specific internship requires the use of English, Mathematics or Science. These embedded credits will be evaluated on a case by case basis and determined by the CTE Coordinator, Counselor, and Administrator.

B. Successful proficiency will be measured by utilizing the ACT WorkKeys and will be used for the following:

1. [Workplace Documents \(English\)](#)
2. [Applied Math \(Math\)](#)
3. [Graphic Literacy \(Science\)](#)
  1. Students must receive a score of 4 or higher on the ACT WorkKeys assessment to be awarded the core embedded credit. If a student does not receive this score, the student must retake the assessment.
  2. Students must pass the CTE course content to earn an embedded credit in the identified areas.

# CTE Embedded Credits Quick View

All Embedded Credits require a score of 4 or higher on the correlating WorkKeys subtest

Program	Embedded Credit
Construction	Year 1 - ½ 3rd Math Year 2 - ½ 3rd Math & 4th English.
Welding	Year 1 - ½ 3rd Math Year 2 - ½ 3rd Math & 4th English
Aerostructures	Year 1 - 4th English, 3rd Math, & 3rd Science
Industrial Maintenance Tech	Year 1 - ½ 3rd Science & ½ 3rd Math. Year 2 - you earn ½ 3rd Science & ½ 3rd Math & 4th English
Automotive	Year 1 - 3rd Math Year 2 - 3rd Science & 4th English
Wind Energy	Year 1 - 3rd Math & 3rd Science Year 2 - 4th English
HVAC	Year 1 - ½ 3rd Math Year 2 - ½ 3rd Math & 4th English.
Plumbing	Year 1 - ½ 3rd Math Year 2 - ½ 3rd Math & 4th English.
Electrical	Year 1 - ½ 3rd Math Year 2 - ½ 3rd Math & 4th English.
Paralegal	4th English
CNA	3rd Science

- Exceptions may apply per admin/counselor approval to students who only complete one year of a program

# Post-Secondary Program

Students may enroll in Post-Secondary Programs their junior year of high school. Some exceptions may apply for sophomores. All college coursework program-planned by our partner Community Colleges will be eligible for Dual credit and may meet above mentioned embedded credit qualification.

# Acellus

Online Coursework used at Chanute Extension Academy, Credit Recovery, Virtual Students and/or CTE Lab. All classes offered by Acellus will be conditionally approved by the board through this course catalog approval. Students enrolling through Acellus must have approval of counselor and administration to ensure the credits are aligned with USD 413 standards.

CTE	
<del>Investigating Careers</del>	<del>Investigating Careers gives students an overview of many different career options and goes over the education, training, and skills that will be required for each. This course is taught by Todd Edmond. (00001294)</del>
<del>College and Career Readiness</del>	<del>College and Career Readiness, taught by Todd Edmond, provides students with the basic knowledge and skills they will need as they prepare for further training in a career or to go to college. Topics covered include career choices, setting goals, personal finances, and job applications. (00001295)</del>
<del>Principles of Agriculture</del>	<del>Principles of Agriculture, a full year course, introduces students to the agricultural industry with an emphasis on plant and animal science. Students learn what is involved in working with livestock. They also learn about plant systems and their effect on the environment. Students are introduced to the FFA and the opportunities it provides for those who choose careers in agriculture. Finally, students study tools used in wood and metal shops. (00001674)</del>
<del>Agriculture I</del>	<del>Acellus Agriculture I, a full year course, introduces students to the agricultural industry with an emphasis on animal science. Students learn what is involved in working with cows, horses, swine, sheep/goats, and poultry. Students are also introduced to the FFA and the opportunities and advantages it provides for those who choose a career in agriculture. Finally, students study applicable tools found in wood and metal shops. (00001633)</del>

Agriculture II	In <del>Acellus Agriculture II</del> , a full year course, students learn about plant types, parts, classification, reproduction, and processes as well as the effect of the environment on plants. They study soil, crop production, trees, pests, and weeds. They explore aspects of the FFA program and how to succeed at getting a job. They also study record keeping and welding. Students should successfully complete Agriculture I before taking this course. (00001634)
Business Management	Business Management, a full year course taught by Mark Rogers, is appropriate for both students on a business career path as well as students seeking to attend college in a business-related field. It is recommended that students complete Pre-Algebra prior to taking this course. California A-G/Quality Matters approved. (00001304)
Electrical Technology I	Electrical Technology I, a full year CTE course, gives students who are interested in a career path in an electrical-related field including general construction a foundation of knowledge and practice necessary for a successful future. California A-G/Quality Matters approved. (00001301)
Electrical Technology II	Electrical Technology II, a full year CTE course, gives students who are interested in a career path in an electrical-related field including general construction a foundation of knowledge and practice necessary for a successful future. Students should successfully complete Electrical Technology I before taking this course. California A-G/Quality Matters approved. (00001321)
HVAC Technology I	HVAC Technology I, a full year course filmed in 3-D, provides students with a basic foundation of knowledge and skill required for a career in this field. It is the first in a two-part course of study preparing students for HVAC R certification. California A-G/Quality Matters approved. (00001322)

HVAC Technology II	HVAC Technology II, a full year course filmed in 3-D, builds on the knowledge and skills taught in HVAC Technology I to provide students the preparation needed for their career and for the HVAC-R certification exam. Students should successfully complete HVAC Technology I before taking this course. California A-G/Quality Matters approved. (00001323)
Information Management I	Information Management I, a full year course taught by Todd Edmond, lays a foundation for information management for college and career readiness. Many fields today require some degree of technical expertise in the management of information systems. California A-G/Quality Matters approved. (00001311)
Information Management II	Information Management II, a full year course taught by Todd Edmond, expands on the foundation of concepts and skills of Information Management I in the planning, implementing, and managing of information systems in a variety of real-world applications. Students should successfully complete Information Management I before taking this course. California A-G/Quality Matters approved. (00001312)
Instructional Standards in Education and Training	Instructional Standards in Education and Training, a full year course, provides students with a basic understanding of child and adolescent development as well as principles of effective teaching and training practices. Students learn to develop materials for educational environments, prepare instructional materials, direct individualized instruction and group activities, and carry out additional responsibilities of education professionals. (00001474)
Medical Terminology	Medical Terminology, a full year course taught by Dr. Mary Laughlin, provides students interested in any medical-related field with a foundational understanding of terminology used in the medical field. Filmed in 3-D, the course incorporates numerous charts and diagrams to reinforce the relevance of the terms. California A-G/Quality Matters approved. (00001318)

