TECHNOLOGY REPORT

For the April 2018 School Board Meeting

The QISD Technology director responded to 48 calls for assistance since the February 2018 board meeting. TELPAS testing using our high school computer lab went smoothly in early March. We will have some online testing using the student chromebooks the week of April 10th and also in May. I have ensured the student chromebooks are ready for this online testing. Monthly software patches for our district wireless access points, firewall, network switches and iMac computer labs have been installed. iOS 11.3 and OSX 10.13.4 have been released for Apple devices. Google Chromebook OS version 65 has been released and pushed out to the student chromebooks.
