

# DEFINITIONS

*Below are definitions of terms not specifically defined on individual pages.*

## **FUNDS:**

The term **Operating Funds** is a collective reference to each of the following four funds, which combine to include the bulk of the day-to-day revenues and expenditures of the District:

The **Education Fund** is the primary Operating Fund, generally representing approximately 89% of the total expenditures paid from the Operating Funds. It includes all financial resources of the District except those specifically required by law to be accounted for in another fund. Revenues for the Education Fund come primarily from local property taxes (roughly 88%), state aid (roughly 6%) and federal aid (roughly 6%).

The **Operations and Maintenance Fund** covers solely those expenditures made for operations, repair and maintenance of the District's buildings and land. It generally makes up about 6% of all the Operating Funds expenditures. Revenues for this fund come primarily from local property taxes.

The **Transportation Fund** covers all expenditures made for student transportation. It generally makes up about 5% of all Operating Funds expenditures. Revenues for this fund come from a combination of local property taxes (roughly 57%) and state reimbursement grants (roughly 43%).

The **Working Cash Fund** covers temporary interfund loans for working capital requirements, as permitted by the School Code. The revenue for this fund comes primarily from property taxes and proceeds from periodic bond issues.

## **EXPENDITURES BY FUNCTION:**

**Instruction Expenditures** are those costs directly associated with the teaching of students or the interaction between teachers and students. This includes such items as classroom teachers' salaries, benefits and textbooks as well as costs associated with Special Education, Interscholastic, Gifted and Bilingual Programs. **Support Services Expenditures** are the costs of administrative, technical, and logistical support used to facilitate and enhance instruction. This includes items in the area of Pupil Support such as Social Work, Psychology, Speech Pathology and Nurse Services; and Instructional Support such as Library Media and Technology Services. Separate **Support Services Expenditures** include Board of Education Services, Administrative Services and Business Services, as well as Maintenance and Transportation. **Other Expenditures** include Community Services, Payments to Other Governments, and Capital Outlay.

## **EXPENDITURES BY OBJECT:**

**Salaries** are amounts paid to employees on the District payroll. Generally, District salaries are for teachers and teachers' aides, covering roughly 80% of all salaries. Administrative salaries, on the other hand, are generally 10% of total salaries. Finally, nurse, social worker, custodial, and technology related salaries are roughly 10% of total salaries. **Employee Benefits** are amounts District 90 pays on behalf of employees to cover fringe benefits like healthcare coverage and pensions. **Purchased Services** are amounts paid for personal services rendered by personnel not on the District's payroll. This includes items such as outside consultants, therapists and professional specialists. **Supplies and Materials** are amounts paid for material items of an expendable nature that are consumed, worn out or deteriorated in use. This includes items such as textbooks, workbooks, pens and pencils, paper, art supplies and copier ink. **Capital Outlay** are amounts paid for the acquisition of fixed assets like technology or copier equipment or additions to fixed assets like building improvements.

## **ADJUSTING FOR INFLATION:**

To adjust for inflation, the District uses the **Employment Cost Index (ECI)**. As opposed to the Consumer Price Index (CPI), which essentially tracks changes in the cost of living, the ECI tracks changes in the cost of labor. This not only includes salaries, but benefits as well. Since almost 77% of the District's expenditures are salaries and benefits, this measure is more representative of the District's financial dynamics, and thus, more useful.

## Operating Funds Revenues by Source - Last Ten Fiscal Years

### Notes

\*Source of information - District Annual Comprehensive Financial Report (ACFR).

Local Revenues include taxes, interest and other items such as school fees.

State Revenues include State aid, while Federal Revenues include Federal aid.

The increase in 2017 is actually due to the prior year Education Fund tax rate reaching the statutory rate ceiling, which allocated more tax revenues into non-operating funds. The Board then adopted a levy strategy to increase the Special Education levy, which allocated tax revenues back into the operating funds. The decrease in 2021, while not as significant as in previous years, was due mainly to a decrease in interest on investments and lunch fees offset by the first time receipt of ESSER funds. A significant portion of lunch fees were refunded due to COVID delaying the program. The increase in 2022 was due to the collection of additional property taxes, replacement taxes, lunch fees and additional federal aid, all offset by a decrease in interest earnings.

