

Special Education Open Enrollment Seats Available for the 2022-23 School Year

The numbers of open seats are based on the statewide caseload formula. That formula assigns a number (larger than 1) to each special education student based on the student's age and service level needs. Therefore the number of open seats is not actually the number of student openings.

Early Childhood	0 Seats
Elementary Grades K-5	6 Seats
Middle Grades 6-8	3 Seats
High School Grades 9-12	5 Seats

Important Note:

The speech and language, occupational therapy and physical therapy caseloads are all at or above the maximums recommended by the Department of Public Instruction, open enrollment requests will be considered for all open seats but may be denied for students needing these related services.