Plumbing Technology I	Plumbing Technology I, a full year course taught by Brad Harding and filmed in 3-D, provides students with a basic foundation of knowledge and skill required for a career in plumbing. It is also useful for students planning to pursue a career in general construction. It is the first in a two-part course of study preparing students for Plumbing Technology certification. California A-G/Quality Matters approved. (00001302)
Plumbing Technology II	Plumbing Technology II, a full year course filmed in 3-D, builds on the principles and skills of Plumbing Technology I to provide students with the additional knowledge and preparation they need both practically for their career as well as for the Plumbing Technology certification exam. Students should successfully complete Plumbing Technology I before taking this course. California A-G/Quality Matters approved. (00001303)
Principles of Business, Marketing, and Finance	Principles of Business, Marketing, and Finance, a full year CTE Business course taught by Mark Rogers, provides a basic business, marketing, and finance background for students looking for a career in business or for students desiring further preparation before entering college in a business or finance related major. California A-G/Quality Matters approved. (00001305)
<b>Fine Arts</b>	
AP Drawing	AP Drawing has been audited and approved by the College Board to provide students with a college level learning experience. California A-G approved. (00001848)
Foundations of Music	The Acellus Foundations of Music course introduces students to music and basic musical terminology. Students will study select composers, musical periods, and the various families of musical instruments. Students will also be exposed to different musical genres and styles. (00001523)

<b>Music Appreciation</b>	<del>Music Appreciation, a full year course, provides an overview of the development of western music from the Renaissance to Modern times. The focus is on select European and American composers, how they were influenced by the historical, cultural, and musical settings in which they wrote, and how they influenced the musical styles of their times. By increasing our understanding of our musical heritage, we increase our appreciation and our enjoyment. (00001131)</del>
<b>AP Music Theory</b>	<del>AP Music Theory has been audited and approved by the College Board to provide students with a college-level learning experience. This rigorous course provides students with an in-depth foundation in music theory, including elements of musical composition. It is an excellent preparation for students desiring a music-related career and for those planning to take the AP Music Theory exam. California A-G approved. (00001313)</del>
<b>Collaborative Theatre</b>	<del>Acellus Collaborative Theatre focuses on the network of art forms that all work together to tell a story on the stage. Students examine the inception of theatre and its history as well as the tools and techniques of theatre artists, both onstage and backstage. They also explore elements of design, including scenic and costume design. The course concludes with a look at careers in the theatre industry. California A-G/Quality Matters approved. (00001647)</del>

<b>Language Arts/Reading</b>	
<b>Grade K Language Arts/Reading</b>	<del>In this course, students focus on Grade K Language Arts and Reading concepts. (00001193)</del>
<b>Grade 1 Language Arts/Reading</b>	<del>In this course, students focus on Grade 1 Language Arts and Reading concepts. (00001194)</del>
<b>Foundational Reading, Writing &amp; Spelling</b>	<del>Foundational Reading, Writing &amp; Spelling was developed for elementary students lacking the foundation needed to read and write. This course is for Grade 2 students who missed Grade 1. (00002218)</del>

<del>Grade 2 Language Arts/Reading</del>	<del>In this course, students focus on Grade 2 Language Arts and Reading concepts. (00001040)</del>
<del>Basic Reading, Writing &amp; Spelling</del>	<del>Basic Reading, Writing &amp; Spelling was developed for elementary students lacking the foundation needed to read and write. This course is for Grade 3 students who missed Grade 2. (00002219)</del>
<del>Grade 3 Language Arts/Reading</del>	<del>In this course, students focus on Grade 3 Language Arts and Reading concepts. (00001196)</del>
<del>Grade 4 Language Arts/Reading</del>	<del>In this course, students focus on Grade 4 Language Arts and Reading concepts. (00001206)</del>
<del>Basic Language Arts/Reading Concepts for Middle School</del>	<del>This course targets middle school students with very weak language arts skills having a special emphasis on reading and comprehension. It teaches effective strategies students can use to overcome various reading difficulties and includes exercises to build vocabulary. (00001570)</del>
<del>Basic Language Arts/Reading Concepts II for Middle School</del>	<del>This language arts course is taught on a 3rd grade level and includes instruction and practice in basic spelling and vocabulary to reinforce both reading and writing skills. (00001370)</del>
<del>Grade 5 Language Arts/Reading</del>	<del>In this course, students focus on Grade 5 Language Arts and Reading concepts. (Version 1.1) (00001884)</del>
<del>Grammar and Composition 1</del>	<del>Some schools utilize this curriculum at the 6th grade level. (00001106)</del>
<del>Grammar and Composition 2</del>	<del>Some schools utilize this curriculum at the 7th grade level. (00001107)</del>
<del>Grammar and Composition 3</del>	<del>Some schools utilize this curriculum at the 8th grade level. (00001201)</del>
<del>Basic Language Arts/Reading Concepts for High School</del>	<del>This course targets high school students with very weak language arts skills, having special emphasis on reading and comprehension. It teaches effective strategies students can use to overcome various reading difficulties and includes exercises to build vocabulary. (00001065)</del>

<p><del>Basic Language Arts/Reading Concepts II for High School</del></p>	<p><del>This course, taught on a 7th grade level, is recommended for High School students with weak language arts skills. It focuses on improving reading comprehension and writing proficiency. (00001379)</del></p>
<p><del>Language Arts/Reading Concepts for High School</del></p>	<p><del>This language arts course, taught on an 8th grade level, is for students with minimal language arts skills and is at the lowest level of rigor for which grade-level credit can be given. It focuses on building reading comprehension of different types of texts and improving writing proficiency in preparation for English I. (00001381)</del></p>
<p><del>High School Reading for Success</del></p>	<p><del>This course was created to help high school-aged students that lack basic reading skills. (00002216)</del></p>
<p><del>High School English I SEd</del></p>	<p><del>High School English I SEd, taken from High School English I, is targeted to help students in special education increase reading comprehension and improve basic oral and written communication skills. (00001275)</del></p>
<p><del>High School English I</del></p>	<p><del>High School English I focuses on student comprehension and composition of informational, persuasive, and literary texts. Students exercise critical thinking as they engage with American and world literature, building oral (speaking/listening) and written response skills, with special focus on literary analysis and argumentation to ensure proficiencies needed for college/career readiness. California A-G/Quality Matters approved. (00001072)</del></p>
<p><del>High School English II</del></p>	<p><del>English II is recommended for students who have completed High School English I. California A-G/Quality Matters approved. (Version 2.0) (00001814)</del></p>
<p><del>American Literature English III SEd</del></p>	<p><del>Taken from American Literature English III, this course continues to build the strong language arts foundation students in special ed need in reading comprehension and speaking/writing ability. Drawing on works of fiction and nonfiction from America's significant literary and historical heritage, students are exposed to the enrichment of literature while honing critical thinking and writing skills, with extra focus in areas that are more challenging. (00001296)</del></p>

