RE: Policy Review
DATE: May 22, 2017

The following policy needs to be reviewed by the District #304 Policy Committee.

Policy 5330: Administration of Medications: There has been a significant rise in the number of people aged 12 and older who received treatment for a heroin problem: from 277,000 in 2002 to 536,000 in 2013. 105 ILCS 5/22-30 was modified to incorporate the authorization of a District to have a supply of opioid antagonists (such as Narcan) prescribed in the name of the school and administered by a school nurse or trained personnel. Policy 5330 has been modified to provide District with the option of accepting this responsibility.