Total Revenues were adjusted for inflation using the seasonal adjusted quarterly Employment Cost Index (ECI) adjusted to 6/30/22 dollars.

2022	\$26,503,849	4.41%	\$26,503,849	0.11%

### Notes

\* Source of Information - District 90 Annual Financial Report (AFR).

Total Expenditures were adjusted for inflation using the seasonal adjusted quarterly Employment Cost Index (ECI) adjusted to 6/30/22 dollars.

The increase in 2014 was due mainly to the 2.7% salary increase in the teachers' collective bargaining agreement. In addition, the increase in supplies and materials was due to a significant core literacy textbook adoption, while the increase in capital outlay was due to capital expenditures for building projects as well as the completion of the one-to-one iPad implementation at Roosevelt Middle School.

The decrease in 2016 was due mainly to the significant construction projects that took place in the summers of 2015 and 2016 that were charged to the Capital Projects Fund, a non-operating fund (costs of approximately \$1.8 million combined).

The increase in 2017 was due primarily to the 2.7% salary increase in the teachers' collective bargaining agreement. In addition, capital expenditures increased due to the Technology plan as well as the District instituting a new print management system with all new multi-function devices. Finally, out-of-district special education tuition and the related transportation increased greatly.

The increase in 2021 was due primarily to the significant addition of COVID-related salaries, benefits and purchased services expenditures needed to ensure the safest work environment possible for students, faculty and staff.

## Average Teacher Salary - Last Ten Fiscal Years

**Notes**

\* Source of Information - District 90 Annual Comprehensive Financial Report (ACFR).

Average Teacher Salary was adjusted for inflation using the seasonal adjusted quarterly Employment Cost Index (ECI) adjusted to 6/30/22 dollars.