<p><del>American Literature-English III</del></p>	<p><del>American Literature-English III draws on increasingly complex fiction and non-fiction texts to help students further develop their skills in reading, in assessing, and in producing clear oral and written responses. The course promotes elevated form and structure in writing and improved research techniques in addition to exposure to American literature of literary and historical significance. California A-G/Quality Matters approved. (00001074)</del></p>
<p><del>English IV-SEd</del></p>	<p><del>English IV-SEd, taken from English IV, focuses on the reading comprehension and the oral/written language skills that students in special education need to be successful in academics and in their careers. Extra attention is given to correct grammar and language usage in essays, resumes, and reports, and to professional oral presentations and business communications the students will need to produce in school and in the workplace. (00001297)</del></p>
<p><del>British Literature-English IV</del></p>	<p><del>Using texts from British literature, British Literature-English IV sets an enriching, relevant historical/cultural backdrop for its focus on close reading, critical thinking, and oral/written response to literature, informed by analysis and research. Of particular benefit is its practical guide to the writing process. California A-G/Quality Matters approved. (00001480)</del></p>
<p><del>College Prep-English IV</del></p>	<p><del>College Prep-English IV teaches students strategies to improve comprehension and analysis of complex texts and to increase the effectiveness of their written and oral presentations. Writing focus covers grammar, usage, and language mechanics. Techniques for writing professional essays, technical reports, resumes, and business communications in preparation for college/career are also covered. California A-G/Quality Matters approved. (00001109)</del></p>

<p><del>AP English Language and Composition</del></p>	<p><del>This course gives students an opportunity to experience a college-level English curriculum and is tailored to those able to comprehend college-level texts in reading and adhere to the conventions of Standard Written English in writing. Students respond to non-fiction texts to hone their ability to analyze claims, synthesize evidence, and use research in their writing while preparing for the AP Exam. Approved by the College Board. California A-G approved. (00001306)</del></p>
<p><del>AP English Literature and Composition</del></p>	<p><del>This course gives students an opportunity to experience a college-level English curriculum and is tailored to those able to comprehend college-level texts in reading and adhere to the conventions of Standard Written English in writing. It engages students in reading, analyzing, and writing about imaginative literature (fiction, poetry, drama) from various periods and includes AP Exam prep. Approved by the College Board. California A-G approved. (00001309)</del></p>
<p><del>Discover English – Elementary School Part 1-ESL</del></p>	<p><del>This is the beginning course for elementary school students seeking a mastery of English as a second language. The course is taught by the Discover Method, making it the right choice for students of any native tongue, with little or no English background. (Version 2.0) (00001661)</del></p>
<p><del>Discover English – Middle School Part 1-ESL</del></p>	<p><del>This is the beginning course for middle school students seeking a mastery of English as a second language. The course is taught by the Discover Method, making it the right choice for students of any native tongue, with little or no English background. (Version 2.0) (00002208)</del></p>
<p><del>Discover English – High School Part 1-ESL</del></p>	<p><del>This is the beginning course for high school students seeking a mastery of English as a second language. The course is taught by the Discover Method, making it the right choice for students of any native tongue, with little or no English background. (Version 2.0) (00002209)</del></p>

**Math**

<del>Grade K Math</del>	<del>In this course, students focus on Grade K Math concepts. (00001245)</del>
<del>Grade 1 Math</del>	<del>In this course, students focus on Grade 1 Math concepts. (00001186)</del>
<del>Grade 2 Math</del>	<del>In this course, students focus on Grade 2 Math concepts. (Version 2.0) (00001808)</del>
<del>Grade 3 Math</del>	<del>In this course, students focus on Grade 3 Math concepts. (00001821)</del>
<del>Grade 4 Math</del>	<del>In this course, students focus on Grade 4 Math concepts. (00001847)</del>
<del>Basic Math Concepts for Middle School</del>	<del>This math course is recommended for middle school students with very weak math skills. It presents the lesson material on a 3rd grade level. (00001558)</del>
<del>Basic Math Concepts II for Middle School</del>	<del>This math course is recommended for middle school students with weak math skills. It presents the lesson material on a 5th grade level. (00001396)</del>
<del>Grade 5 Math</del>	<del>In this course, students focus on Grade 5 Math concepts. (00001823)</del>
<del>Mathematics Course 1</del>	<del>Some schools utilize this curriculum at the 6th grade level. (00001651)</del>
<del>Mathematics Course 1 Spanish</del>	<del>This course introduces English concepts, preparing Spanish-speaking students to transition to the English-speaking classroom. Some schools utilize this curriculum at the 6th grade level. (00001531)</del>
<del>Mathematics Course 2</del>	<del>Some schools utilize this curriculum at the 7th grade level. (00001660)</del>
<del>Basic Math Concepts for High School</del>	<del>This math course is recommended for high school students with very weak math skills. It presents the lesson material on a 3rd grade level. (00001594)</del>
<del>Basic Math Concepts II for High School</del>	<del>This math course is recommended for high school students with weak math skills. It presents the lesson material on a 5th grade level. (00001349)</del>

<del>Math for Success</del>	<del>This course was created to help high school aged students that lack basic math skills succeed in Algebra. (00002213)</del>
<del>FUNdamental Math</del>	<del>FUNdamental Math is a course that Acellus created to better prepare students for Pre Algebra. Our studies indicate that students taking FUNdamental Math complete Pre Algebra faster and with better scores than students that skip this course. (00001000)</del>
<del>FUNdamental Math-Spanish</del>	<del>FUNdamental Math-Spanish is designed to provide Spanish speaking students with the skills necessary for success in high school Algebra. (00001001)</del>
<del>Pre Algebra</del>	<del>Pre Algebra is recommended for students who have completed FUNdamental Math and prior to taking Algebra. (00001317)</del>
<del>Algebra I</del>	<del>Algebra I is recommended for students who have completed Pre Algebra. California A-G/Quality Matters approved. (00001212)</del>
<del>Algebra I Spanish</del>	<del>Algebra I Spanish is for Spanish speaking students. This course introduces English concepts, preparing Spanish speaking students to transition to the English speaking classroom. This course is recommended for high school or gifted middle school students. Many students have benefited from completing Pre Algebra-FUNdamental Math-Spanish prior to taking this course. (00001023)</del>
<del>Geometry</del>	<del>Geometry is recommended for students who have completed Algebra I. California A-G/Quality Matters approved. (00001211)</del>
<del>Algebra II</del>	<del>Algebra II is recommended for students who have completed Algebra I and Geometry. California A-G/Quality Matters approved. (00001210)</del>
<del>Integrated Mathematics I</del>	<del>Integrated Math I is recommended for students who have completed Pre Algebra. California A-G/Quality Matters approved. (00001383)</del>

