

# February Maintenance Board Report

I am excited to share that we have received occupancy for the Middle School CTE building. Our maintenance crew, along with student helpers, will continue setting up the new shop as furniture and equipment arrive.

The Maintenance Department has been productive, completing 181 work orders, not including in-person requests, and is currently being fully caught up on all requests.

As we move toward spring, the Grounds Crew will be beginning spring start-up activities. Their focus will be on preparing our baseball, softball, tennis, and track areas, ensuring all spaces are cleaned up, safe, and ready for spring sports.

Additionally, our annual leased land inspection, which typically takes place in June, has been moved up to March. This earlier inspection provides a great opportunity to stay ahead with spring sports preparation.

Our Custodial Crews continue to do an outstanding job maintaining our buildings throughout the busy basketball season.

On a personal note, attending my daughter's away basketball games has been a great experience. It has given me a perspective on just how fortunate we are to have the facilities we do, along with the dedicated and hardworking staff who keep our buildings looking and functioning great!
