A. NFHS/NFMS Start Time Survey – A survey or corresponding information has not been received, and no one was present to inform the subcommittee on the status of the survey. B. Street Light at High School – Traffic plan and evaluation were distributed. There was a study done on traffic patterns at the high school in 2014. Additional information that could update the study for the BOE was requested. It was reported that there is frequency of teenage accidents at the mouth of the high school, and there are visibility issues when entering and leaving driving lanes. Dr. Roy reported that we were already informed that a traffic light cannot be placed there, but we could put flashing lights. There was a suggestion that that we might reconfigure the driveway so that there is one way in and one way out. It was proposed that this be forwarded to public works to continue this discussion and to the town for further consideration.