<del>Integrated Mathematics II</del>	<del>Integrated Mathematics II is recommended for students who have completed Integrated Mathematics I. California A-G/Quality Matters approved. (00001384)</del>
<del>Integrated Mathematics III</del>	<del>Integrated Mathematics III is recommended for students who have completed Integrated Mathematics II. California A-G/Quality Matters approved. (00001385)</del>
<del>Business Math</del>	<del>Business Math is recommended for students planning a career in accounting or finance who have completed Algebra I and Personal Finance. California A-G/Quality Matters approved. (Version 1.1) (00001942)</del>
<del>College Exam Math Prep</del>	<del>This course is recommended for high school students who plan to attend college, preparing to take the ACT or SAT college entrance exams. Students should successfully complete Geometry and Algebra II prior to taking this course. (Semester Course) (00001007)</del>
<del>Trigonometry</del>	<del>Trigonometry is recommended for students who have completed Geometry and Algebra II or Integrated Math III. California A-G/Quality Matters approved. (Semester Course) (00001006)</del>
<del>Pre-Calculus</del>	<del>Pre-Calculus is recommended for students who have completed Algebra II or Integrated Math III and Trigonometry. California A-G/Quality Matters approved. (00001080)</del>
<del>AP Calculus AB</del>	<del>This CollegeBoard audited and approved version of AP Calculus AB has been updated to include more in-depth coverage of concepts covered in the latest CollegeBoard AP Calculus AB Course and Exam Description. Students should successfully complete Pre-Calculus before taking this course. (00001652)</del>
<del>AP Calculus AB Exam Prep</del>	<del>This course is recommended for students planning to take the College Board AP Calculus AB Exam. It is recommended for students that have completed AP Calculus AB desiring to review in the final weeks prior to taking the Exam. AP Calculus BC students may also benefit many AB concepts are covered in the BC Exam. Concise and focused, this course provides a solid review of important concepts and</del>

	<del>practice solving problems patterned after previous Exams. (00001009)</del>
<del>AP Calculus BC</del>	<del>AP Calculus BC has been audited and approved by the College Board to provide students with a college-level learning experience. This course is recommended for those successfully completing AP Calculus AB, especially for those planning a college career path in a STEM field of study. (00001113)</del>
<del>AP Statistics</del>	<del>AP Statistics has been audited and approved by the College Board to provide students with a college-level learning experience. In this course, students learn about the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students should successfully complete Algebra II prior to taking this course. California A-G approved. (00001491)</del>
<del>Math Fact Practice – Addition and Subtraction</del>	<del>Acellus Math Fact Drills are strategically integrated throughout the Acellus Math courses. This supplemental course provides an additional series of drills to augment other instruction and provide additional practice. (00001612)</del>
<del>Math Fact Practice – Multiplication and Division</del>	<del>Acellus Math Fact Drills are strategically integrated throughout the Acellus Math courses. This supplemental course provides an additional series of drills to augment other instruction and provide additional practice. (00001613)</del>
<b>Other</b>	
<del>Student Orientation</del>	<del>This orientation introduces students to the Acellus Learning System. (00001231)</del>
<del>Acellus Teacher Certification</del>	<del>Developed for teachers using Acellus blended learning programs to teach students. Numerous tools and features of Acellus are discussed, as well as Acellus "best practices", which include techniques that have been found to be the most effective. (00001269)</del>

<p><del>Preschool Level 1</del></p>	<p><del>This course is the first of a two part series designed to provide early learners with basic preparation for academic achievement. This course has a strong emphasis on life skills, cognition and expression, in both verbal and written forms, and foundational concepts of the core curricular areas. With simple, easy to answer problems, young children learn computer usage skills while developing self-esteem. (00001293)</del></p>
<p><del>Preschool Level 2</del></p>	<p><del>This course is the second of a two part series for preschoolers. Continuing on from Preschool Level 1, this course uses aural, visual, and kinesthetic (signing) instructional methods to present foundational concepts in language, math, and science while developing important life skills. Straightforward, easy to answer problems make this an ideal course for students who are just learning how to use a computer. (00001276)</del></p>
<p><del>Grade K Special Learning</del></p>	<p><del>This course is designed to build an academic foundation for students with special needs. Students who are autistic, those with Down syndrome, and other academically challenged students have excelled in this course. To increase communicative abilities, aural, visual, and kinesthetic (signing) techniques are utilized. A special emphasis is placed on building understanding and self-esteem, as the student develops academic, social, and life skills. (00001213)</del></p>
<p><del>Grade 1 Special Learning</del></p>	<p><del>This course builds upon the foundation of the Grade K Special Needs course. Students who are autistic, those with Down syndrome, and other academically challenged students have excelled in this course. Utilizing aural, visual, and kinesthetic (signing) techniques, students review and build on their knowledge of basic concepts from all subject areas. An emphasis is placed on building self-esteem, increasing academic, social, and speech capabilities. (00001184)</del></p>

<p><del>Middle School Health</del></p>	<p><del>This five-star Acellus course was developed in association with Children's Mercy Hospital and is aligned with the NHES (National Health Education Standards). Students will go over the major body systems, led by doctors who specialize in each field. Students will learn how their bodies work so that they can understand how to care for them. (Semester Course) (00001243)</del></p>
<p><del>High School Health</del></p>	<p><del>Acellus High School Health is a full year, five-star course developed in association with Children's Mercy Hospital and aligned to the NHES (National Health Education Standards). Throughout this course, students will be guided by health care professionals who work in the field and understand how the body works and how injury and disease can be treated or prevented. (00001244)</del></p>
<p><del>PE, Social, and Emotional Education – Elementary School</del></p>	<p><del>PE, Social, and Emotional Education – Elementary School focuses on the importance of emotional, social, and physical education in students' lives helping them to cultivate meaningful relationships, caring attitudes, and healthy physical habits. (00002017)</del></p>
<p><del>PE, Social, and Emotional Education – Middle School</del></p>	<p><del>PE, Social, and Emotional Education – Middle School focuses on the importance of emotional, social, and physical education in students' lives helping them to cultivate meaningful relationships, caring attitudes, and healthy physical habits. (00002018)</del></p>
<p><del>PE, Social, and Emotional Education – High School</del></p>	<p><del>PE, Social, and Emotional Education – High School focuses on the importance of emotional, social, and physical education in students' lives helping them to cultivate meaningful relationships, caring attitudes, and healthy physical habits. (00002019)</del></p>
<p><del>Middle School French I</del></p>	<p><del>This introductory French course, taught by Katrina Carey, is for middle school students seeking mastery of French as a second language. Basic vocabulary and sentence structure will be covered as well as French customs, and conventions. (00001575)</del></p>