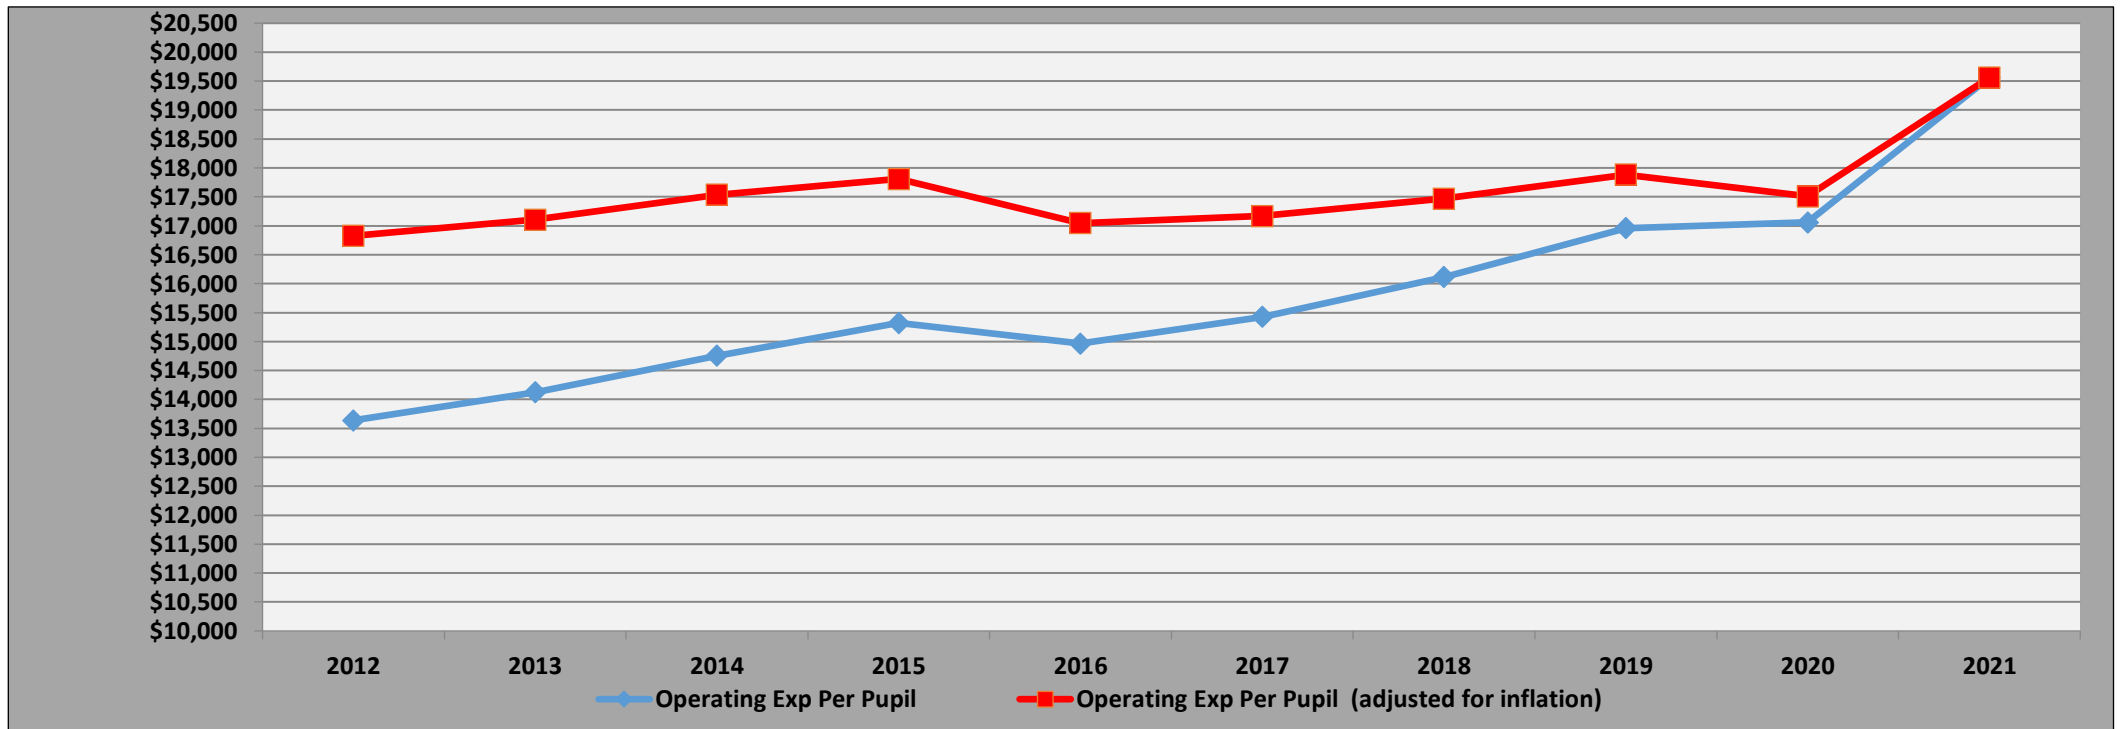

The decrease in FY 15 Ave Teacher Salary was due mainly to the retirement of eight highly compensated, veteran teachers replaced by teachers paid lower on the pay scale.

The decrease in FY 16 Ave Teacher Salary was due mainly to the retirement of four highly compensated, veteran teachers replaced by teachers paid lower on the pay scale.

The increase in FY 19 Ave Teacher Salary was due to a change in the calculation formula by ISBE per the 2019 Report Card Metrics, which not only modified the numerator and denominator, but the minimum salary amount eliminated from the average was raised. In addition, there were almost twenty teachers that received education lane increases in that year as compared to only a handful in the prior year.

The decrease in FY 20 Ave Teacher Salary was due mainly to the resignation/retirement of seven highly compensated, veteran teachers replaced by teachers paid lower on the pay scale or not replaced at all.

### Notes

\* Source of Information - District 90 Annual Financial Report (AFR).

The Operating Expense per Pupil (OEPP) is calculated as part of the Annual Financial Report, which is completed after the close of the fiscal year. Operating expenses are calculated by taking applicable costs less certain revenues and expenditures of nonregular programs. That total expense amount is then divided by the Average Daily Attendance to calculate Operating Expense per Pupil. OEPP was adjusted for inflation using the seasonal adjusted quarterly Employment Cost Index (ECI) adjusted to 6/30/22 dollars.

The increase in FY 21 OEPP was due to a significant increase in Operating Expenses, particularly in the Education Fund along with a decrease in total deductions for OEPP computation, mainly in tuition payments and capital outlay, along with a sizeable decrease in Average Daily Attendance, which was mainly due to the pandemic.
