

Community Education Youth Enrichment School Board Positive Happenings

The Community Education Youth Enrichment program offered many new classes and camps this year. We offered a 50% off class discount for our School Age Care participants on our Young Rembrandts art classes.

Young Rembrandts has become a recognized leader in art education. There is a significant correlation between involvement in the arts and achievement in the classroom. Children who learn to draw using the Young Rembrandts method develop spatial reasoning and fine motor skills, order and sequencing abilities, visualization, and self-discipline as well as fundamental art skills. Their original curriculum introduces concrete ideas and techniques that enlarges the participant's visual vocabularies and enriches their imaginations and minds.

Zumbatomic

Designed exclusively for kids, Zumbatomic classes are rockin', high-energy fitness-parties packed with specially choreographed, kid-friendly routines and all the music kids love, like hip-hop, reggaeton, cumbia and more. Parents love the Zumbatomic program because of the effects it has on kids -- increasing their focus and self-confidence, boosting metabolism and enhancing coordination.

Youth Enrichment League brings the highest quality enrichment to schools throughout Minnesota. Their philosophy is that every student has unique gifts they are given and they see enrichment as a possible channel to nurture those gifts. We offered the LEGO X Olympic Decathlon this summer. It was a huge success. Participants investigated basic engineering concepts and built a LEGO race-car. Students were given a different LEGO building challenge daily in the fun, inclusive and fast-paced camp.