<p><del>Middle School German I</del></p>	<p><del>This introductory German course, taught by Emily Meier, is for middle school students with a goal of mastering German as a second language. Students will study vocabulary, greetings, sentence structure, etc. The instructor will also go over a variety of practices and customs observed in the country of Germany. (00001576)</del></p>
<p><del>Middle School Spanish I</del></p>	<p><del>This introductory Spanish course, taught by Emily Brown, is for middle school students that are seeking to master Spanish as a second language. Students will study vocabulary, greetings, sentence structure, etc. The instructor will also go over a variety of practices and customs observed in different Spanish-speaking countries. (00001595)</del></p>
<p><del>French I</del></p>	<p><del>French I, a full year introductory course taught by Katrina Carey, is for high school students desiring to master French as a second language. Students will study vocabulary, greetings, sentence structure, etc. Students are also introduced to French culture and customs. (00001530)</del></p>
<p><del>French II</del></p>	<p><del>French II is designed to follow Acellus French I. This course is recommended for students having a basic understanding of the French language who want to further their understanding and develop fluency. Students extend their vocabulary and their understanding of subject-verb agreement. Students experience French used in conversations and learn basic French phrases needed for effective communication. California A-G/Quality Matters approved. (00001528)</del></p>
<p><del>German I</del></p>	<p><del>German I, a full year introductory course taught by Emily Meier, is for high school students desiring to master German as a second language. Students will study vocabulary, greetings, sentence structure, etc. Students are also introduced to German culture and customs. California A-G/Quality Matters approved. (00001524)</del></p>

<p><b>German II</b></p>	<p><del>German II was designed for students who have successfully completed German I and have a basic understanding of the German language and are interested in extending their fluency. Students study vocabulary, grammar, and phrases used in specific, real-life situations. The instructor also covers a variety of social norms and expectancies that students will encounter in Germany. California A-G/Quality Matters approved. (00001529)</del></p>
<p><b>Spanish I</b></p>	<p><del>Spanish I, a full year introductory course taught by Emily Brown, is for high school students desiring to master Spanish as a second language. Students will study vocabulary, greetings, sentence structure, etc. Students are also introduced to Spanish culture and customs. California A-G/Quality Matters approved. (00001573)</del></p>
<p><b>Spanish II</b></p>	<p><del>Spanish II was designed for students who have successfully completed Spanish I and have a basic understanding of the Spanish language and are interested in extending their fluency. Students study vocabulary, grammar, and phrases used in specific, real-life situations. The instructor also covers a variety of social norms and expectancies that students will encounter in Spanish-speaking countries. California A-G/Quality Matters approved. (00001584)</del></p>
<p><b>Spanish III</b></p>	<p><del>In this course, students gain cultural knowledge of Spanish-speaking people around the globe. Students learn to communicate with others and talk about various topics including travel and vacations, environmental topics, professions, parts of a city, and volunteer opportunities. Students should successfully complete Spanish II before taking this course. California A-G/Quality Matters approved.(Version 1.1) (00001915)</del></p>
<p><b>Discover Spanish Part 1</b></p>	<p><del>Discover Spanish Part 1 is a full year introductory course for students seeking mastery of Spanish as a second language. The course is taught using the Discover Method, making it the right choice for students of any native tongue having little or no Spanish background. (00001247)</del></p>

Discover Portuguese	Discover Portuguese is a full year course for students seeking mastery of Portuguese as a second language. The course is taught using the Discover Method, making it the right choice for students of any native tongue having little or no Portuguese background. (00002188)
Elementary Engineering	Elementary Engineering introduces students to basic engineering principles and considers the major impact engineers have had on the world as we know it. Students learn about the problem-solving skills used in the engineering design process and then put them into action. They practice problem-solving and brainstorming through different design challenges. Students also learn about many of today's more common engineering disciplines. (00001482)
Introduction to Accounting	Introduction to Accounting, a full year course, explores the field of accounting, covering the process of recording, analyzing, classifying, summarizing, and communicating accounting information. Students learn how to formulate and interpret financial information for use in management decision-making. Mr. Rogers helps students to investigate the impact of industry standards as well as economic, financial, legal, and ethical factors. (00001494)
Accounting I	Accounting I covers important accounting principles. Students learn to interpret and create financial statements and reports. They study how accounting is used in different aspects of business, including taxes, investments, payroll, sales, and purchases. Students gain an understanding of the laws and regulations associated with accounting and recognize why these regulations are in place. California A-G/Quality Matters approved. (Version 1.1) (00001923)
Accounting II	Accounting II covers various accounting topics, emphasizing ethics and professionalism through real-world examples and case studies. (00002190)
HS Equivalency Exam Prep Mathematics	Math preparation course for the new high school equivalency exams. (00001221)
HS Equivalency Exam Prep Reading/Language Arts	Reading/Language Arts preparation course for the new high school equivalency exams. (00001222)

<del>HS Equivalency Exam Prep Science</del>	<del>Science preparation course for the new high school equivalency exams. (00001223)</del>
<del>HS Equivalency Exam Prep Social Studies</del>	<del>Social Studies preparation course for the new high school equivalency exams. (00001224)</del>
<del>Tutorials</del>	<del>Tutorials (00001914)</del>

## Science

<del>Grade K Science</del>	<del>In this course, students focus on Grade K Science concepts. (00001050)</del>
<del>Grade 1 Science</del>	<del>In this course, students focus on Grade 1 Science concepts. (00001051)</del>
<del>Grade 2 Science</del>	<del>In this course, students focus on Grade 2 Science concepts. (00001052)</del>
<del>Grade 3 Science</del>	<del>In this course, students focus on Grade 3 Science concepts. (Version 2.0) (00001911)</del>
<del>Grade 4 Science</del>	<del>In this course, students focus on Grade 4 Science concepts. (00001820)</del>
<del>Grade 5 Science</del>	<del>In this course, students focus on Grade 5 Science concepts. (Version 2.0) (00001828)</del>
<del>Elementary Ecology</del>	<del>Elementary Ecology targets elementary school students in Grades 2-4. (00001495)</del>
<del>Basic Science Concepts for Middle School</del>	<del>This science course is recommended for middle school students with very weak science skills. It presents the lesson material on a 3rd grade level. (00001354)</del>
<del>Basic Science Concepts II for Middle School</del>	<del>This science course is recommended for middle school students with weak science skills. It presents the lesson material on a 4th grade level. (00001355)</del>
<del>Introduction to Earth &amp; Space Science</del>	<del>Some schools utilize this curriculum at the 6th grade level. (00001517)</del>

