

Technology Dept Report

March 14, 2016

District WAN

- We are going to ask for a new bid for our Wide Area Network(WAN). We will have the option to accept a new bid with new prices or to continue with existing prices currently offered from PMT. If we accept the new bid, we will need to approve that in April's school board meeting. The bid process is now managed completely through the eRate online system to guarantee every vendor that can provide service is given the opportunity.

Labs/Testing

- WIDA testing is almost complete. We are now getting all the labs setup for ISAT testing.

Camera at Minico Intersection

- The Idaho Department of Transportation is paying for a camera to be placed at the main intersection at Minico. We will be reimbursed by IDOT after the installation is completed. Ednetics will be installing it for us. There is not a date for installation set as of yet. The camera will be connected to Minico's surveillance server.

East Minico Phones

- The classroom phones at East Minico will be changed during spring break. This will leave Minico, West Minico, and Paul as the schools still needing a new system.

Cell Phone Internal Signal

- We have had a walk through with Hunt Electric from Salt Lake City to bid us options for cellular service inside our buildings. We are now waiting for that proposal. We are required to use a provider that is FCC certified.

Work Orders

- December
 - 45 New
 - 48 Resolved
 - 23 Incomplete
- January
 - 90 New
 - 74 Resolved
 - 39 Incomplete
- February