<del>Earth Science</del>	<del>Earth Science investigates the Earth's structure and composition, its changing surface, and the role that energy plays in Earth systems. It explores the Earth's ecological resources and atmosphere, its water cycle, and weather. It further discusses the Earth's landmasses and its relationships in space. Along the way, students learn to use scientific thinking, investigations, tools, and technologies. (00001118)</del>
<del>Life Science</del>	<del>Life Science studies living organisms including archaea, bacteria, monera, protists, fungi, plants, and animals. A particular emphasis is placed on human biology. Students learn how organisms are classified based on specific characteristics and levels of organization. The inside of various cell types is studied. Plant and animal adaptations are explored. On-camera dissection labs help students see the actual parts of an earthworm, starfish, and frog. (00001117)</del>
<del>Physical Science</del>	<del>Physical Science covers the basic components that matter is made of, as well as different forms of energy that make things move and change. Phases of matter, parts of the atom, physical and chemical changes, laws of motion, and energy transformation are studied. Enlightening, on-screen demonstrations of the concepts being taught bring the science to life and enhance student understanding. (00001119)</del>
<del>Integrated Science 1</del>	<del>Some schools use this curriculum at the 6th grade level. (00001840)</del>
<del>Integrated Science 2</del>	<del>Some schools use this curriculum at the 7th grade level. (00001842)</del>
<del>Integrated Science 3</del>	<del>Some schools use this curriculum at the 8th grade level. (00001843)</del>
<del>Basic Science Concepts for High School</del>	<del>This science course is recommended for high school students with very weak science skills. It presents the lesson material on a 4th grade level. (00001564)</del>

<p><del>Basic Science Concepts II for High School</del></p>	<p><del>This science course is recommended for high school students with weak science skills. It presents the lesson material on a 5th grade level. (00001359)</del></p>
<p><del>Science Concepts for High School</del></p>	<p><del>This science course is recommended for high school students seeking a high school diploma but having minimal science and/or math skills. It presents the lesson material on a 6th grade level. This course is for students planning to pursue a career in the trades; students who are not planning a college career path. This course covers life science, earth science, and physical science basics. (00001565)</del></p>
<p><del>Physical Science for High School</del></p>	<p><del>This science course is recommended for high school students seeking a high school diploma but having minimal science and/or math skills. It presents lesson material on an 8th grade level. This course is for students planning to pursue a career in the trades; students who are not planning a college career path. (00001566)</del></p>
<p><del>Basic Integrated Science for High School</del></p>	<p><del>This science course is recommended for high school students seeking a high school diploma but having minimal science and/or math skills. It presents lesson material on an 8th grade level. It is for students planning to pursue a career in the trades; students who are not planning a college career path. (00001846)</del></p>
<p><del>Biology</del></p>	<p><del>Acellus Biology provides students with an introduction to the study of life. Students explore DNA, cells, organisms, and ecosystems. This course covers the requirements for life all over the globe and the interactions between living and non-living matter. Students will learn about the evolution of organisms and how genes are passed on through generations. California A-G/Quality Matters approved. (Version 2.2) (00001825)</del></p>

AP Biology	AP Biology has been audited and approved by the College Board to provide students with a college-level learning experience. Core scientific principles, theories, and processes of life are studied. Students should successfully complete Biology and Honors Chemistry prior to taking this course. AP Biology is especially recommended for those planning a college career path in a life science-related field of study. California A-G approved. (00001310)
General Chemistry	General Chemistry provides high school students with a basic introduction to chemistry. Topics covered include atomic theory, chemical reactions, bonding, acids and bases, stoichiometry, and an introduction to various forms of matter. Students should take this course concurrently with, or after taking, Algebra II or Integrated Math III. (Version 2.0) (00002020)
AP Chemistry	AP Chemistry has been audited and approved by the College Board to provide students with a college-level learning experience. Structure and states of matter, intermolecular forces, and reactions are some of the topics covered. Students should successfully complete Honors Chemistry prior to taking this course. AP Chemistry is especially recommended for those planning a college career path in a STEM field of study. California A-G approved. (Version 2.0) (00001815)
Environmental Science	Environmental Science provides high school students an introduction to the study of the natural world and how it is influenced by human activity. Students explore the patterns and processes of Earth and how these are affected by natural and human impacts. They study environmental problems that our planet is facing today and various efforts to solve these problems, ultimately understanding the need for a sustainable future. (00001635)
AP Environmental Science	AP Environmental Science has been audited and approved by the College Board to provide students with a college-level learning experience. In this updated course, students explore the interrelationships of the natural world. This course is recommended for students that have completed two years of high school laboratory science and

	have completed Algebra I. California A-G approved. (00001802)
General Physics	General Physics provides high school students with an introduction to physics. Among the many topics covered include classical mechanics, electricity, and magnetism. General Physics covers the most important concepts taught in Honors Physics. It is recommended that this course be taken after Algebra II and either General or Honors Chemistry. California A-G/Quality Matters approved. (00001140)
Honors Physics	Honors Physics provides more advanced high school students with an introduction to physics. This course covers all of the material included in General Physics plus additional lessons to give students a more rounded foundation in physics. It is recommended that this course be taken after Algebra II and either General or Honors Chemistry. California A-G/Quality Matters approved. (00001122)
AP Physics 1	AP Physics 1 has been audited and approved by the College Board to provide students with a college-level learning experience. Newtonian mechanics, waves, and simple circuits are among the topics covered. It is recommended that students take this course concurrently with, or after taking, Algebra II or Integrated Math III. California A-G approved. (00001324)

**Social Emotional Learning**

Elementary Social Development Level 1	The Acellus Elementary Social Development course is the first course in the elementary pathway focused on social development and emotional well being. This course takes an honest look at real life challenges and how to take them on, focusing on the importance of attitude, healthy relationships, and self-care, preparing students to face the future with awareness and positivity. (00001648)
---------------------------------------	--

<p><del>Middle School Social Development Level 1</del></p>	<p><del>The Acellus Middle School Social Development course is the first level in the middle school pathway focused on social development and emotional well being. This course takes an honest look at real life challenges and how to take them on, focusing on the importance of attitude, healthy relationships, and self care, preparing students to face the future with awareness and positivity. (00001649)</del></p>
<p><del>Elementary Social Skills Level 2</del></p>	<p><del>The Acellus Elementary Social Skills course is the second level in the elementary pathway focused on social development and emotional well being. This course presents students with real life scenarios, and allows them to determine how to make the choices needed in gaining positive outcomes. Students will learn about healthy lifestyles, positivity, and the impact that they can personally make on bettering their world. (00002203)</del></p>
<p><del>Middle School Social Skills Level 2</del></p>	<p><del>The Acellus Middle School Social Skills course is the second level in the middle school pathway focused on social development and emotional well being. This course presents students with real life scenarios, and allows them to determine how to make the choices needed in gaining positive outcomes. Students will learn about healthy lifestyles, positivity, and the impact that they can personally make on bettering their world. (00002205)</del></p>
<p><del>High School Social Development Level 1</del></p>	<p><del>The Acellus High School Social Development course is the first level in the high school pathway focused on social development and emotional well being. This course takes an honest look at real life challenges and how to take them on, focusing on the importance of attitude, healthy relationships, and self care, preparing students to face the future with awareness and positivity. (00001650)</del></p>
<p><del>High School Social Skills Level 2</del></p>	<p><del>The Acellus High School Social Skills course is the second level in the high school pathway focused on social development and emotional well being. This course presents students with real life scenarios, and allows them to determine how to make the choices needed in gaining positive outcomes. Students will learn about healthy lifestyles, positivity, and the impact that they can personally make on bettering their world. (00002022)</del></p>

<b>Social Studies</b>	
<del>Grade K Social Studies</del>	<del>In this course, students focus on Grade K Social Studies concepts. (00001056)</del>
<del>Grade 1 Social Studies</del>	<del>In this course, students focus on Grade 1 Social Studies concepts. (00001057)</del>
<del>Grade 2 Social Studies</del>	<del>In this course, students focus on Grade 2 Social Studies concepts. (00001913)</del>
<del>Grade 3 Social Studies</del>	<del>In this course, students focus on Grade 3 Social Studies concepts. (Version 2.0) (00001659)</del>
<del>Grade 4 Social Studies</del>	<del>In this course, students focus on Grade 4 Social Studies concepts. (00001844)</del>
<del>Grade 5 Social Studies</del>	<del>In this course, students focus on Grade 5 Social Studies concepts. (00001270)</del>
<del>Basic Social Studies Concepts for Middle School</del>	<del>This Social Studies course is recommended for middle-school students with very weak Social Studies skills. It presents the lesson material on a 4th grade level. (00001361)</del>
<del>Basic Social Studies Concepts II for Middle School</del>	<del>This Social Studies course is recommended for middle-school students with weak Social Studies skills. It presents the lesson material on a 5th grade level. (00001567)</del>
<del>California State History</del>	<del>Acellus California State History examines the landforms, climates, and natural resources of California and the United States. This course covers America's history, industries, and peoples with a special emphasis on California. As the course closes, significant California landmarks are featured. Students also learn about important Californians and other noteworthy individuals who have shaped the state and the country into what they are today. (00001882)</del>

<del>Missouri State History SEd</del>	<del>Acellus Missouri State History SEd focuses on the foundation and history of the state of Missouri, going over major events and important landmarks. This version of the course will move through the material at a slower pace, focusing on the most important points to enable students who have difficulty in this subject area to grasp the material and master the concepts that are presented. (00001367)</del>
<del>Missouri State History</del>	<del>Acellus Missouri State History focuses on the foundation and history of the state of Missouri, going over major events and important landmarks. This course is recommended for students based in Missouri, and provides a comprehensive view of the state from its birth to present day. (00001114)</del>
<del>Ohio State History</del>	<del>Acellus Ohio State History examines the landforms, climates, and natural resources of Ohio and the United States. This course covers America's history, industries, and peoples with a special emphasis on Ohio. The founding and development of Ohio as a state will be discussed. Students will learn about important rights and responsibilities of the citizens of Ohio and America. They will also study important figures from Ohio and American history. (00001912)</del>
<del>Wyoming State History</del>	<del>This is a Wyoming State History course taught by instructor Alice Kerns. Students will learn about the original inhabitants of the Wyoming region, then progress on through its development and growth, eventually reaching its attainment of statehood. They will also study its major products and industries. (00001670)</del>
<del>World History &amp; Geography 1</del>	<del>Some schools utilize this curriculum at the 6th grade level. (00001664)</del>
<del>Ancient Civilizations</del>	<del>The Acellus Ancient Civilizations course leads students through a dynamic and engaging discussion of early civilizations from the Paleolithic (Old Stone) Age through the middle ages. It goes over the basic points of archaeology and the methods that allow us to study these times. It also touches on basic geography, going over</del>

	<del>continents, oceans, hemispheres, and several types of maps. (00001657)</del>
<del>World History &amp; Geography 2</del>	<del>Some schools utilize this curriculum at the 7th grade level. (00001665)</del>
<del>Introduction to Geography</del>	<del>Some schools utilize this curriculum at the 6th-8th grade levels. (00002220)</del>
<del>Introduction to Personal Finance</del>	<del>Some schools use this curriculum at the 6th-8th grade levels. (00001229)</del>
<del>Basic Social Studies Concepts for High School</del>	<del>This Social Studies course is recommended for high school students with very weak Social Studies skills. It presents the lesson material on a 4th grade level. (00001366)</del>
<del>Basic Social Studies Concepts II for High School</del>	<del>This Social Studies course is recommended for high school students with weak Social Studies skills. It presents the lesson material on a 6th grade level. (00001568)</del>
<del>AP United States History</del>	<del>AP United States History, taught by Todd Edmond, has been audited and approved by the College Board to provide students with a college-level learning experience. In this course, students learn about the developments that have shaped United States history through the critical analysis of historical events and materials. California A-G approved. (2 semesters) (Version 2.0) (00001920)</del>
<del>AP European History</del>	<del>AP European History has been audited and approved by the College Board to provide students with a college-level learning experience. In this course, students learn about the cultural, economic, political, and social developments that have shaped today's world by studying European history from 1450 to present. (00001572)</del>
<del>World History SEd</del>	<del>Acellus World History SEd goes through the major events that have taken place in the history of this world. Topics are presented by educator Paula Keltner. This course digs in deeper than the regular course to provide needed additional instruction. (00001096)</del>

<p><del>World History</del></p>	<p><del>Acellus World History delves into the history of world civilizations. This course covers major events in history, from the dawn of civilization up through present day. Students will study the geography and populations of different areas. Students will study the major events that have shaped society and discuss how different cultures and conflicts have affected the world as we know it today. California A-G/Quality Matters approved. (00001656)</del></p>
<p><del>Epic Moments in World History</del></p>	<p><del>The Acellus Epic Moments in World History course is taught by Todd Edmond. This elective course takes students on an exciting journey through the beginnings of civilization to the present day. Major historical events will be covered and students will discover, in a deeper way, how these events of the past have affected the world we live in today. (00001476)</del></p>
<p><del>AP World History: Modern</del></p>	<p><del>This CollegeBoard audited and approved version of AP World History: Modern has been updated to include more in-depth coverage of concepts covered in the latest CollegeBoard AP World History: Modern Course and Exam Description. Students should successfully complete World History before taking this course. (Version 2.0) (00002217)</del></p>
<p><del>World Geography</del></p>	<p><del>The Acellus World Geography course, taught by Todd Edmond, investigates the features and inhabitants of different regions on this earth. Students will explore the physical and cultural geography of the world and investigate how physical surroundings impact the everyday lives of people in different areas. Students will also study how people survive in difficult areas and use the environment to their advantage. California A-G/Quality Matters approved. (00001641)</del></p>
<p><del>US Government and Civics</del></p>	<p><del>In this course, taught by Todd Edmond, students are introduced to the fundamental principles the U.S. Constitution is based upon, and how our government is run today. Throughout this course, students study the founding of our country, how and why the American Revolution began and how the law of our land was formed. They also learn about the rights and duties of American citizens.</del></p>

	<del>California A-G/Quality Matters approved. (Semester Course) (00001793)</del>
<del>Economics</del>	<del>Acellus Economics provides students with an introduction to the foundation principles of the economics of the world. Taught by Mark Rogers, this course covers a variety of topics, including banking, GDP, inflation, trade, currency, and competition. California A-G/Quality Matters approved. (Version 1.1) (00001922)</del>
<del>Psychology</del>	<del>Acellus Psychology introduces students to the science and research that psychology is based on. Students will analyze the scientific method and human anatomy, and then apply their understanding of these concepts to the study of memory, stress, states of consciousness, and so on. Students will also study common career paths within the field of psychology, and look at the different levels of education needed. California A-G/Quality Matters approved. (00001219)</del>
<del>AP Psychology</del>	<del>The Acellus AP Psychology course delves into the systematic and scientific study of human behavior and mental processes. Students will analyze the different factors that contribute to these subjects, including mental and physical circumstances. Topics covered include learning and cognition, sensation and perception, and biological bases of behavior. This course has been audited and approved by the College Board. California A-G approved. (00001307)</del>
<del>Personal Finance</del>	<del>Acellus Personal Finance is designed to prepare students with the skills and knowledge needed to manage their financial futures. The course will provide a tool kit of knowledge resources that will empower students to make informed financial decisions. Course topics include budgeting, checking and saving accounts, investment options, taxes, credit management, etc. California A-G/Quality Matters approved. (Semester Course) (00001178)</del>
<del>Introduction to US History</del>	<del>Some schools utilize this curriculum at the 8th grade level. (00002226)</del>

United States History	Some schools utilize this curriculum at the 9th grade level. (00002225)
-----------------------	---

**Technology**

Robotics Dance Programming	In this STEM mini course, students learn how to program AC-D2, the Acellus robot, to perform dance moves. This is an excellent precursor to the more in-depth STEM coding courses. (00001895)
----------------------------	---

STEM 1: Introduction to Coding	In the Acellus Introduction to Coding course, students are taught how to program using the Blockly coding language. With Blockly, everything is done with little building blocks that snap together in an intuitive way. Coding with blocks allows students to focus on the fundamental principles of coding, laying a foundation for more advanced programming languages. Students will learn about conditional statements, loops, and functions. (00001527)
--------------------------------	---

STEM 2: JavaScript	In STEM 2: JavaScript, students learn how to code first with Blockly and then with JavaScript source code. With Blockly, everything is done using little building blocks that snap together in an intuitive way. The blocks are used to help introduce students to the JavaScript syntax. Students study fundamental programming concepts, as well as practice writing their own source code. Students should successfully complete STEM 1 before taking this course. (00001614)
--------------------	--

STEM 3: Electronics and Coding	In Electronics and Coding, students learn how to program using JavaScript source code. They study the basics of electronics, learning how to create circuits and use various electronic devices, including transistors, generators, capacitors, and more. Students apply these skills via a detailed online simulator that allows them to design, build, and test their own electronic systems. Students should successfully complete STEM 2 before taking this course. (00001646)
--------------------------------	--

<p><del>AP Computer Science Principles</del></p>	<p><del>AP Computer Science Principles has been audited and approved by the College Board to provide students with a college-level experience. Students learn basic principles of computer science. They learn to create and implement computer programs. They explore career options and address ethical and relevant issues for today's world through hands-on application and examples. Students should successfully complete Algebra I before taking this course. A-G Approved. (00001518)</del></p>
<p><del>Introduction to Java</del></p>	<p><del>Introduction to Java is a full year course in which students are taught basic programming using the Java coding language. They use the jGrasp editor/compiler along with the Java JDK to design and code. They learn about variables, operations, data types, libraries, selection statements, arrays, functions, and methods. The Introduction to Java course is taught by Ms. Lori Hunt. Students should successfully complete Algebra 1 before taking this course. (00001615)</del></p>
<p><del>AP Computer Science A</del></p>	<p><del>AP Computer Science A has been audited and approved by the College Board to provide students with a college-level learning experience. Students learn core aspects of computer science. They create and implement computer programs that solve problems relevant to today's society, as well as deploy programming tools to effectively deal with complex problems. Students should successfully complete Algebra 1 before taking this course. California A-G Approved (00001490)</del></p>
<p><del>Mastering Microsoft Excel</del></p>	<p><del>Mastering Microsoft Excel, a full year course, gives students a good foundation in the many features of and applications for the Microsoft Excel spreadsheet program. This course provides valuable information to students planning for any business-related career—both for students headed to college and those on non-college career pathways. (00001133)</del></p>
<p><del>Fundamentals of Design</del></p>	<p><del>In Fundamentals of Design students are introduced to 3D printing technologies, techniques, and design processes. (00002023)</del></p>
